INTRODUCTION

Microlog: Canadian Research Index puts all of Canada's hard-to-find government and research literature at your fingertips. This monthly indexing, abstracting and document delivery service covers all levels of government in Canada, as well as institutions receiving research grants. Most titles included in **Microlog** are available in either paper or microfiche format. Combined with a microfiche collection, the **Microlog Service** is a powerful tool for finding Canadian report publications. The unique **Microlog Accession Number** is the key to immediate retrieval of any document.

SCOPE

Among other documents, **Microlog** includes research papers in physical, natural and social sciences, policy papers, important statistics, and annual reports. Every effort is made to ensure the currency of the index. For instance, documents appearing in the Checklist of Canadian Government Publications are delivered by **Microlog** approximately two months after publication of the list.

LANGUAGE POLICY

Documents issued in English or French are indexed and abstracted in the language of publication, while bilingual documents are indexed and abstracted in both languages.

SOURCES AND COVERAGE

Federal Documents: The **Microlog** editors review all checklists issued by the Canadian Government Publishing Centre and order every document relevant to the service. Except for serials, maps, pamphlets, and manuals, all monographs covered by the Federal Depository Plan are included in the index. Also, a special effort is made to track down elusive but important titles which do not appear in the lists.

Microlog offers a special collection of documents published by the Federal Government but not issued through the Federal Depository Plan. These titles, available to subscribers as the Non-Depository Publications collection, are indicated in the Titles section by a bullet (•). **Microlog** is also the direct distributing agent for many government bodies.

Provincial Documents: Depository arrangements with several provincial libraries have been established to ensure that **Microlog** subscribers receive all publications from those provinces. Where no depository arrangement exists, all publications lists issued by the province are reviewed for acquisitions.

Municipal Documents: Since these titles are very difficult to obtain, the **Microlog** editors make special efforts to include publications from municipal sources.

ACCESS

The Index provides access by subject, corporate or individual author, and series title.

The full **Microlog** file from 1979 to date, consisting of almost 50,000 records, is available online through Can/OLE. This is an ideal way to locate hard-to-find reports which may then be ordered directly online through the Can/DOCS service. Contact: Can/OLE Client Services, CISTI, Ottawa, Ontario, K1A 0S2.

FEATURES

Microlog comprises the following sections:

1. **Titles and abstracts:** A full bibliographic citation and a descriptive abstract for each title.
2. **Name Index:** Access by personal author, corporate author, and conference name.
3. **Series Titles:** Lists by title and number all reports in series in the service; series are available as an ongoing subscription or retrospective collection.
4. **Subject Index:** Descriptors based on Library of Congress and Canadiana Subject Headings are assigned to each document. A cross-referencing structure assists searchers.
5. **Microfiche collections:** Lists contents of each fiche collection for quick reference. These collections can be used as current awareness lists in broad subject areas to notify users of new acquisitions. This section is included in the annual cumulation as a separate fished product.

MICROLOG AND CANADIAN STATISTICS INDEX

Statistical Material: The **Canadian Statistics Index (CSI)** provides further access to statistical material contained in **Microlog** monographs and special or annual reports. The CSI identification number has been included with the **Microlog** citation for the convenience of subscribers to the CSI fiche collection.

Annual Reports: Storage of annual reports in a single sequence has been a problem for clients in the past. The CSI numbers for annual reports are now listed in the bibliographic citation and appear on the microfiche header of each report, to make such sequencing possible.

DOCUMENT DELIVERY

Institutions may subscribe to complete or partial collections of the documents in **Microlog**. Individual copies on microfiche or paper reprint may be ordered through Micromedia's Document Delivery Service. To order, please contact:

INTRODUCTION

Microlog: Index de recherche du Canada met à votre disposition toutes les publications du gouvernement et les travaux de recherche difficiles à se procurer. Combiné aux collections sur microfiches, le service **Microlog** constitue un outil très efficace pour retrouver les publications des différents gouvernements du Canada, ainsi que celles des organismes qui reçoivent des subventions pour la recherche. **Microlog** est aussi un service de livraison de documents, sur microfiches ou sous forme imprimée.

CONTENU

Microlog contient entre autres des recherches en sciences physiques, naturelles et sociales, des énoncés de politique, des statistiques et des rapports annuels. Par l'intermédiaire du service **Microlog**, on peut obtenir les documents qui figurent sur la Liste des publications du gouvernement du Canada environ deux mois après leur parution sur cette liste.

POLITIQUE LINGUISTIQUE

Les ouvrages publiés en français ou en anglais sont indexés et résumés dans la langue de publication; les ouvrages bilingues sont traités dans les deux langues.

SOURCES

Publications fédérales: Les rédacteurs de **Microlog** examinent les listes émises par le Centre d'édition du gouvernement du Canada et commandent les documents pertinents. En dehors des publications en série, cartes, brochures et manuels, toutes les monographies régies par le Programme de dépôt du gouvernement fédéral figurent dans l'index, ainsi que des ouvrages importants ne figurant pas sur les listes.

Microlog propose aussi une collection spéciale de publications fédérales non déposées, identifiées par un point (•) dans la section Titres et résumés. **Microlog** est aussi l'agent de diffusion de nombreux organismes gouvernementaux.

Publications provinciales: Des ententes de dépôt ont été conclues avec plusieurs bibliothèques provinciales pour que les abonnés de **Microlog** reçoivent toutes les publications de ces provinces. Lorsqu'aucune entente n'existe, les listes de publications émises par les provinces sont examinées afin d'acquérir les documents.

Publications municipales: Ces ouvrages étant difficiles à se procurer, les rédacteurs de **Microlog** redoublent d'ardeur pour les inclure dans l'index.

ACCÈS

L'index imprimé est bilingue et les publications sont répertoriées par sujet, par auteur (collectivité et personne physique) et par titre de collection.

Le fichier complet de **Microlog**, de 1979 à aujourd'hui, contient près de 50,000 notices et est accessible sur

Can/OLE. Il s'agit d'un moyen idéal pour mettre la main sur des rapports difficiles à trouver qu'on peut commander par l'intermédiaire du service Can/DOCS. À ce propos, veuillez vous adresser au Service à la clientèle Can/OLE, ICIST, Ottawa (Ontario), K1A 0S2.

ORGANISATION DE L'INDEX

Microlog est divisé en cinq sections:

1. Titres et résumés: tous les titres sont catalogués et accompagnés d'un résumé descriptif.
2. Index des noms: donne un accès par auteur, collectivité-auteur et titre de conférence.
3. Titres de collections: tous les rapports publiés en série sont classés par titre et numéro. Ces collections peuvent être commandées individuellement.
4. Index des matières: les descripteurs permettent de trouver facilement les publications pertinentes; un réseau de renvois facilite la recherche.
5. Collections de microfiches: chaque collection apparaît dans une section séparée pour faciliter la recherche. Ces listes peuvent aussi servir à renseigner les usagers sur les nouveautés. Dans la refonte, cette section est insérée sous forme de microfiches.

MICROLOG ET L'INDEX DES STATISTIQUES DU CANADA

Données statistiques: L'**Index des statistiques du Canada** (CSI) constitue une autre source de référence sur les statistiques contenues dans certaines publications indexées dans **Microlog**. Celles-ci ont un numéro d'ordre spécial qui est inclus dans la référence bibliographique.

Rapports annuels: Afin de rendre le classement des rapports annuels plus facile, le numéro d'ordre CSI correspondant à ces documents figure maintenant dans les références bibliographiques et est inscrit sur les en-têtes de microfiches.

LIVRAISON DE DOCUMENTS

On peut s'abonner à l'ensemble ou à certaines des collections de documents de **Microlog**. On peut également commander des reproductions de documents sur microfiches ou sur papier par l'intermédiaire du service de livraison de documents de Micromedia. Pour commander, communiquer avec:

Micromedia Ltée

FICHE COLLECTIONS

Documents from MICROLOG are available on microfiche through various subscription plans ranging from the complete collection to subsets by level of government (jurisdiction), geographic area or subject. Listed below are all the collections available with a short explanation for each one.

JURISDICTION COLLECTIONS

- CA** **FEDERAL:** titles issued at the federal level, about Canada or federal matters, both depository and non-depository.
- PR** **PROVINCIAL:** titles issued by provincial governments.
- MU** **LOCAL/MUNICIPAL:** titles issued by local governments, or about local jurisdictional concerns, or about specific cities or towns.

GEOGRAPHIC COLLECTIONS

Documents included in the geographic collections are published at the provincial level or cover a province.

- AL** **ALBERTA**
- AP** **ATLANTIC PROVINCES:** Newfoundland, Nova Scotia, New Brunswick, and PEI.
- BC** **BRITISH COLUMBIA**
- MS** **MANITOBA - SASKATCHEWAN**
- NO** **NORTH OF 60:** Northwest Territories, Yukon Territory, Arctic Regions.
- ON** **ONTARIO**
- QU** **QUEBEC**

SUBJECT COLLECTIONS

- AG** **AGRICULTURE:** all aspects of agriculture, food and beverage industries; soil sciences; water in agriculture; fur industry; hunting industry; animal industry; crops and climate; horticulture; wine making.
- BS** **BEHAVIOURAL SCIENCES:** human behaviour; alcoholism and drug abuse; child abuse; suicide; psychology; public opinion and survey methods.
- CO** **COMMERCE AND ECONOMICS:** business and finance; consumer affairs; free trade; marketing; tourism; insurance; pension fund administration; taxation; assessment; budget papers for Canada and provinces.
- CU** **CULTURE, RECREATION AND HUMANITIES:** arts; theatre; sports; lotteries; archaeology; history and historic sites; recreational hunting and fishing; parks; tourism related to recreation; libraries.
- ED** **EDUCATION:** curriculum; educational research; school and university funding; learning; teacher collective bargaining and pension funds; community and school.
- EN** **ENERGY:** resources, supply and demand; generation; storage; transmission; regulation; conservation; exploration; alternative resources; insulation.
- EV** **ENVIRONMENT:** pollution; environmental policy; assessment reports; natural areas and park management; environmental accidents; hazardous wastes; wildlife resources; environmental health.
- EX** **EXTERNAL AFFAIRS:** international relations; defence; aid to developing countries; international trade; free trade; immigration policy; arms control; wars and warfare.
- FI** **FISHERIES:** commercial fishing; fish resources; fish biology; aquatic resources; fish habitat; aquaculture; aquatic ecology; fish trade; law of the sea related to fisheries; fishing boat accidents.
- FO** **FORESTRY:** forest ecology; logging; forest products; wood trade;

forest fires; reforestation; wood crops for energy; pulp and paper industry.

- HE** **HEALTH AND MEDICINE:** public health and health services; health insurance; nutrition; vital statistics; medical ethics; diseases and hygiene; environmental health; disease aspects of occupational health.
- JU** **JUSTICE AND LAW:** crime; corrections; ombudsman; coroner; human rights; police activities; firearms; law reform.
- LA** **LABOUR:** employment; manpower; occupational health and safety; collective bargaining; vocational training and retraining; wages; compensation; strikes.
- LS** **LIFE SCIENCES:** biology; botany; zoology; genetics; biotechnology; medical sciences.
- NP** **NATIVE PEOPLES:** any material related to issues involving Canada's Native peoples.
- NR** **NATURAL RESOURCES, EARTH SCIENCES AND MINING:** land, water and mineral resources; land reclamation; flood control; hydrology; oceanography; mining; geology; economic geology; mining techniques; metallurgy.
- PS** **PHYSICAL SCIENCES:** practical sciences and technology; mathematics; physics; computer sciences; chemistry; meteorology; hydrology; geophysics; oceanography; nuclear science; metallurgy; earth sciences; engineering; astronomy; robotics; telecommunications.
- PL** **PLANNING, HOUSING AND CONSTRUCTION INDUSTRY:** planning policy and regulation; building technology; housing rehabilitation; availability; land use planning; architecture.
- PA** **PUBLIC ADMINISTRATION:** politics, government and administration; government operations; intergovernmental relations; public finance, budgets, estimates; parliamentary process; elections; ombudsman; taxation; annual reports of municipalities; privatization.
- PW** **PUBLIC WORKS:** government management of infrastructures; public utilities; waste management; fire control; emergency services; Crown land management.
- SA** **SOCIAL AFFAIRS:** social problems; social services; alcohol and drug problems; housing and public housing; adoption; wife abuse; families; women; Native peoples; minorities; handicapped; public welfare; unemployment; demography; veterans affairs; aged.
- SC** **SCIENCE & TECHNOLOGY:** agriculture; energy; environment; fisheries; forestry; life sciences; natural resources; physical sciences; planning; telecommunications; transportation.
- ST** **STATISTICS:** all material from Microlog that is included in the Canadian Statistics Index.
- TE** **TELECOMMUNICATIONS:** communications and broadcasting policy, regulation, technology; information systems; data base management; publishing; courriers and postal service; telephones; telex; communication satellites.
- TR** **TRANSPORTATION:** all modes of transportation; traffic planning and engineering; vehicles; transportation fuels and fuel conservation; roads and highways; pipelines.

SPECIAL COLLECTIONS

- CI** **CRITICAL ISSUES:** newsworthy topics such as abortion, the environment, defence, and free trade.
- CF** **FISHERIES & OCEANS CANADA:** documents published by the Department of Fisheries and Oceans.
- CM** **CANADA CENTRE FOR MINERAL & ENERGY TECHNOLOGY (CANMET)**
- **NON-DEPOSITORY COLLECTIONS:** a bullet in the Abstracts Section indicates a document published by the federal government, but not issued through the Federal Depository Plan. This is available as a complete collection or as a Science or Social Science sub-collection.

COLLECTIONS DE MICROFICHES

Les publications incluses dans MICROLOG sont en vente sur microfiches, en collection complète ou en collections plus petites regroupant des titres par juridiction, par aire géographique ou par matière.

COLLECTIONS GOUVERNEMENTALES

- CA FÉDÉRAL:** publications émises par le gouvernement fédéral, régies ou non par le Programme de dépôt.
- PR PROVINCIAL:** publications des gouvernements provinciaux.
- MU LOCAL/MUNICIPAL:** publications émises par les gouvernements locaux et municipaux, ou concernant une juridiction locale ou municipale.

COLLECTIONS GÉOGRAPHIQUES

Les publications incluses dans ces collections sont publiées au niveau provincial ou concerne une province.

- AL ALBERTA**
- AP PROVINCES ATLANTIQUES:** Terre-Neuve, Nouvelle-Écosse, Nouveau-Brunswick, Île-du-Prince-Édouard.
- BC COLOMBIE-BRITANNIQUE**
- MS MANITOBA et SASKATCHEWAN**
- NO NORD DU 60E:** Territoires du Nord-Ouest, Yukon, régions arctiques.
- ON ONTARIO**
- QU QUÉBEC**

COLLECTIONS PAR MATIÈRE

- AG AGRICULTURE:** tous les aspects de l'agriculture; industries des breuvages et de l'alimentation; études des sols; eau en agriculture; industrie de la fourrure; industrie de la bétail; cultures et climat; horticulture; viticulture.
- BS SCIENCE DU COMPORTEMENT:** comportement humain, alcoolisme et toxicomanie; enfance maltraitée; suicide; psychologie; criminologie; opinion publique et sondage.
- CO COMMERCE ET ÉCONOMIE:** affaires et finances; consommation; libre-échange; marketing; tourisme; assurance; caisses de retraite; taxe et évaluation foncière; budgets fédéral et provinciaux.
- CU CULTURE, LOISIRS ET SCIENCES HUMAINES:** arts; théâtre; sports; loteries; archéologie; histoire; sites historiques; chasse et pêche sportive; parcs; tourisme (aspect récréatif); linguistique; bibliothèques.
- ED ÉDUCATION:** guide pédagogique; financement des écoles et des universités; apprentissage; conventions collectives et caisses de retraite des enseignants.
- EN ÉNERGIE:** offre et demande; production; emmagasinage; transmission; réglementation; conservation; exploration; énergies douces; isolation.
- EV ENVIRONNEMENT:** pollution; politique de l'environnement; études d'impact; zones de conservation et gestion des parcs; accidents écologiques; déchets dangereux; faune; santé et environnement.
- EX AFFAIRES EXTÉRIEURES:** relations internationales; défense; aide étrangère; commerce international (libre-échange); immigration; guerre et armements.
- FI PÊCHE:** pêche commerciale; ressources halieutiques et aquatiques; biologie du poisson; aquaculture; écologie marine; loi de la mer.
- FO FORÊTS ET SYLVICULTURE:** écologie et exploitation forestière; produits de la forêt; incendies de forêts; reboisement; utilisation du bois comme énergie; pâtes et papier.

- HE SANTÉ ET MÉDECINE:** santé publique et services de santé; assurance-maladie; nutrition; statistique médicale; déontologie médicale; maladies et hygiène; santé et environnement; santé au travail (aspect pathologique).
- JU JUSTICE ET DROIT:** criminalité; services correctionnels; protecteur du citoyen; coroner; droits de la personne; activités policières; armes à feu; réforme du droit.
- LA TRAVAIL:** emploi, main d'oeuvre; santé et sécurité au travail; conventions collectives; formation et recyclage professionnel; salaires; accidents du travail; grèves.
- LS BIOLOGIE:** botanique; zoologie; génétique; biotechnologie; médecine.
- NP POPULATIONS AUTOCHTONES:** publications ayant trait aux peuples autochtones canadiens.
- NR RESSOURCES NATURELLES:** ressources du sol, aquatiques et minérales; améliorations foncières; contrôle des crues; hydrologie; océanographie; mines; géologie; techniques minières; métallurgie.
- PS SCIENCES PHYSIQUES:** sciences appliquées et technologie; mathématiques; physique; informatique; chimie; météorologie; hydrologie; géophysique; océanographie; sciences nucléaires; métallurgie; géologie; génie; astronomie; télécommunications.
- PL PLANIFICATION, LOGEMENT ET INDUSTRIE DE LA CONSTRUCTION:** planification, urbanisme et zonage; construction; bâtiment; rénovation domiciliaire; utilisation du sol; architecture.
- PA ADMINISTRATION PUBLIQUE:** politique et gouvernement; opérations gouvernementales; relations inter-gouvernementales; finances publiques et budget; processus parlementaire; élections; protecteur du citoyen; impôt; rapports annuels municipaux; privatisation.
- PW TRAVAUX PUBLICS:** gestion des infrastructures; services publics; élimination des déchets; protection contre l'incendie; services d'urgence; terres de la Couronne.
- SA AFFAIRES SOCIALES:** problèmes sociaux; services sociaux; alcoolisme et toxicomanie; logement public; adoption; femmes battues; familles; autochtones; minorités; handicapés; bien-être social; chômage; démographie; anciens combattants; personnes âgées.
- SC SCIENCE ET TECHNOLOGIE:** agriculture; énergie; environnement; pêche; sylviculture; biologie; ressources naturelles; sciences physiques; planification; télécommunications; transport.
- ST STATISTIQUES:** publications comprises dans Microlog et aussi incorporées à l'Index des statistiques du Canada.
- TE TÉLÉCOMMUNICATIONS:** communications et politiques de radiodiffusion; systèmes d'information; bases de données; édition; service postal et messagerie; téléphones; télex; satellites de communication.
- TR TRANSPORT:** tous les moyens de transport; gestion et génie du transport; véhicules; carburants; système routier; oléoducs et gazoducs; aspect de l'environnement du transport.

COLLECTIONS PARTICULIÈRES

- CI SUJETS D'ACTUALITÉ:** sujets de l'heure comme l'avortement, l'environnement, la défense et le libre-échange.
- CF PÊCHES ET OCÉANS CANADA**
- CM CENTRE CANADIEN DE LA TECHNOLOGIE DES MINÉRAUX ET DE L'ÉNERGIE**
- **COLLECTIONS NON DÉPOSÉES:** un point dans la section Résumés indique une publication émise par le gouvernement fédéral, mais non régie par le programme de dépôt. Ceci est disponible en collection complète ou en collection Scientifique ou Sciences Humaines.

Sample Microlog Search

“How can a person from a foreign country qualify for refugee status in Canada?”

The researcher can search in Microlog as in any library catalogue – by subject, author and title.
Because the index is bilingual, searching can be done in English or in French.

Recherche type avec Microlog

“Comment une personne d'un pays étranger peut-elle demander le statut de réfugié au Canada?”

La méthode de recherche dans Microlog est la même que dans une bibliothèque, puisque les documents sont indexés par auteur, par sujet et par titre. L'index étant bilingue, la consultation peut se faire en français ou en anglais.

ISBN 0-660-12567-6
MICROLOG 88-00800 1 fiche

The increase of refugee status claiming
immigrants in Canada has led to a review of
the immigration policy concerning this group.
This report looks at the weaknesses of current
legislation which is linked to the Geneva
Convention and its Protocol, studying Canada's
past adherence to the rights afforded under its
protection. Also discusses public and
government opinion on support for a
humanitarian and generous refugee policy and
questions of balancing efficiency with procedural
fairness to claimants. Gives a chronology of
events since 1969.

ISBN 0-660-92124-3
MICROLOG 88-00800 1 fiche

Le processus de reconnaissance du statut de
réfugié au sens de la Convention de Genève,
tel qu'il est énoncé dans la Loi sur
l'immigration, sert à déterminer si les
personnes qui revendiquent ce statut y ont
effectivement droit et peuvent bénéficier de la
protection accordée aux réfugiés au sens de la
Convention. Ce processus s'est avéré
inadéquat, tant au point de vue juridique que
pratique. Dans ce bulletin, on examine les
mécanismes en vigueur actuellement et le
projet de réforme contenu dans la loi C-55
déposé en mai 1987.

STEP 2/DEUXIÈME ÉTAPE

A unified search strategy

The search strategy should include all the monthly
issues. Start with the most recent issue and work back.
Monthly issues are cumulated annually.

Établir une stratégie de recherche unifiée

La stratégie de recherche doit tenir compte de toutes
les publications mensuelles, à commencer par les plus
récentes. Chaque année, ces publications font l'objet
d'une refonte.

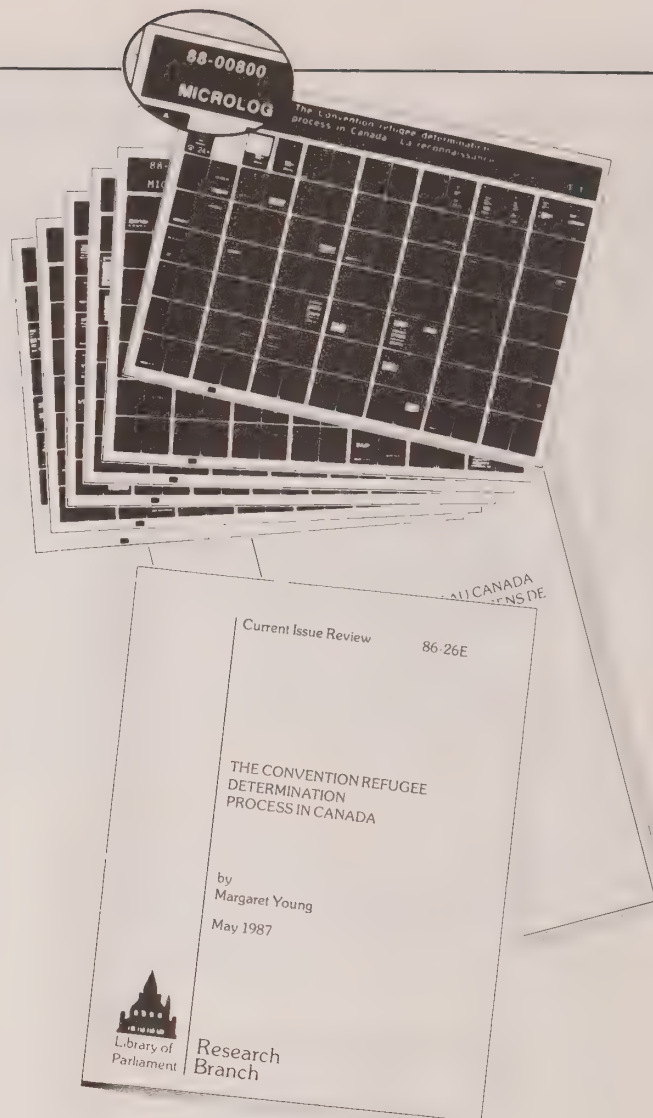

STEP 3/TROISIÈME ÉTAPE

Retrieve the publication

Each bibliographic citation gives a full description of the relevant document. Locate the document by the microfiche number in the library's collection or order from Micromedia. Individual publications are available for purchase on microfiche or paper. The bibliographic description provides publisher source information.

Repérer la publication

Chaque notice bibliographique comprend une description complète du document; celui-ci peut être repéré grâce au numéro de microfiche de la bibliothèque; sinon, il faut le commander à Micromedia. On peut se procurer les monographies sur microfiches ou sur papier. La description bibliographique comporte également des indications sur l'éditeur.

TITLES AND ABSTRACTS

TITRES ET RESUMES

115 kV and 230 kV arc reach tests at Kleinburg outdoor test facility

by R. Filter and D.E. Amm. Toronto : Ontario Hydro, Research Division, 1990. 18 p. : ill. Bibliogr. (Report ; no. 90-146-K)
MICROLOG 91-03172 1 fiche

This report summarizes investigations into arc reach resulting from low capacitive (230 Kv and 115 Kv) current switching in transmission systems. From this research, a simplified arc reach algorithm (Horizontal Arc Reach) is defined which will predict conservative arc reach values with charging currents up to 20 A.

124th Street : streetscape improvement program : final report

by EDA Collaborative Inc. ; in association with Stanley Associates Engineering Ltd. Edmonton : Edmonton Planning and Development Dept. ; 124th Street and Area Business Association, 1990. 11 p. : ill., maps.
MICROLOG 91-00299 1 fiche

The 124th Street Improvement Program in Edmonton was initiated by a group of business owners who wanted their street to receive a badly needed facelift. This document provides an overview of the project and description of the various design elements which form the Program. It summarizes cost estimates in the report with detailed breakdowns included in an appendix.

The 1986 return of even year pink salmon stocks to the Johnstone Strait study area

by A.P. Stefanson...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, South Coast Division, 1989. viii, 42 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2024)
ISSN 0706-6473
MICROLOG 91-05895 1 fiche

Condensed status reports have been published biannually on even year pink and sockeye salmon since 1962. These reports focus on salmon stocks originating from the Johnstone-Georgia Strait study area and on those Fraser River sockeye returning via the northern migration route. This report provides a general overview of the weekly commercial fisheries activities during the 1986 fishing season. Included is comprehensive documentation of the management strategies used in the 1986 Johnstone Strait study area commercial fisheries, information used in making management decisions, how the information was interpreted and what the results were for sockeye and pink catch. Escapement is also documented.

The 1987 beluga *Delphinapterus leucas* harvest in the Mackenzie River Estuary, NWT

by P.A. Weaver. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1991. iv, 18 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2097) This is the 20th manuscript report from the Central and Arctic Region. ISSN 0706-6473
MICROLOG 91-03648 1 fiche

Summary of information collected by Inuvialuit hunt monitors during the 1987 subsistence beluga fishery in the Mackenzie River estuary, NWT. Hunt documentation (struck and landed totals, estimated total kill, loss rates, landed

catch composition and distribution) is presented cumulatively and by reporting area. Information collected from hunters included weather and water conditions, the number of hunters and their home community, the hunt duration, the rifle calibre(s) used, the number of shots fired and the number required to kill each whale, and the number of whales struck and landed. Biological information collected from landed whales included sex, colour category, reproductive status of females, ageing material and measurements in standard length, auxiliary girth, fluke width, and flipper length and width.

1987 Rideau Canal land based user study

prepared for Canada Parks Service, Ontario Region ; by Market Facts of Canada Limited. Toronto : The Corporation, 1989. 264 p.
MICROLOG 91-03715 3 fiche

The Rideau Canal and the Trent-Severn Waterway are Ontario's two major waterway systems, serving two distinct user populations. The water-based users were the subject of a comprehensive survey during the 1986 operating system. This report presents the results of a survey of land-based users, conducted during the 1987 peak season. It was designed to establish a database which would provide information for management planning, carrying capacity, visitor activity management, water management, houseboat and related issues, social and economic impact and natural resource use. The survey is composed of land-based visitor attendance estimating procedures and formulae; visitor characteristics and use during the 1987 peak season; and supplemental lock station specific issues. Information was obtained through questionnaires.

Support services is also discussed. EV MS NR PR SC

1990 annual report relating to the Canada/New Brunswick Agreement Respecting a Sulphur Dioxide Emission Reduction Program for the calendar year 1990

Fredericton : Dept. of the Environment, 1991. 10 p. CSI 45128.003.

MICROLOG 91-07140 1 fiche

Annual report of the Agreement, signed in 1987, which committed New Brunswick to reducing emissions of acid rain causing sulphur dioxide by 50 per cent. The report summarizes the impact of long-standing provincial policies and legislation on SO₂ emissions, progress since 1980, projections for the future, control options, and monitoring efforts. The report describes the legislation and environmental policy relating to control of the emissions in general, then relates this legislation to thermal electric power generation, pulp mills, Brunswick Mining and Smelting, the Irving oil refinery, industrial boilers and the energy supply in the province. Deposition trends are also given. AP EV PR SC

The 1990 Canadian long-range transport of air pollutants and acid deposition assessment report, part 1 : executive summary

Federal/Provincial Research and Monitoring Coordinating Committee (Canada). Ottawa : The Committee, 1990. viii, 44 p. : ill., maps. French ed. (*Rapport de 1990...résumé*) : 91-04767/1.

MICROLOG 91-04766 1 fiche

An intensive research effort on the Long Range Transport of Air Pollutants (LRTAP), including acid rain and the effects on the Canadian environment, has been underway for more than a decade. The year 1990 marks the end of a 5-year period of special US and Canadian funding. This 1990 assessment report is composed of 8 parts of which this executive summary is the first. This summary integrates the results from the different areas, covering the steps taken to control LRTAP emissions in Canada; the response of Canadian industries and utilities to eastern Canada's SO₂ control program, the costs and the effects of these costs on the industries and local communities; the past and current levels of SO₂, NO_x and VOCs, the response of the Canadian environment to LRTAP; the changes

to be expected as a result of full implementation of the SO₂ control programs in the US and Canada and are they sufficient; the potential short-term mitigative measures, their likely consequences and anticipated success; and the future directions for LRTAP research and control activities. CA EV SC

The 1990 Canadian long-range transport of air pollutants and acid deposition assessment report, part 2 : emissions and controls

Federal/Provincial Research and Monitoring Coordinating Committee (Canada). Ottawa : The Committee, 1990. v, 74 p. : ill. Bibliogr. French ed. (*Rapport de 1990...d'antipollution*) : 91-04763/1.

MICROLOG 91-04762 1 fiche

Concern about the long-range transport of air pollutants in Canada has focused on the damage caused by acid rain and ground level ozone. In response, the federal and provincial governments have developed a cooperative approach to domestic emissions control. This report summarizes data on SO₂, NO_x, HCs and VOX emissions in Canada from 1970-85 and compares them to those in the US; discusses the jurisdictional aspects of environmental actions in both Canada and the US; describes the Canadian SO₂, NO_x and VOCs control program; and provides an overview of emissions and control trends and measures in the 1990s. Appendices describe control technologies and types of control measures. CA EV SC

The 1990 Canadian long-range transport of air pollutants and acid deposition assessment report, part 3 : atmospheric sciences

Federal/Provincial Research and Monitoring Coordinating Committee (Canada). Ottawa : The Committee, 1990. xiii, 362 p. : ill., maps. Bibliogr. French ed. (*Rapport de 1990...atmosphériques*) : 91-04755/5.

MICROLOG 91-04756 4 fiche

Air and precipitation monitoring programs have been in place in Canada since the early 1980s, and have by now yielded a substantial, high-quality data set. This report examines various approaches to evaluating source-receptor relationships (i.e., the quantitative relationships between current and future emissions, and receptor exposure) in North America and particularly in Canada. The report examines the variation in acid gas emissions in eastern North America, identifies some significant changes that have occurred since 1980 in Canada and the adjoining States, and examines the response of deposition spatial patterns, as well as air and precipitation concentrations in eastern Canada, to these changes. The current understanding about the capability of the available models to predict source-receptor relationships is examined, with the findings of a preliminary Eulerian model included. CA EV SC

The 1990 Canadian long-range transport of air pollutants and acid deposition assessment report, part 4 : aquatic effects

Federal/Provincial Research and Monitoring Coordinating Committee (Canada). Ottawa : The Committee, 1990. iv, 151 p. : ill, maps. Bibliogr. French ed. (*Rapport de 1990...aquatiques*) : 91-04761/2.

MICROLOG 91-04760 2 fiche

This 1990 assessment of aquatic effects related to the long range transport of atmospheric pollutants provides a summary of the present and predicted future status of Canadian aquatic ecosystems in relation to development of government policy on acidic deposition. The

policy orientation of the report is reflected particularly in an evaluation of critical SO₂ loads for sub-regions of eastern Canada which required specification of a biologically relevant threshold criterion for pH. The report reviews the current state of the Canadian aquatic ecosystem and evaluates the effect of SO₂ deposition on lakes using water chemistry models leading to specification of critical and target loadings. Models are also used to forecast the future condition of Canadian lakes based on 4 realistic SO₂ emission control scenarios. The rate of deterioration or recovery is also discussed and an evaluation of receptor migration (lake and stream liming) is presented. CA EV SC

The 1990 Canadian long-range transport of air pollutants and acid deposition assessment report, part 5 : terrestrial effects

Federal/Provincial Research and Monitoring Coordinating Committee ; edited by R.G. Pearson and K.E. Percy. Ottawa : The Committee, 1990. ii, 105 p. : ill., maps. Bibliogr. French ed. (*Rapport de 1990...terrestres*) : 91-04759/2.

MICROLOG 91-04758 2 fiche

This Canadian assessment document reviews the past 4 years of scientific effort to provide a basis for future decisions on continued research, monitoring, and control strategies and to facilitate evaluation of the efficacy of Canadian and international abatement programs. The 1990 assessment dealt with the levels of acidic wet deposition, ozone and associated pollutants that can be tolerated without significantly affecting the terrestrial environment; the improvements due to Canadian and/or US emission reduction scenarios which can be expected; and the risk of acidic wet deposition, ozone and associated pollutants changing the forest, causing hardwood decline, reducing agricultural production, and affecting terrestrial wildlife. An overview is also given of the monitoring systems in place, including surveys, soil sensitive mapping, remote sensing, early diagnosis, and biomonitoring. CA EV SC

1990 report on bridge deck waterproofing

by R.C. Evers. Toronto : Ministry of Transportation, Materials Information, Engineering Materials Office, 1990. i, 8 p. : ill. (Materials information report ; MI-144) CSI/ 55120.009. ISSN 1183-3866
MICROLOG 91-04072 1 fiche

In 1990, monitoring was conducted on the thickness of waterproofing membrane placed on bridges and the quality of the membrane. Membrane thickness is controlled by an end result specification which was introduced in 1986 and expanded in 1987 to include membrane quality. This report contains a summary of the data assembled, with comments on the level of compliance with specified tolerances. Comparison is also made to data of previous years, and problems with contract administration and improper compiling of forms are discussed.

1990 residential end use survey

for B.C. Hydro, West Kootenay Power, [and] BC Gas ; by Catherine Paull [and] Bruce A. Campbell. Vancouver, B.C. : Campbell Goodell Consultants Limited, 1991. vii, 63 p. ISBN 0-7726-1406-7
MICROLOG 91-06518 1 fiche

In order to provide baseline information for the estimation and projection of consumption of electricity and natural gas in the province of British Columbia, B.C. Hydro, B.C. Gas, West Kootenay Power, ICG Utilities Ltd, and the B.C. Ministry of Energy, Mines and Petroleum Resources require periodic surveys of the residential population. This document estimates saturation of specific end uses; identifies new market opportunities as well as opportunities for fuel substitution; estimates the sizes of customer segments developed in B.C. Hydro's internal quantitative studies and identifies variables for forecasting changes in these segments; and provides data for evaluating Power Smart Programs.

The 1991 educational technology inventory : an assessment of the current status at B.C. colleges and institutes

Victoria : Standing Committee on Educational Technology, 1991. 95 p. (Research report ; no. 1)
MICROLOG 91-06089 2 fiche

The Standing Committee on Educational Technology (SCOET) is mandated to assess and monitor technological capabilities and changes throughout B.C.'s colleges and institutions. The data in this report constitutes information gathered from inventory surveys on the present status of technological resources within the colleges and institutions of B.C., and to enable the province to maintain and plan development in this area. The report focused primarily on instructional technologies including computers and operating systems, specific software application packages, computer assisted instruction, and computer based training. However, it also surveyed the available technologies in other areas such as CD Rom players, videoconferencing, and other computer-dependent technologies in present use in post-secondary educational institutions in B.C.

1991-92 estimates, part I : the government expenditure plan

Canada. Dept. of Finance. Ottawa : Supply and Services Canada, Canadian Government Publishing Centre, 1991. 82, 92 p. : ill. *Bilingual (Budget des dépenses...du gouvernement)*. *CSI 21104.012*. ISBN 0-660-56383-5
MICROLOG 91-03342 2 fiche

The Estimates communicate to Parliament the level and nature of the federal government's spending plans for the coming fiscal year. Part I gives Parliament an overview and situates the Estimates in the context of the overall expenditure framework. It covers the policy sector resource envelopes which include the level of resources allocated for all elements of departmental activity and defines the resources earmarked for maintaining, developing and implementing policies and programs. Focuses also on person-years and presents an overall person-year summary. Presents totals for transfer payments, payments to Crown corporations and operating and capital expenditures. Also addresses items which represent investments requiring parliamentary approval.

1992 : impact de l'unification du marché européen : industrie de l'automobile

Ottawa : Affaires extérieures et commerce extérieur Canada, 1990. 51 p. Bibliogr.
MICROLOG 91-02528 1 fiche

L'objectif du programme du marché unique, ou d'Europe 1992 comme on l'appelle souvent, est d'achever l'élimination des obstacles au mouvement des marchandises, des services, des travailleurs et des capitaux entre les 12 Etats membres de la Communauté en vue de

créer un marché dynamique et à croissance rapide. Ce document se penche sur cette question et examine particulièrement les points suivants : le contexte et les tendances ; la conjoncture dans le secteur de l'automobile ; les répercussions sur le secteur canadien de l'automobile ; et, les stratégies et les plans d'action pour les sociétés canadiennes.

1992 : impact de l'unification du marché européen, première partie : conséquences pour l'Europe

Ottawa : Affaires extérieures et commerce extérieur Canada, 1991. xii, 179 p. : ill. Bibliogr. L'éd. anglaise (1992 : implications of a single...) : 91-02776/2. MICROLOG 91-05451 2 fiche

Ce rapport est le premier d'une série de plusieurs études portant sur les conséquences qu'aura au Canada le marché unique de la CE. Préparé par Business International, il traite plus particulièrement des conséquences pour l'Europe. Il consiste en deux parties: la première reprend les principaux changements législatifs qui sont en train de se produire en Europe et qui influenceront sur les politiques des gouvernements européens et sur le cadre des futures relations commerciales avec la CE. La deuxième partie est basée sur un sondage effectué auprès de 425 dirigeants de grandes sociétés européennes, nord-américaines et japonaises actives dans la Communauté européenne. Le résumé souligne les principales conclusions contenues dans le rapport. Il contient également un certain nombre de considérations générales dont les gens d'affaires canadiens devraient tenir compte au moment d'arrêter les stratégies (à la fois offensives et défensives) qu'ils adopteront face à la nouvelle Europe.

1992 : implications of a single European market, part 1 : effects on Europe

Ottawa : External Affairs and International Trade Canada, 1989. x, 163 p. : ill. Bibliogr. On cover: 1992, Canada, Europe. French ed. (1992 : impact de l'unification...) : 91-05451/2. MICROLOG 91-02776 2 fiche

This report is the first in a series examining the implications of the European Community single market for Canadians. The first part of the report outlines the main legislative changes taking place in Europe that will affect the policies of European governments and the framework for doing business in the European community. The second part is based on a survey of 425 executives of large European, North American and Japanese firms active in the European community. A special section identifies a number of broad considerations that

Canadian businesspersons should consider in defining their future strategies (both offensive and defensive) with respect to the new Europe.

1992 implications of a single European market : forestry products

Ottawa : External Affairs and International Trade Canada, 1990. 55 p. : ill. MICROLOG 91-01585 1 fiche

Canada is the world's largest exporter of forest products. The EC is Canada's second largest market for forest products after the U.S. The opportunities and risks posed by the EC's Single Market program, or Europe 1992 as it is often called, are clearly of considerable interest to Canadian producers. This report argues that the Single Market program will accelerate growth of the EC economy, and lead to increased demand for all categories of forest products.

1992 implications of a single European market : minerals and metals

Ottawa : External Affairs and International Trade Canada, 1990. 68 p. : ill. Bibliogr. MICROLOG 91-01584 1 fiche

This report is about the impact on the Canadian minerals and metals sector of the decision by the European Community to complete the development of a Single Market program. The report begins by describing the EC's net dependence on mineral imports, its attempts at achieving metal producing self-sufficiency, and the state of its trading relations, in minerals and metals, with Canada. It also assesses the impact of Europe 1992 on the EC minerals and metals sector, and then examines the implications Europe 1992 has for the Canadian minerals and metals sector. Finally, it evaluates the opportunities, risks, and strategies facing Canadian minerals and metals firms arising out of Europe 1992, in particular, and a changing competitive environment, in general.

2-D acousto-optic signal processors for simultaneous spectrum analysis and direction finding

by J.P.Y. Lee. Ottawa : Defence Research Establishment Ottawa, 1990. xix, 74 p. : ill. Bibliogr. (Report ; no. 1049) MICROLOG 91-02794 1 fiche

The increasing density and complexity of radar signals jeopardizes the capability of radar electronic support measures (ESM) systems in sorting out specific emitters only on the basis of conventional signal parameters. Therefore, the separation of radar emitters on the basis of their bearing or direction of arrival is of importance. This report presents a general formulation on the Fourier transforming configuration, then extends it from a 1-D acousto-optic spectrum analyzer to a 2-D configuration for simultaneous spectrum analysis and direction-of-arrival determination. The report describes and analyzes a linear antenna array configuration and a novel circular antenna array with a Butler matrix beamformer configuration, emphasizing the direction-finding characteristics of the two architectures. The effects of scaling factor, acoustic transducer height, Gaussian illumination profile, amplitude and phase tracking errors and RF input noise on the DOA pattern produced by each architecture are examined. Design criteria and examples on each architecture are given, and the two architectures are compared.

Aboriginal land claims issues

by W. Moss. Ottawa : Library of Parliament, Research Branch, 1990. 22 p. Bibliogr. (Background paper ; BP-237E) French ed. (Les Revendications territoriales autochtones) on the same fiche. ISBN 0-660-13911-1
MICROLOG 91-04886 1 fiche

Aboriginal land claims today involve much more than strictly legal questions about the collective property rights of aboriginal people. Aboriginal people assert that, in addition to outstanding land rights questions, a range of political rights issues have also remained unresolved since colonial times and have been largely ignored since Confederation. This paper describes specific claims policy, comprehensive claims policy, and the issues of claims policy such as distinguishing between specific and comprehensive claims, conflicts of interest, extinguishment of aboriginal title, aboriginal title 'superseded by law', and exclusion of self-government agreements from land claims agreements.

Absolute calibration of the Fourier Interferometric Transmissometer

by J.-M. Thériault and P.L. Roney. Ottawa : Defence Research Establishment Valcartier, 1988. vii, 22 p. : ill. Bibliogr. (DREV report ; 4511/88)
MICROLOG 91-00139 1 fiche

The design and the ultimate performance of many electro-optical systems used in defence applications can be strongly affected by atmospheric conditions. To estimate the performance under various atmospheric conditions, atmospheric transmission models need a data bank of accurate measurements of high spectral resolution transmission at long paths and over a wide range of atmospheric conditions. The most critical part of transmission measurements is the calibration of the system in absolute terms. This report addresses the calibration technique for the Fournier Interferometric Transmissometer (FIT). The report gives a brief description and presents a calibration technique which takes into account the quality of the source mirror optics by determining a quality factor. A technique devised for the determination of this quality factor, as well as preliminary results, are then discussed. Conclusions are drawn regarding the factors which affect the precision of the technique, and an estimate is made of the attainable accuracy.

Absorption of miscellaneous liquid wastes on sawdust

by A. Husain. Toronto : Ontario Hydro, Research Division, 1990. ii, 8 p. Bibliogr. (Report ; no. 90-206-K)
MICROLOG 91-04555 1 fiche

The existing radioactive incinerator does not permit the direct incineration of liquids, therefore liquid waste streams such as freon dry cleaning sludge are first absorbed on a solid media prior to incineration. This study examined the absorption of two liquid waste streams, the first an effluent (three drums full) from a super-compactor campaign conducted at Bruce Nuclear Power plant in late 1988 and the second freon sludge from routine dry cleaning operations. The solid media used was sawdust, based on an earlier study. Its capacity for both liquids was determined, and appropriate means for absorbing the liquids were investigated. A radio-chemical characterization of the super-compactor effluent was also performed.

Abundance and reproductive success of colonial waterbirds on Lake Winnipegosis, 1987-89

by B. McMahon and W. Koonz. Winnipeg : Manitoba Natural Resources, Wildlife Branch, Biological Services, 1990. v, 65 p. : ill. Bibliogr. (Manuscript report ; no. 91-02) MICROLOG 91-03929 1 fiche

Lake Winnipegosis contains the largest breeding population of cormorants in Manitoba and has a unique diversity of nesting colonial waterbird species. However, recent increases in the number of cormorants have been a growing cause of concern among commercial fishermen, who blame them for the decline in walleye in the lake. This study examines population estimates of colonial waterbird species nesting on Lake Winnipegosis from 1987-89. The diet of cormorants was examined in 1987 and 1988 and the diet of pelican was examined in 1989. The location of each species in a colony was mapped and man's impact on the reproductive success of pelicans and cormorants was also evaluated.

Abundance, age, size, sex and coded wire tag recoveries for chinook salmon escapements of Kitsumkalum River, 1987-88

by J. Carolisfeld...et al. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1990. viii, 54 p. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2074) ISSN 0706-6473 MICROLOG 91-03914 1 fiche

The Kitsumkalum River is a major tributary of the Skeena River located near Terrace, BC, and is one of the most important chinook salmon spawning streams on the northern coast. Total escapements of chinook salmon to Kitsumkalum River, escapement of coded wire tagged chinook and the contribution of hatchery production to the total escapement of chinook were estimated for 1987 and 1988. Escapements were estimated using the adjusted Petersen methods, by applying tags and opercular punches to live returning adults on the spawning grounds, and by recovering tagged and punched carcasses following spawning.

Abundance, migration timing and biological characteristics of sockeye salmon *Oncorhynchus nerka* returning to Henderson Lake, Vancouver Island during 1988

by P.J. Tschaplinski and K.D. Hyatt. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. iv, 82 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1758) ISSN 0706-6457 MICROLOG 91-03658 1 fiche

From 1980-87, 95 300 sockeye were collected annually from the spawning populations in the Henderson Lake system to determine their age, sex, and length distribution. The 1988 escapement studies estimated the numbers of sockeye spawning in the system and obtained representative samples of spawners to

accurately describe some of the biological characteristics of that population. This report details the procedures employed to determine the size of the sockeye spawning escapement to Henderson Lake and Clemens Creek and the length-frequency, age, and sex composition of the spawners. Separate population estimates were generated from simple visual counts of live and dead sockeye made at intervals on the spawning grounds from September to November; Petersen mark-recapture visual enumerations of colour-coded disc tags over the same months; and a spawner abundance curve calculated from visual counts of live spawners made during surveys combined with 3 independent estimates of mean spawner residence time. All estimates were evaluated for strengths and biases.

Depuis des années, l'abus des narcotiques et d'autres psychotropes constitue un sérieux problème social, médical et juridique, tant au Canada que sur la scène internationale. Ce bulletin porte sur l'utilisation et les effets, au Canada, des drogues illicites, en particulier le cannabis et la cocaïne. Il examine également l'étendue de l'usage des drogues illicites, ses effets sur notre société, et certaines mesures correctives qui ont été proposées. Vu la complexité de la question, le bulletin n'offre qu'un survol très restreint.

Les Accidents du travail et les maladies professionnelles, 1985-87

Ottawa : Travail Canada, 1990. 180 p. : ill. Bilingue (Employment injuries and occupational...). CSI 21114.002.
MICROLOG 91-06427 2 fiche

Les statistiques sur les accidents constituent un fondement objectif à partir duquel peut être

établi un bon programme de sécurité dont les résultats peuvent être évalués. Ce rapport diffère de la publication de 1981-1984 en ce sens qu'il comprend des statistiques visant toutes les administrations du Canada et d'autres statistiques servant à établir des comparaisons à l'échelle internationale. En principe, le rapport vise la période de 1978 à 1988, mais les périodes visant certaines rubriques peuvent différer en raison de l'absence de données récentes. Certains tableaux contiennent des renseignements visant une période de douze ans (de 1976 à 1987), ce qui donne une perspective un peu plus vaste du point de vue statistique.

Les Accords fiscaux entre le gouvernement fédéral et les provinces -- Rév.

par J.-D. Fréchette. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 20 p. Bibliogr. (Bulletin d'actualité ; 86-23F) L'éd. anglaise (Federal-provincial fiscal...) sur la même fiche. ISBN 0-660-93036-6
MICROLOG 91-02104 1 fiche

Dans l'ensemble des relations fédérales-provinciales, les accords fiscaux occupent une position névralgique, non seulement à cause de l'ampleur des ressources qui y sont consacrées, mais également parce qu'ils font intervenir en grande partie l'environnement économique du gouvernement fédéral et des provinces. Ce document examine les points suivants: le cadre historique; les accords

fiscaux de 1982 à 1987; la péréquation; les accords de perception fiscale; le financement des programmes établis; la Loi canadienne sur la santé; les accords fiscaux de 1987 à 1992. CA PA

par J.-D. Fréchette. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 19 p. Bibliogr. (Bulletin d'actualité ; 86-23F) L'éd. anglaise (*Federal-provincial fiscal arrangements*) sur la même fiche. Révisé le 18 novembre 1990. ISBN 0-660-93174-5 MICROLOG 91-04824 1 fiche

L'un des objectifs majeurs des accords fiscaux est d'assurer une certaine stabilité aux recettes provinciales, c'est-à-dire d'obtenir un équilibre financier entre les provinces de la fédération canadienne et à l'intérieur de chacune d'entre elles. Ce document examine la situation en examinant le cadre historique; les accords fiscaux de 1982 à 1987; la péréquation; les accords de perception fiscale; le financement des programmes établis; la Loi canadienne sur la santé; et, les accords de 1987 à 1992. Acid drainage from mine walls : the Main Zone Pit at Equity Silver Mines

by K.A. Morin. Victoria : British Columbia Acid Mine Drainage Task Force, 1990. vi, 109 p. : ill. Bibliogr. MICROLOG 91-00487 2 fiche

Study to examine acid drainage from open-pit mine walls in four stages, the first of which is a detailed literature review of acid generation and water movement in and near open pits with additional supporting literature from underground mines, and the second of which is a field study at Equity Silver Mines near Houston, B.C. The main pit zone at Equity is scheduled for decommissioning, with the nearby Southern Tail pit already decommissioned, filled with waste rock from the main zone pit, and flooded. Due to initial acidic conditions in the Southern Tail pit, there is concern over the potential for acidic water to accumulate in the main zone. The third stage is the development and application of a predictive model of acid drainage from mine walls during operation and after decommissioning, based on the results of the field study at Equity and the literature review, with predictive simulations limited to the main zone pit. The fourth stage is recommendations for draft criteria for the decommissioning of pits. BC EV NR PR PS SC

Summary of the 1987 results acquired from the Acidic Precipitation in Ontario Study (APIOS) daily precipitation sampling network. All data were screened for validity by checking each record for chemical analysis integrity and for outliers statistically by applying the Dixon Ratio test to the highest and lowest values observed in each region on a daily basis. Listings are given by station name and include station identification, daily precipitation chemistry listings, equivalent precipitation depth, observed sampling efficiency and field comments on conditions.

Acquired thermotolerance of jack pine, white spruce and black spruce seedlings

by R.S. Koppenaal, S.J. Colombo and E. Blumwald. Sault St. Marie, Ont. : Ministry of Natural Resources, Ontario Forest Research Institute ; Toronto : University of Toronto, Dept. of Botany, 1991. 9 p. : ill. *Bibliogr. In Tree Physiology : vol. 8, 1991.*
MICROLOG 91-06811 1 fiche

The acquired thermotolerance of first-year seedlings of jack pine hardened at 36C, 38C, 40C or 42C for 90, 180 or 360 minutes and of black spruce hardened at 34C, 36C, 38C or 40C for 30, 90, 180 or 360 minutes was determined by comparison of needle damage to that of non-hardened seedlings at 25C following exposure to temperatures of 49C and 47.5C respectively. The duration of increased thermotolerance was investigated in jack pine, black spruce and white spruce by comparing heat injury from high temperatures in non-hardened seedlings and in seedlings hardened at 38C for 180 minutes per day for either 1, 3 or 6 days.

Acquisition of study reports for literature review of horizontal wells and models for horizontal well injectors and producers, part 1

by S.M.F. Ali. Ottawa : Canada Centre for Mineral and Energy Technology, 1991. 54 p. : ill. *Bibliogr. CANMET contract: 23440-8-9231-02-SQ.*
MICROLOG 91-06117 1 fiche

Report on a project to develop numerical models of horizontal (meaning inclined in an arbitrary manner) steam injection and fluid production wells, which could be incorporated into a steam injection simulator. The numerical model of the steam injection well was to be able to predict steam pressure (temperature), quality and heat loss as functions of depth and time, for a given steam injection rate schedule. The three-phase horizontal wellbore model developed accounts for the flow of oil, water and gas in a well, with sections inclined at various angles, and allowing three-phase intake at various points along the length of the well.

An Action plan in response to the Government Policy on the Status of Women in Manitoba, phase II

Manitoba Women's Directorate. Winnipeg : The Directorate, 1991. 37 p. MICROLOG 91-05559 1 fiche

This document presents the Government's response to the following eight principles presented in the statement: abuse of women is unacceptable; discrimination against women, on the basis of sex, is unacceptable; the government and the community share a responsibility to provide protection and security for those who were, in the past, denied the opportunity to become secure and independent; women should enjoy equal access to a full range of career options and choices; women ought, as a matter of right, to enjoy equal access to and equal treatment within education at all levels; terms and conditions of employment and of participation in education should recognize the responsibilities for child rearing that parents share; women should have access to enhanced participation in decision-making; and government efforts to achieve the goals of this policy will be most effective if they are carried out in partnership with individual women and women's groups.

Activities affecting surface water resources : a general overview

prepared by Environment Canada, Inland Waters Directorate, Atlantic Region [and] P.E.I. Dept. of the Environment, Fish and Wildlife Branch. Ottawa : The Region ; Charlottetown : The Branch, 1990. vii, 64 p. : ill., maps. Bibliogr. At head of title: *The Canada-Prince Edward Island Water Management Agreement, Surface Water Agreement*.
MICROLOG 91-00646 1 fiche

In November 1987, P.E.I. signed a federal-provincial work-sharing arrangement on water resource management focusing on groundwater pollution, surface water degradation and estuarine eutrophication. The surface water program was designed to identify current surface water uses and users within 12 major watersheds across the Island containing 26 individual rivers, as well as problems arising due to practices that degrade the quality of surface water and restricts its value to other user groups. This report presents a general overview of the program, covering the general characteristics of the Island; operations in agriculture, fish and wildlife, forestry, recreation, fisheries, and industry; alterations of natural features of waterways; wetlands; additional watershed activities such as hydrometric stations and subdivision development; and activities affecting surface water resources such as sedimentation sources, pollution point sources and instream obstructions.

Addendum to health implications of exposure of underground mine workers to diesel exhaust emissions

Ian W. French and Associates. Scarborough, Ont. : The Associates, 1990. 152 p. : ill. Bibliogr. CANMET contract: 79042-01-SQ. MICROLOG 91-00730 2 fiche

In April 1984, an update was published to a 1979 review of the world literature on the health implications of exposure of underground mine workers to diesel exhaust. Since that time, a number of additional relevant toxicity, carcinogenicity and mutagenicity trials have been reported in the literature and a considerable volume of analytical data on the polycyclic aromatic content of diesel exhaust and their identification as possible carcinogenic components of exhaust has been reported. This report reviews the details of these newly published studies and evaluates their significance to the potential health effects of diesel exhaust on underground mine workers, particularly as it is related to the air quality index and the need for a revision of this index. • CA CM EV LA NR SC

the duties undertaken by each branch and gives statistical summaries of caseloads (by type of treatment) handled during the year. AP BS HE PR SA ST

Additional perspectives on the college system : background papers

Ontario Council of Regents for Colleges of Applied Arts and Technology. Vision 2000. Toronto : The Council, 1990. vi, 125 p. Bibliogr. MICROLOG 91-00163 2 fiche

Vision 2000 is a review of the mandate of Ontario's Colleges of Applied Arts and Technology. These background papers focus on the following issues: Vision franco-ontarienne de l'avenir des collèges; the College's impact on the local economy; a case study of Elliot Lake; Models for increased private sector financing of trading and labour market development; and Perceptions of the colleges of applied arts and technology. It also contains a Vision 2000 Alumni Focus Group Summary Report. ED ON PR

Addressing the human dimension in nutrition sciences, agroindustries, and international agricultural research

by R.H. Young. Ottawa : International Development Research Centre, 1991. viii, 48 p. : ill. Bibliogr. (Manuscript report ; 285e) ISBN 0-88936-576-8 MICROLOG 91-03901 1 fiche (Available on fiche only)

Procedures to preserve food have been used for over 100,000 years; yet only in the last 100-150 years have the processes been elucidated. Systematic efforts by food and nutrition scientists have increased understanding and control over food beyond the farm gate. In developing countries, however, would-be improvements must be predicated on a systems approach if the effects of modifying part of the system are to be anticipated. The main component of the system is people. This document focuses on the topics of agribusiness and people; agroindustries and postharvest systems; progress and needs in postharvest research in developing countries; palatability and consumer acceptance; market research in the development context; community participation and rural systems research; and the role of international agricultural research centres, and regional and national programs. AG CA EX HE SC

Addressing your housing needs : how can we help you better? The rural and Native housing consultation paper

Ottawa : Canada Mortgage and Housing Corporation, 1990. 22, 22 p. Bilingual (Vos besoins de logement...). MICROLOG 91-04460 1 fiche

This paper presents government efforts to meet the shelter needs of rural low-income off-reserve Native and non-Native households. The purpose of the paper is to ask interested parties specific questions concerning rural housing assistance, in order to provide a sound basis upon which future policy and programs in this area can be developed. L'Administration fédérale du Canada, 1990

Ottawa : Groupe Communication Canada ; Chambre de commerce du Canada, 1990. viii, 442 p. : ill., carte pliante. L'éd. anglaise (Organization of the Government...) : 91-01056/5. ISSN 0576-1409 ISBN 0-660-92997-X. MICROLOG 91-01055 5 fiche

Cet ouvrage constitue un guide de référence utile sur l'organisation du gouvernement fédéral. Un organigramme placé à la fin du guide présente les rapports entre les différents ministères et organismes. Y figurent également tous les ministères, organismes et sociétés d'Etat dont il est question dans la Loi sur la gestion des finances publiques, le Budget des dépenses et la Loi sur les relations de travail dans la fonction publique, ainsi qu'un certain nombre d'organismes d'intérêt. Cette version de l'ouvrage est divisée en quatre grandes parties: la Souveraine, le pouvoir législatif, le pouvoir judiciaire et le pouvoir exécutif. Tous les ministères et organismes sont présentés de la même façon. Afin de rendre ces organismes plus accessibles, les numéros de téléphone de chacun d'eux ont également été inclus. Finalement, le numéro de téléphone de nombreux bureaux régionaux est également fourni.

Advanced technology in Alberta : special advanced technology report and index

published by Interwest Publications Inc. ; in co-operation with Alberta Technology, Research and Telecommunications...et al. Edmonton : Interwest Publications Ltd., 1991. 112 p. : ill. MICROLOG 91-06158 2 fiche

This pamphlet gives an overview of high-technology industries in Alberta and their development, as well as plans for the future. The pamphlet also includes a description of those agencies used to develop the high-tech option, such as the Alberta Research Council, the Alberta Telecommunications Research Centre, the Alberta Laser Institute, the Alberta Microelectronics Centre, and the Alberta Heritage Foundation for Medical Research. The transition from laboratory to market through the universities is described, as is the development of such high-tech companies from an idea to an actuality, helped by various government incentives. Specific sectors, such as telecommunications, electronics, lasers, space technology, computer technology, and biotechnology, are detailed. An alphabetical index of companies, with their characteristics, is also included.

Adverse selection in insurance markets : a selective survey

by G. Dionne and N. Doherty. Montreal : Université de Montréal, Centre de recherche sur les transports ; Département des sciences économiques, 1991. 56 p. : ill. Bibliogr. (Publication ; no. 758) (Cahier ; 9105)
MICROLOG 91-02548 1 fiche

This survey presents the results in the literature on adverse selection in insurance markets. Section 1 discusses the monopoly model introduced by Stiglitz for single-period contracts and extended by many authors to the multi-period case. Multi-period contracts are discussed in detail: time horizon, discounting, commitment of the parties, contract renegotiation, and accident underreporting. Section 2 covers the literature on competitive contracts. A short conclusion summarizes the main results in recent literature and discusses some avenues of future research.

Aerial application of high dosages of nuclear polyhedrosis virus to early instar spruce budworm *Choristoneura fumiferana* (Clem.)

by W.J. Kaupp, J.C. Cunningham and B.L. Cadogan. Sault Ste. Marie, Ont. : Forestry Canada, Forest Pest Management Institute, 1989. 9, 10 p. : ill. Bibliogr. (Information report ; FPM-X-85) *Bilingual (Pulvérisations aériennes à hautes...)*. ISSN 0833-5540 ISBN 0-662-58314-0
MICROLOG 91-05862 1 fiche

Evidence from the application of nuclear polyhedrosis virus (NPV) indicates that while NPV establishes itself in the treated population, it does not spread beyond the immediate area and does not carry over from one year to the next. Natural NPV appears to be present in very large concentrations which possibly affect both the epizootic potential and the persistence in other years. This report presents the results of early treatment of instar spruce budworm with substantial dosages of NPV at emergence and again at budflush in an attempt to create a disease epizootic to provide some degree of population reduction and foliage protection.

Aerial application of Virtuss, a nuclear polyhedrosis virus against whitemarked tussock moth larvae in Newfoundland in 1987

by R.J. West, W.J. Kaupp and J.C. Cunningham. St. John's : Canadian Forestry Service, Newfoundland Forestry Centre, 1989. ii, 10 p. Bibliogr. (Information report ; N-X-270) ISSN 0704-7657 ISBN 0-662-17397-X
MICROLOG 91-05386 1 fiche

The whitemarked tussock moth sporadically infests coniferous plantations in eastern North America. High populations can defoliate eastern larch, spruce and balsam fir and the larvae can cause skin rashes on some individual humans. The efficiency of a ground spray application of Virtuss on larvae was assessed in an infested area of the Bottom Brook Valley in western Newfoundland in 1986. The infestation continued in 1987 in an area about 7 km from the 1986 ground application, presenting an opportunity to test the aerial application of Virtuss. This report presents the results of the 1987 aerial spraying.

Aerial surveys of migratory birds on the Fraser River Delta, 1989-90

by R.W. McKelvey and K.R. Summers. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1990. vi, 73 p. : ill. Bibliogr. (Technical report series ; no. 109) ISSN 0831-6481 ISBN 0-662-18243-X MICROLOG 91-02179 1 fiche

The delta and estuary of the Fraser River, B.C. is one of the most important wintering habitats for migratory birds in Canada. It is also adjacent to a large and growing human population which has resulted in the loss of considerable wetland habitat. This study is part of a long-term program to monitor trends of waterfowl populations wintering in Boundary Bay and on the Fraser River foreshore, or collectively, the Fraser River estuary. This report presents the results of the 1989-90 survey, and compares it with those seen between 1966-74, 1982-83 and 1983-84. Trends are also compared with those of the Pacific flyway midwinter waterfowl survey. Sixteen aerial surveys were flown between mid-October 1989 and mid-January 1990, timed to coincide with the waterfowl hunting season in southern B.C.

An Aerospace strategy for British Columbia : opportunities for aerospace industry development in British Columbia

by G. Wright. Victoria : Ministry of Development, Trade and Tourism, 1991. 22 p. ISBN 0-7726-1405-5 MICROLOG 91-06870 1 fiche

At the direction of the Premier's Economic Advisory Council, and in consultation with the Aerospace Industries Committee of the British Columbia Aviation Council and responsible agencies and ministries, the province has evaluated the options, strategies and opportunities to promote the development of the aerospace industry in B.C. This document describes the international and national aerospace industry, presents an assessment of the industry in BC, discusses the issues affecting it, and provides recommendations. The BC industry is assessed in relation to the current aerospace manufacturing industry, human resources, current space technology, and its development of niche capabilities for maintenance and overhaul and airframe modification. Issues addressed include critical mass and depth of capabilities, provincial government commitment, collaboration with the federal government, and investment options.

Age-sex structure and reproductive capacity of the Pacific walrus population

by G.A. Fedoseyev and V.N. Goltsev. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1990. 11 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5503) Originally published in Russian. ISSN 0704-3716 MICROLOG 91-00992 1 fiche

Extensive exploitation of the walrus in the 19th and early 20th centuries have greatly diminished its numbers, to the point where the species needs protection to restore population levels. Although hunting has been banned in both the USSR and abroad, it is still a main food source for the native population, leading to continuing downward pressure on the herds and the control of harvesting. This paper characterizes the age-sex structure, reproductive capacity and differentiation of the Pacific walrus population. It is based on observations carried out at the ice rookeries and coastal hauling-out grounds in the Bering and Chukchi Seas, as well as material on the age composition of walrus takes (teeth from 541 animals, collected in the autumn of 1964), and data from the literature.

The Agency for Cultural and Technical Cooperation : meeting new challenges -- Rev.

by F. Coulombe. Ottawa : Library of Parliament, Research Branch, 1990. 13 p. Bibliogr. (Current issue review ; 88-5E) French ed. (*L'Agence de coopération...*) on the same fiche. ISBN 0-660-13709-7
MICROLOG 91-02087 1 fiche

This current issues paper begins with a review of the key characteristics and activities of the Agency for Cultural and Technical Cooperation (ACCT), an intergovernmental organization among French-speaking nations. It examines the various stages of reform ACCT has undergone and highlights its role in the interplay of Francophone institutions. A chronology and bibliography complete the paper.
CA CU EX

by F. Coulombe. Ottawa : Library of Parliament, Research Branch, 1990. 13 p. Bibliogr. (Current issue review ; 88-5E) French ed. (*L'Agence de coopération culturelle...*) on the same fiche. Revised September 1990. ISBN 0-660-13891-3
MICROLOG 91-04808 1 fiche

Created in 1970, the Agency for Cultural and Technical Cooperation (ACCT) is the only intergovernmental organization in the French-speaking world founded on a convention. However, the context in which the development of the Agency takes place changed considerably after the first Francophone Summit in Paris in February 1986. This paper reviews ACCT's key characteristics, and summarizes its activities. It also examines the various stages of its reform and highlights the role it is called upon to play in the new dynamic of Francophone institutions.

Aggregate resources inventory of Collingwood Township, Grey County

Ontario Geological Survey. Engineering and Terrain Geology Section. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1991. vi, 50 p. : ill., maps. Bibliogr. (Ontario Geological Survey aggregate resources inventory paper ; 87) Fold. maps not filmed. ISSN 0708-2061 ISBN 0-7743-6475-0
MICROLOG 91-03530 1 fiche

As part of the Aggregate Resources Inventory Program for townships, Collingwood Township was inventoried and evaluated for aggregate potential. This report includes an assessment of sand and gravel resources as well as a discussion on the potential of bedrock-derived aggregate. Methods include the interpretation of published geological data such as bedrock and surficial geology maps and reports, and field examination of potential resource areas. The field data are supplemented by pit information which includes field estimates of the depth, composition, and workability of deposits, as well as laboratory analyses of the physical properties and chemical suitability of the aggregate.

Aggregate truck on-board weighing experiment

by W.R.J. Mercer and J.R. Billing. Downsview, Ont. : Ministry of Transportation, Transportation Technology and Energy Branch, 1991. iv, 30 p. : ill. Bibliogr. MICROLOG 91-05406 1 fiche

Aggregate carriers are concerned that it is difficult to load trucks close to their allowable gross weight while not exceeding the allowable axle weights. A limited experiment was designed to assess whether a fifth wheel on-board scale could assist the driver of an aggregate truck to determine whether the truck's axle weights conformed to provincial axle weight law. The experiment would provide on-board scale system costs, installation and calibration time, and accuracy. The time allowed for the experiment was insufficient to establish long-term reliability of maintenance costs of the scales and no aggregate producer or carrier was prepared to consider re-distribution of load in the case where the truck was found to be out of compliance with provincial axle weight law.

Aging of large size FRP/epoxy adhesive bonds aged under water and vacuum : interim report following nine months aging

by R.J. Lewak. Toronto : Ontario Hydro, Research Division, 1990. iv, 31 p. : ill. (Report ; no. 90-92-K)
MICROLOG 91-04559 1 fiche

This program was undertaken to determine if the degradation rate of larger bond areas is similar to that of the small specimen areas, if there is a relation between bond degradation and the ratio of bond area to circumference, and whether the degradation rate reaches a limiting value over a time period. Tensile bond strength specimens of FRP and Epoxy F were manufactured with 3 different bond areas, two of which are significantly larger than the bond area of the previous test program. The specimens were aged under vacuum and water conditions and then tensile tested after aging periods of 0, 3, 6 and 9 months.

Agricultural research and the rural poor : a review of social science analysis

by S. Biggs and J. Farrington. Ottawa : International Development Research Centre, 1991. x, 139 p. : ill. Bibliogr. (Manuscript report ; 280e) ISBN 0-88936-573-3
MICROLOG 91-06222 2 fiche (Available on fiche only)

Review of recent trends in social science analysis of agricultural research, identifying gaps in research and outlining areas of high potential payoff to future research. The major themes treated in the evolution of theory on the generation and diffusion of agricultural technology since the 1950s are reviewed. A framework is constructed for setting research priorities, including historical, technological, and institutional dimensions. Examples in applying the framework are given and areas of high future payoff are identified. An extensive bibliography, arranged by theme, is also included.

Agriculture Canada's submission to the Northern Diseased Bison Assessment Panel

Canada. Agriculture Canada. Ottawa : The Dept., 1989. 96 p. Bibliogr.
MICROLOG 91-06258 2 fiche

The introduction of plains bison into Wood Buffalo National Park in the 1920s resulted in a general hybridization of the bison as well as introduction of bovine tuberculosis and probably brucellosis. Since in recent years mixed agriculture has moved closer to the park, there is a danger that one or both of the diseases, which have been eradicated in domestic animals, will be transmitted to them. A panel was established to hear alternate means of dealing with the problem. This submission from Agriculture Canada describes its proposed course of action, including the management of diseased bison, the prevention of social and environmental problems, and the advantages and disadvantages of their plan. In addition, there is a critique of alternate means of separating the bison from domestic herds and a summary of the etiology of the diseases.

Air quality data summary : Regional Municipality of Waterloo and the County of Wellington, 1988

prepared for West Central Region, Ontario Ministry of the Environment ; by F. Dobroff.

Toronto : Environment Ontario, 1990. iv, 42 p. : ill., maps. ISSN 0840-7843
MICROLOG 91-01109 1 fiche

Summary of the results of air monitoring in the Regional Municipality of Waterloo and the County of Wellington in 1988. This report describes the monitoring network and the pollutants measured, as well as giving data for Ayr, Breslau, Guelph, Kitchener/Waterloo and Puslinch Township. Gases measured include sulphur dioxide, carbon monoxide, ozone and oxides of nitrogen. Particulates measured include dustfall and total suspended particulates. Measurements were used in a soiling index, an air pollution index, and an air quality index.

Air quality in intercity coaches

by Delcan Corporation ; in association with TES Limited, and Concord Scientific Corporation ; Pierre de Gagné, Ed Slood, and Marilyn Eaman. Montreal : Transportation Development Centre, 1990. xviii, 204 p. : ill. Bibliogr.
MICROLOG 91-02505 3 fiche

Air quality is an important factor in passenger comfort and customer satisfaction in intercity coaches. This research studied the problems relating to air distribution and air cleanliness in conventional Canadian coaches and assessed the existing comfort levels of passengers. The interior aerodynamics of conventional coaches were characterized by measuring distribution of outdoor air and recycled air; ambient flow velocities and ventilation system volume flow rates; air-flow patterns in the passenger compartment, including an investigation of the effects of passenger occupancy, highway speeds and the driver's air conditioning system and window; temperature distributions in the coach during heating and cooling; particle residence times for pollutants located at various positions in the coach; and air concentrations of cigarette smoke near the source, in the supply air, and in the exhaust air. Respirable particulate, carbon dioxide, temperature and relative humidity were monitored during normal intercity operation on smoking and non-smoking runs.

Air quality survey, suspended particulates : Town of Drayton Valley, September 1 to November 29, 1990

Alberta. Air Assessment Section. Edmonton : The Section, 1991. xiii, 64 p. : ill. Bibliogr. MICROLOG 91-05302 1 fiche

Alberta Environment has received complaints about wood and ash particulate fallout from residents of Drayton Valley since June 1987. In response to these complaints, suspended particulate monitoring programs were conducted in the fall of 1989 and 1990. This report presents the results of the monitoring program in the fall of 1990, including a description of the monitoring program. Sampling was conducted for total suspended particulates, benzo(a)pyrene, elemental carbon, inhalable particulates, and total dustfall.

Airside Development Project : environmental impact statement summary

Ottawa : Transport Canada, Airports, 1991. 33 p. : maps. MICROLOG 91-04151 1 fiche

Lester B. Pearson International Airport is Canada's busiest and most important air transportation facility. Between 1984 and 1988 aircraft movements grew by over 35 per cent. This growth, coupled with a continued lack of consensus on airside infrastructure expansions, led to congestion and delay problems. Transport Canada introduced a number of short term measures to manage the demand but recognized that a more permanent solution was required. Potential environmental impacts were recognized in the strategy that was developed, and a formal review through the Environmental Assessment and Review Process was begun which resulted in the establishment of guidelines for the preparation of an Environmental Impact Statement (EIS). This document offers an overview of the EIS.

MICROLOG 91-02284 1 fiche

During the week of September 24-28, 1990, Alberta Economic Development and Trade conducted its semi-annual survey of private sector forecasters. The survey attempts to identify a 'consensus forecast' for the global, North American, and Alberta economies for the next two years. This business outlook is based on the results of this survey, and on an in-depth analysis of the recent performance and

emerging trends in key sectors of the Alberta economy.

Alberta Cancer Board : Annual report 1987-88

Edmonton : The Board, 1988. 48 p. : ill.
CSI 35218.001.
MICROLOG 91-00975 1 fiche

The Board coordinates cancer care services and provides the resources necessary for quality care through patient care, education, research and prevention, and maintenance of the Alberta Cancer Registry. The annual report reviews 3 caseloads of cancer treatments and patients. Two centres are also featured: the Tom Baker Cancer Centre in Calgary; and the Cross Cancer Institute in Edmonton. A few of the people who worked with the cases talk about what they do and what they have seen happen to people with cancer. Day care, pediatrics, psychosocial care, and palliative care, and activities in education, research, epidemiology, and cancer prevention, are all discussed.

Alberta mobile home park comparison tax study

Edmonton : Alberta Municipal Affairs, Assessment Standards Branch, 1989. 79 p. : ill., maps.
MICROLOG 91-01373 1 fiche

The objective of this study is to investigate, determine, and compare total tax and license revenues paid to a municipality from a mobile home park subdivision versus the total tax revenues received from a comparable residential subdivision. The basis of comparison are as follows: equal size in areas of subdivisions; equal age of subdivision developments; equal age of structure; residential subdivision to contain conventional housing of approximately 1000 square feet, or equivalent in size to most mobile homes; mobile homes in park to be of Class 1 quality; and mobile home park to be 'B Class' custom quality for site valuations, comparable to residential subdivision services.

Alberta residential building products

HLA Consultants. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1990. xiv, 239 p. Bibliogr. ISBN 0-88654-301-0
MICROLOG 91-02798 3 fiche

This study was undertaken to identify and classify all building products utilized in wood frame residential construction in Alberta; identify and inventory Alberta manufacturers of these products; quantify Alberta production and usage; and identify potential products with further manufacturing potential in Alberta. It notes changes which have occurred since a similar study in 1985. Building products were first identified, using a typical house and a 24-unit apartment building as examples. Manufacturers of the products involved were then sent a questionnaire inquiring about product levels and operational particulars. Other product information was obtained through various government agencies. The supply and demand information was then amalgamated to produce an indication of where product surpluses and shortages exist.

Alberta's wetlands : water in the bank!

by R. Usher and J. Scarth. Edmonton : Environment Council of Alberta, 1990. 45 p. : ill. Bibliogr.
MICROLOG 91-01382 1 fiche

One of a series of discussion papers developed to provide background information for drafting a conversation strategy for Alberta.

This paper demonstrates the importance of wetlands by first defining the nature, location and benefits of wetland functions and then describing the current activities of the various sectors of the society and economy that contribute to wetland loss. The paper also attempts to further the goal of achieving sustainable use of the wetlands by surveying existing wetland evaluation techniques and the main legislative regimes that affect wetlands. Recommendations are included.

An Algorithm for bottom window echo processing

by R. Shotton. Halifax : Dept. of Fisheries and Oceans, Program Coordination and Economics Branch, 1991. vi, 12 p. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2113) ISSN 0706-6473
MICROLOG 91-05684 1 fiche

Acoustic data that are used to assess fish stock abundance must be filtered to ensure that echoes from the seafloor (lost bottom) or from excessive density of fish (false bottom) are not attributed to fish, causing errors in fish abundance estimates. This report describes a processing algorithm which detects the occurrence of lost and false bottoms. The algorithm allows the operator to carefully consider the consequences of 'bottom window' correction to ensure that the program parameters remain valid for the situation that is being corrected.

An Algorithm for network dimensioning under reliability consideration -- Rev.

by B. Sanso, M. Gendreau and F. Soumis. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 17 p. Bibliogr. (Publication ; no. 736)
MICROLOG 91-00964 1 fiche

This paper introduces a new methodology to adjust link capacities in circuit switched networks, taking into account the costing policy and reliability considerations. This methodology, which is an extension of previous work on reliability evaluation using routing models, is based on a cyclic decomposition algorithm which alternates between a routing subproblem and a link capacity adjustment subproblem. The proposed procedure, which is shown to converge to a global optimum for the dimensioning-routing problem, was tested on a 14 undirected arc problem for various levels of link failure probability.

The American elk and meningeal worm : Do elk survive it? Can they transmit it? Can we detect it? Final report

by W. Samuel. Regina : Saskatchewan Agriculture Development Fund, 1990. 23 p.
ISSN 0829-9455
MICROLOG 91-01886 1 fiche

Meningeal (or brain) worm is a normal, very prevalent, and non-pathogenic parasite of whitetailed deer of eastern North America. In Canada, it has been reported from deer in western Manitoba but is not known farther west. It produces no ill-effects in whitetails, but does produce an often fatal neurologic disease in many other species of mammals. Ten captive elk were experimentally infected with low (15 larvae) or high (300 larvae) doses of the parasite during the winter and spring of 1989 to determine if elk are so susceptible to neurologic disease caused by the parasite that all infected animals die, and to determine if meningeal worm can develop normally in elk to the point where adult worms shed juvenile parasites in elk feces, thus completing the cycle as it appears in whitetailed deer. The research was conducted to determine the potential of importing the parasite from eastern North America with elk by game ranchers.

Ammoniation : chaff and other agricultural products

by J.A. Kernan and J. Knipfel. Regina : Saskatchewan Agriculture Development Fund, 1990. 10 p. : ill. ISBN 0-88656-507-3
MICROLOG 91-00914 1 fiche

Ammoniation is a method of treating low-quality hay and crop residues such as straw and chaff to improve their nutritional value as food for ruminant animals. This pamphlet describes the process, the reasons for ammoniating chaff, recommendations for treatment, methods of treating chaff, formulating the ration for cows, collecting the chaff, and the costs and benefits of the treatment. A short description of the method of ammoniating bales of straw or low quality hay, and safety considerations, is also given.
AG MS PR SC

Ammoniation of chaff and straw : final report

by J.J. Armstrong. Regina : Agriculture Development Fund, 1990. 5 p.
MICROLOG 91-01723 1 fiche

This project was conducted to demonstrate the application of anhydrous ammonia to chaff and cereal straw to create an economical feedstuff for wintering beef cattle in northern Saskatchewan, where traditional forage yields are drastically reduced by drought. The first stack of 65 wheat straw and barley straw bales were piled together, covered with black plastic, and anhydrous ammonia was pumped into the stack at 3.5% of dry matter weight. A second stack of 75 tons of wheat and barley chaff was treated with water and anhydrous ammonia and left uncovered. A third uncovered pile of 450 tons of canola screenings, which were heating, were treated with the ammonia to stop the heating. This report presents the results of these 3 experiments.

AMO financial survey descriptive report : impact of provincial and federal policies on 1989 and 1990 municipal budgets

Toronto : Association of Municipalities of Ontario, 1990. ii, 66 p. : maps. (AMO report : report series 1990)
MICROLOG 91-00051 1 fiche (Available on fiche only)

In May of 1989, AMO surveyed Ontario municipalities in order to understand better the effect of recent provincial and federal programs on the municipal budget. The survey was mailed to some 700 municipalities across Ontario, and the response rate was near 10 percent. This report of the survey results is organized into nine sections. Sections one through eight discuss the different program categories used in the survey. Each section is comprised of two series of discussions. The general discussion includes an analysis of each question in the survey. The regional discussion analyses the geographic impact of the aggregated program costs. It combines maps with regional data tables to help analyze the regional impacts of each program. It also

discusses the aggregated data at both the current and projected levels. Section nine summarizes the survey results.

Analyse de l'industrie de la construction au Québec en 1989

Québec : Commission de la construction du Québec, Service recherche et organisation, 1990. 96 p. CSI 67148.003. ISSN 0317-5901 ISBN 2-551-12434-4
MICROLOG 91-03204 2 fiche

L'analyse de ces informations permet de tracer un portrait de l'activité sur les chantiers et de la population qui y oeuvre. Ainsi, les données contenues dans ce document posent un diagnostic sur l'état général de l'industrie de la construction en 1989, dans l'ensemble du Québec et chacune des régions. Il présente d'abord les principaux indicateurs économiques de l'industrie ainsi que les faits saillants survenus au cours de l'année en matière de relations du travail; il étudie les principales caractéristiques des employeurs; et, se penche sur la question des salariés assujettis au Décret de la construction. Finalement, les quatre annexes qui complètent ce document fournissent, non seulement certaines définitions nécessaires à son interprétation, mais aussi près de 40 tableaux statistiques

complémentaires à ceux inclus dans le texte.

Analyse des bénéfices sociaux à la suite de l'amélioration d'une route entre deux régions

par P.A.F. Galvan. Montréal : Université de Montréal, Centre de recherche sur les transports, 1990. 42 p. : ill. Bibliogr. (Publication ; no. 725)
MICROLOG 91-01575 1 fiche

Ce mémoire traite de la mesure des bénéfices sociaux à la suite de la réfection d'une route entre deux régions, lorsqu'on tient compte de manière explicite du temps de déplacement. Il formule une extension à leurs études en introduisant de manière explicite la variable temps de transport dans l'analyse de la demande et de l'offre de transport. Pour ce faire, il inclut le temps de transport de façon explicite dans les fonctions de demande et d'offre. De plus, il ajoute les courbes volume-délais afin de pouvoir déterminer la valeur d'équilibre du temps de transport. Il montre, finalement, comment des ajouts modifient le calcul des bénéfices sociaux à la suite d'améliorations du réseau routier.

(Canadian contractor report of hydrography and ocean sciences ; no. 39) ISSN 0711-6748
MICROLOG 91-05057 2 fiche

During the summer of 1980, an extensive physical oceanographic survey was carried out on the Labrador continental shelf and slope for Petro-Canada. The measurements, consisting of

11 current meter moorings and 10 lines of CTD stations, covered the length of the Labrador coastline, from just south of Hudson Strait to the entrance of the Strait of Belle Isle. The bulk of the measurements were concentrated in the south-central portion of the shelf, between Makkovik and Hamilton Banks. This report contains the results of an analysis of the data set, which was begun after completion of the basic data processing was complete. The report includes a description of the major features of the mean circulation, the temporal and spatial variability of the flow, and the properties, distribution and movement of the major water masses in the area. Some processes which may be partly responsible for the observed variability are tentatively identified. Time series plots, bivariate distributions, tidal analysis and auto- and cross-spectra of the current meter records, along with vertical and horizontal sectional plots of water properties, are presented in the appendices.

Analysis of side-scan sonar images of a high-reflectivity target

by J.M. Preston, et al. Victoria : Defence Research Establishment Pacific, 1988. iii, 22 p. : ill. Bibliogr. (DREP technical memorandum ; 88-26)
MICROLOG 91-00064 1 fiche

Side-scan sonars deployed on towfish are a valued tool for imaging the sea bottom. This paper describes some recent observations in the practical effects of sidelobes and the effects of towfish attitude on the image. The images analyzed are of corner-cube reflectors, which give a very strong reflection visible over a wide range of angles. The internal structure of this reflection can be studied to investigate the beam pattern. It was also possible, in this case, to see an effect of towfish yaw.

Analysis of the results of a survey of heavy-truck brakes

by W. Ng. Ottawa : Transport Canada, Road Safety, 1988. vii, 79 p. : ill. Bibliogr. French ed. (*Analyse des résultats...*) : 91-02940/1.
MICROLOG 91-02939 1 fiche

This report analyzes the results of a survey of heavy-truck brakes which took place in Canada in 1986. The survey, conducted at 11 weigh stations in seven provinces, consisted of brake inspection and driver interviews. A total of 1511 vehicles were inspected. The report presents the fitment rates of front-axle brakes and automatic slack adjusters, and the condition of all the brakes inspected. Driver preferences and opinions regarding the use of front-axle brakes are also reported.

An Analysis of the sawmill and planing mill industry of Newfoundland

by P.M. Trelawny. St. John's : Forest Resource Development Agreement, 1990. ix, 56 p. : ill. Bibliogr. (FRDA report ; 005) ISSN 0840-7673 ISBN 0-662-17709-6
MICROLOG 91-05387 1 fiche

Analysis of the technical and economic aspects of Newfoundland's sawmill and planing mill industry and identification of problems within the industry. The analysis is based on the structure, conduct and performance methodology, that the structure of an industry influences the conduct of the operators of the firms within the industry, who in turn influence the performance of the industry. Data used is based primarily on a survey of the operators of sawmills and planing mills in Newfoundland conducted by Forestry Canada during the

summer and fall of 1988.

Analyzing for climatological information in the Long Term Temperature Monitoring Program sea temperature time series

by R.H. Loucks Oceanology Limited, Discovery Consultants Limited and B. Petrie. Dartmouth, N.S. : Bedford Institute of Oceanography ; Dept. of Fisheries and Oceans, Scotia-Fundy Region, Physical and Chemical Sciences Branch, 1991. viii, 209 p. : ill. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 132) ISSN 0711-6764
MICROLOG 91-06353 3 fiche

The long-term temperature monitoring program has produced nearshore temperature time series from a variety of sites in Atlantic Canada since 1967. In this study, these data were re-edited and summarized in time and space to monthly averages over 35 unit areas corresponding to inshore fishing zones from northern Newfoundland through the Gulf of St. Lawrence to the Bay of Fundy, each separated into shallow (depth less than 12m) and deep (depth more than 12m) ranges. The time series of monthly temperatures were then used to derive monthly mean temperatures, variance and anomalies; to determine the correspondence with sea-surface temperature climatology for patterns of variance; and for spatial scales of correlation.

The Anglican Church and the world of western Canada, 1820-1970

edited by Barry Ferguson. Regina : University

of Regina, Canadian Plains Research Center, 1991. vii, 193 p. Bibliogr. (Canadian plains proceedings ; no. 21) *Proceedings of the conference 'The Role of the Anglican Church in Western Canadian History'*. ISSN 0317-6401 ISBN 0-88977-063-8
MICROLOG 91-07090 3 fiche (Available on fiche only)

These essays study the Anglican church and its missions in western Canada from a position that challenges received scholarly opinion both among church and secular historians about the role of the Anglican church at Red River, within Manitoba society, among the Native and non-Native populations, and over the place of women in the church. They constitute a bridge between church and secular history concerning the Anglicans in western Canada. It explores whether and how the study of religious institutions and ideas can be a more obtrusive theme in the mainstream of secular history.

Animal rights campaigns : their impact in Canada -- Rev.

by S. Dakers. Ottawa : Library of Parliament, Research Branch, 1990. 18 p. Bibliogr. (Current issue review ; 88-04E) French ed. (*Les Campagnes en faveur des...*) on the same fiche. ISBN 0-660-13708-9
MICROLOG 91-02089 1 fiche

This current affairs paper describes how the anti-sealing campaign adversely affected the livelihoods of sealers in Labrador and Newfoundland and of the Inuit in northern Canada. It then outlines how a similar campaign might affect trapping and fur ranching in this country. Animal research and factory farming are also touched upon as possible targets of Canadian animal rights campaigns. A chronology and bibliography conclude the paper.

AG CA CI SC

by S. Dakers. Ottawa : Library of Parliament, Research Branch, 1990. 18 p. Bibliogr. (Current issue review ; 88-4E) French ed. (*Les Campagnes en faveur des...*) on the same fiche. Revised September 7 1990. ISBN 0-660-13890-5
MICROLOG 91-04809 1 fiche

The economic effects of the campaigns of animal rights groups are far-reaching. The anti-fur protest could be as devastating to the economies of rural and remote regions of Canada as was the anti-sealing campaign of the 1970s, with which it has parallels. This review describes how the anti-sealing campaign adversely affected the livelihoods of sealers in Labrador and Newfoundland and of the Inuit in northern Canada, who hunted only adult seals. It then outlines how a similar campaign might affect trapping and fur ranching in this country. It also discusses animal research and factory farming.

Anisotropic properties study of Lac Du Bonnet granite specimens

by R. Jackson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1991. iv, 92 p. : ill. Bibliogr. (Report ; MRL 91-007(TR)) (Report ; no. 6)
MICROLOG 91-04541 2 fiche

As part of the Canadian Nuclear Fuel Waste Management Project, Atomic Energy of Canada Ltd. is characterizing various rock formations to determine their suitability for long term disposal of high level wastes. Biaxial testing conducted on core obtained during the construction and operating phases of the underground research laboratory indicated that the rock may be anisotropic in terms of modulus of elasticity. This report presents results of further testing conducted on 5 samples obtained from the 420 level. Tests were conducted for compressive wave velocity, shear wave velocity, dynamic

shear modulus, dynamic Young's modulus, dynamic Poisson's ratio, uniaxial compressive strength, Poisson's ratio, 50 percent tangent modulus of elasticity, 50 percent secant modulus of elasticity, and 25 MPa secant modulus of elasticity.

Annual report on electronic surveillance as required under subsection 195(1) of the Criminal Code, 1989

Ottawa : Solicitor General Canada, 1991. 38. 41 p. : ill. *Bilingual (Rapport annuel sur l'écoute...)*. CSI 21121.004. ISBN 0-662-58326-4

MICROLOG 91-05396 2 fiche

Annual report concerning the judicially authorized interceptions of private communications. This report contains new data and information relating to 1989 and updated data and information for 1985-88. The report includes statistics and analysis regarding authorized electronic surveillance under which proceedings may be instituted at the instance of the Government of Canada and conducted by or on behalf of the Attorney General of Canada. In general, the report covers applications for authorizations to intercept private communications in relation to the Narcotics Control Act, the Food and Drugs Act, the Customs Act, the Excise Act, the Bankruptcy Act, the Official Secrets Act and the Immigration Act. In addition the report contains information relating to certain Criminal Code offences if the offence meets either of the conditions set out in section 2 of the Security Offences Act, or if the offence occurred in the Northwest Territories or the Yukon.

Annual review, 1990 : transitions for the 90's

Economic Council of Canada. Ottawa : The Council, 1990. xii, 80 p. : ill. *Bibliogr. French ed. (Exposé annuel, 1990...)* : 91-00922/2. CSI 22215.001. ISBN 0-660-13720-8

MICROLOG 91-00923 2 fiche

This publication surveys some of the changes now taking place in the world economy and some of the demands that they will place on Canadians and their institutions. It presents the medium-term outlook, examining the cost of controlling inflation and the way this cost is influenced by the expectations of ordinary Canadians. It also analyses first the economic structure of Canada's regions and the nature of the unemployment problem in this country, and discusses how other countries have reconciled the tensions that arise when

attempting to achieve full employment and price stability simultaneously. Finally, it examines Canadian policies and institutions, and sets out a number of options that would enable Canada to make progress in reducing inflation and expanding employment while reducing the federal fiscal deficit.

The Applicability potential of foreign housing finance mechanisms in Canada

by M. Boléat. Ottawa : Canada Mortgage and Housing Corporation, 1990. 16 p.
MICROLOG 91-06290 1 fiche

This paper analyses the mechanism by which housing finance loans are made, covering in particular the two basic systems, financing by retail deposits and financing by the capital markets, and the role of government in the mortgage market. It suggests that of all industrialised countries Canada has a system which relies least on specialised institutions and is mostly integrated into the general financial markets. It is also suggested that, from the international perspective, the main policy issues in Canada are the mortgage instrument, the role of the government in facilitating innovations, and the evolution of the secondary market.

Application du modèle d'analyse d'utilisation de l'eau au bassin de la rivière Yamaska

par J. Harris. Québec : Environnement Canada, Conservation et Protection, Région du Québec, Centre Saint-Laurent, 1990. ix, 43 p. : ill. Bibliogr.
MICROLOG 91-02722 1 fiche

Ce travail s'inscrit dans une série d'études qui utilisent le modèle national d'analyse d'utilisation de l'eau (MAUE) dans le but de comparer les prévisions de demande à la quantité d'eau disponible pour différents bassins des rivières du Canada afin de faire des projections de demande en eau. Cette étude comporte deux objectifs reliés à l'application du MAUE dans le bassin de la rivière Yamaska. Le premier de ces objectifs est de comparer l'offre et la demande en eau de surface afin de déterminer s'il peut éventuellement y avoir des problèmes d'approvisionnement en eau dans le bassin pour une période allant de 1986 à 2006. Le deuxième objectif est de raffiner les techniques d'estimation de la demande en eau qui font partie du modèle.

Application of microbial exoenzyme activity measurements to assess the impact of dredge spoils disposal in Pictou Harbour, Nova Scotia and the Miramichi River, New Brunswick

by K. Lee...et al. Dartmouth, N.S. : Environment Canada, Conservation and Protection, Environmental Protection, Marine Environment Branch, 1990. iii, 95 p. : ill., maps. (Ocean dumping report ; 6) ISBN 0-662-17629-4
MICROLOG 91-01151 2 fiche

Marine sediments are the primary sites of such environmentally vital processes as organic matter degradation, nutrient regeneration and trace metal transformation. Since these processes are mediated predominantly by the activity of sediment microorganisms, assessment of sediment microbial activity should be included as an essential part of any environmental impact assessment. This report evaluates an environmental impact assessment procedure based on the measurement of microbial exoenzyme activity in sediments at sites in Pictou Harbour, N.S. and the Miramichi River, N.B., both of which had received contaminated dredge spoils. Fluorogenic substrate specific for glucosidase, phosphatase, and protease were used to evaluate the impact of the disposed sediments on biogeochemical processes.

Application of Native knowledge in EIA : Inuit, eiders and Hudson Bay oil

by D.J. Nakashima. Hull, Que. : Canadian Environmental Assessment Research Council, 1990. vii, 29, vii, 31 p. : maps. Bibliogr. Bilingual (Les Connaissances des...). ISBN 0-662-57901-1
MICROLOG 91-01303 1 fiche

The search for petroleum continues to dominate the Arctic development landscape and as a result, oil spills in Arctic waters remain a central environmental concern. However, environmental baseline data, essential for environmental impact assessment (EIA), is scant or nonexistent for much of the Arctic. This paper proposes that EIA in Arctic regions can substantially benefit from Inuit environmental knowledge and the formal integration of the Inuit into the EIA process as environmental experts who possess information not readily available to scientists. To assess the soundness of this proposition, the paper examines the environmental data from the Inuit of Sanikiluaq, NWT and Inukjuak and Kuujarapik in northern Québec. The data examined involves the biogeography and ecology of the Hudson Bay Eider, a large seabird of particular interest to those involved in Arctic EIA due to its extreme vulnerability to oil pollution.

The Application of radar and thermography to bridge deck condition surveys

by D.G. Manning and T. Masiwec. Toronto : Ministry of Transportation, Research and Development Branch, 1990. iii, 26 p. : ill. Bibliogr.
MICROLOG 91-02623 1 fiche

An effective bridge management system requires a comprehensive data base to assess the overall condition of the bridge network and to predict the effect of alternative preservation and improvement actions. Collecting data on the condition of bridges by traditional methods is expensive and the results are not always dependable. In the late 1970s, research studies were initiated to develop rapid and reliable methods for collecting data on the condition of bridge decks. The research found that radar and thermography were the most promising techniques. This paper summarizes the theoretical and practical aspects of the development of the DART (deck assessment by radar and thermography) vehicle and describes the experience in its use under operational conditions.

Approaches to income security reform

edited by Shirley B. Seward [and] Mario Iacobacci. Halifax : Institute for Research on Public Policy, 1987. xv, 93 p. Bibliogr. ISBN 0-88645-053-5
MICROLOG 91-01481 2 fiche

This paper is based on the views expressed at an informal workshop on income security reform organized by the Institute on 23 September 1986. It contains an overview, which provides a synthesis of the major issues discussed at the workshop, including a statement of areas where the workshop reached consensus as well as areas where disagreement remains. It includes suggestions as to a possible strategy for reform, and presents the background papers prepared for the workshop.

Approaches to stochastic 0-1 linear programming with simple recourse

by Y. Li and M. Gendreau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. iii, 22 p. Bibliogr. (Publication ; no. 769)
MICROLOG 91-05408 1 fiche

Many practical problems can be formulated as 0-1 programming, including capital budgeting, project selection, network design, plant location, transportation and scheduling programs. This paper briefly reviews the literature, gives a formulation of 0-1 stochastic linear integer programming with simple recourse, then presents optimal algorithms designed to solve such problems. Two heuristic algorithms (HUSI and TABU) are presented, along with extensive computational comparison results between the two.

Aquatic resources inventory for Hattie Cove, Pukaskwa National Park

by D. Odjick and P. Warden. Ottawa : Environment Canada, Parks Service, 1990. x, 105 p. : ill., maps. Bibliogr. MICROLOG 91-03717 2 fiche

Hattie Cove is a body of water on Lake Superior within Pukaskwa National Park which is located adjacent to camping grounds and is subject to fishing pressure during both summer and winter seasons. It is also one of the few locations in the park where northern pike grow to a relatively large size. This study presents an inventory of the aquatic resources and the results of an ultrasonic transmitter study which was initiated to determine if the pike were permanent residents of the cove. The study describes the water quality, benthic fauna, minnow trapping, fish tagging, a creel census, and mercury analysis.

Aquifer vulnerability : Sheffield Farm Project : year one (1988-89) report

Dartmouth, N.S. : Environment Canada, Conservation and Protection, Inland Waters Directorate, Atlantic Region, Water Planning and Management Branch ; Ottawa : Agriculture Canada, 1989. iv, 19 p. : maps. Bibliogr. MICROLOG 91-00671 1 fiche

This 5-year federal-provincial project was signed in September 1988. The project is divided into two phases, the first of which covered 1988-90 and characterized the experimental site and designed specific experiments. Phase II, from 1990-93, covers implementation of experiments and effects monitoring, followed by interpretation and publication of findings. This report covers the first year's activities, in which reconnaissance hydrogeological studies were carried out, including detailed coring of the soil materials and bedrock, split spoon sampling, installation of 19 5-cm diameter piezometers in the completed boreholes, a limited number of hydraulic tests and some ground and surface water sampling. Some early findings are presented, as well as thoughts on future experiments and details on equipment acquired to date.

Archaeological investigations in Ellesmere Island National Park Reserve, 1989

by P.D. Sutherland. Ottawa : Environment Canada, Canadian Parks Service, 1991. 16 p. : ill., maps. (Research bulletin ; no. 288) French ed. (*Recherches archéologiques dans la...*) on the same fiche. ISSN 0228-1228
MICROLOG 91-03267 1 fiche

This bulletin describes field research undertaken in 1989 as part of a base-line study of the archaeological resources of Ellesmere Island National Park Reserve. This inventory and analysis of known prehistoric and historic Inuit sites was undertaken in order to provide a basic cultural history of the park reserve. The specific objectives of the 1989 field work were: 1) to complete an inventory of archaeological sites in the corridor between Tanquary Fjord and Lake Hazen, which constitutes the main hiking trail for visitors to the park, and to make recommendations for managing the cultural heritage resources of this area; and 2) to excavate an early Paleoeskimo site (Rivendell) at the southwest end of Lake Hazen that was threatened by users of the hiking trail.

CA CI EX

by J. Lee and W. Koerner. Ottawa : Library of Parliament, Research Branch, 1990. 19 p. Bibliogr. (Current issue review ; 87-13E) *French ed. (Le Contrôle des armements...) on the same fiche. Revised October 16 1990.* ISBN 0-660-13886-7
MICROLOG 91-04813 1 fiche

Underlying much of the discussion on arms control is the widely accepted orthodoxy that arms races are by nature a kind of 'action-reaction' phenomenon. Opposing states' responses to each other's buildups and attempts to reap advantage lead to destabilization and heightened tension. If war should come, it is argued, it will do so accidentally, in a climate of intensifying suspicion and as the result of critical misperceptions during a crisis. Controlling the arms race is, then, deemed a necessary element in the promotion of international stability. Critics argue, however, that in fact arms control does little to contain the arms race, it simply codifies it. This paper provides a brief overview of the various forums in which arms control negotiations take place, some of the accomplishments achieved and, where appropriate, Canada's contribution to these.

Aspects of Planting : biology and practice : proceedings of a workshop

editors: K.M. McClain, and A.J. Willcocks. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1988. iii, 114 p. : ill., maps. Bibliogr. (Technical workshop report ; no. 1)
MICROLOG 91-00050 2 fiche

Papers presented at a workshop to increase the awareness and knowledge of the impacts of seedling stock handling, both in the nursery and at the planting site, on field performance.

Coverage includes the development of the physiological connection in forestation; basic seedling physiology; seedling production considerations in bareroot and container stock; production techniques in the private sector; the physiological ramifications of stress during handling, storage and transportation; stock handling by Domtar and at Sioux Lookout and Red Lake; reforestation and seedling production for Crown lands in N.B.; and area based planting. Abstracts only are given of the evening presentations.

Aspects pratiques du financement hypothécaire et applications aux hypothèques traditionnelle et indexée

par A. Ryba, S. Damus et J. Carrière.
Ottawa : Conseil économique du Canada, 1983. vi, 158 p. : ill. Bibliogr. (Document ; no 233) ISSN 0225-8021
MICROLOG 91-00040 2 fiche (Available on fiche only)

Ce document est une étude portant sur l'instrument hypothécaire au Canada dans le financement de l'habitation et de l'agriculture ainsi que de son évolution à travers le temps portant une attention particulière à l'interaction entre cet instrument et l'inflation. Il se concentre sur l'hypothèque traditionnelle qui a été utilisée au cours des 30 à 40 dernières années pour financer l'achat d'une maison ou d'une terre agricole et l'hypothèque indexée dont l'introduction a été recommandée par le Conseil économique dans son rapport Intervention et Efficacité. Le document décrit le contrat hypothécaire suivi d'une discussion des risques et rendements nets du point de vue de l'emprunteur et du prêteur. Finalement, il se penche sur l'évolution de l'instrument hypothécaire et du marché hypothécaire canadien à travers les 30 dernières années.

Aspen management options using fire or cutting

by M.G. Weber. Chalk River, Ont. : Forestry Canada, Petawawa National Forestry Institute, 1991. v, 11 p. : ill. Bibliogr. (Information report ; PI-X-100) ISSN 0706-1854 ISBN 0-662-18211-1
MICROLOG 91-04149 1 fiche

Vegetative reproduction, leaf and stem biomass and nutrient pools, soil nutrient pools, soil respiration, litter-fall, and winter forage (twig) production were monitored in eastern Ontario immature (20 years) aspen ecosystems which had been treated by low intensity burning before, burning after, cutting before, and cutting after spring leaf flush. An untreated control was set aside for comparison. Examinations were conducted 3 years after treatment.

Asphaltene deposition during enhanced recovery of heavy oils by gas injection : final report

by S.L. Kokal, J. Najman and S.G. Sayegh. Calgary, Alta. : Petroleum Recovery Institute, 1990. viii, 119 p. : ill. Bibliogr. CANMET contract: 23440-8-9226-01-SQ.
MICROLOG 91-02599 2 fiche

As conventional oil reserves become depleted, exploration and production trends are towards heavier oils and secondary and tertiary recovery methods, all of which leads to a more acute asphaltene precipitation and deposition problem and serious effects on the economics of oil production. This report gives a comprehensive review of the important factors which affect asphaltene precipitation in petroleum reservoirs and in processing facilities; discusses the nature and characteristics of asphaltenes in crude oil and their molecular and colloidal properties; describes the problems in the reservoirs, well bores and well tubings, processing and transportation equipment; reviews the experiences of the oil industry in tackling the problem and examines several actual field situations; discusses the views in the research community over the nature of asphaltenes in crude oils; details two modelling approaches; and discusses parameters which affect asphaltene adsorption on mineral surfaces. The report also presents a novel method of visualizing in situ asphaltene precipitation from heavy oils with light hydrocarbon gases. Experimental results are reported for the effects of temperature, pressure, composition and phase behaviour on the formation of asphaltene precipitates from heavy crude oils.

Assessing components of competition indices for young boreal plantations

by G.B. MacDonald, D.M. Morris and P.L. Marshall. Ottawa : National Research Council Canada, 1990. 9 p. Bibliogr. In Canadian Journal of Forest Research: vol. 20, no. 7, 1990.
MICROLOG 91-06809 1 fiche

This report identifies important components of interspecific competition affecting apical and cambial growth in young plantations of black spruce and jack pine in northern Ontario, as well as the relative importance of such factors as competition, initial seedling status, and some soil factors. Measures of perennial competition were calculated using hemispherical photographs, stand maps, and mensurational data from 360 seedling-centred plots for each of the two species. Fractal geometry was used to quantify the textures of the competing canopies.

An Assessment of aerodynamically air-staged coal burner : report

by R.J. Wreford. Montreal : Canadian Electrical Association, Research and Development ;

Ottawa : Canada Centre for Mineral and Energy Technology, 1990. 69 p. : ill. CANMET contract: 89253-01-SQ.
MICROLOG 91-00752 2 fiche

The International Flame Research Foundation in the Netherlands recently completed a research program on the development of a 2.5 MWt aerodynamically air staged burner (AASB). The semi-industrial scale test burner is designed for pulverized coal combustion with low NOx emission. The test data, results and discussion of the program are contained in 8 research reports published by the Foundation. This report reviews the program through the research reports, assessing the results of the AASB trials for their potential for NOx reduction in an industrial or utility scale application, and investigating the practicality of commercial development in the 40 MWt and larger size range.

An Assessment of Agriculture Canada's program on energy crops and biomass combustion

by P. Van Die and M. Stumborg. Ottawa : Agriculture Canada, Research Branch, Engineering and Statistical Research Centre, 1988. i, 31 p. Bibliogr. (Report ; C-014)
MICROLOG 91-04120 1 fiche

Agriculture Canada established an energy research and development initiative in 1981 called the Energy Research and Development in Agriculture and Food (ERDAF) program. This report is a review and assessment of the work performed in the development of energy crops and the utilization of agricultural biomass as an energy source through combustion and related technologies. The report provides background information on the use of crops for energy production, including the crops grown and the processes used. It then describes projects conducted in resource assessment, direct combustion, pyrolysis, and research into energy crops. Financial data are also given.

Assessment of an integrated blast monitoring package for use in the investigation of open pit production blasting practices

Golder Associates. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. ii, 65 p. : ill. Bibliogr. CANMET contract: 99162-01-SQ.
MICROLOG 91-01021 1 fiche

In most open pit mines in hard rock, producing the required tonnage of ore at minimum expense involves a system of fragmentation of the rock followed by loading and hauling to the ore crusher or waste dump. The drilling and blasting required to produce the fragmentation necessary for efficient loading is a significant proportion of the mining costs. Because of potential gains from improvements in blasting practices, understanding the blasting process and optimizing blast design has become very important to any mining operation. This report presents the results of a study to evaluate the potential application of an advanced blast monitoring device known as the BMX blast monitor to open pit production blast optimization. The BMX unit was to be used in combination with a video camcorder and 35 mm still photography as part of an integrated system. The study was conducted during two site visits in early 1990.

Assessment of closed waste disposal sites, phase III : investigation and monitoring, Newton Landfill site, Cambridge

prepared for Waste Site Evaluation Unit, Waste Management Branch ; by M.M. Dillon Limited. Toronto : Environment Ontario, 1990. 131 p. : ill. Bibliogr. ISBN 0-7729-5892-0
MICROLOG 91-00764 2 fiche

In 1985, a comprehensive program was initiated to investigate and monitor all active and closed waste disposal sites in Ontario to determine the existing impacts and the potential for future impacts on human and natural environments in the vicinity of sites, and to assess the need for remedial work to mitigate these impacts. This Phase 3 study was conducted on the Newton landfill in Cambridge, Ontario. The hydrogeological study assessed the impact of the site on the quality of ground water and surface water at the site boundaries and identified any need for remedial measures required to prevent the migration of leachate and/or methane gas beyond the boundaries of the site.

Assessment of data management alternatives for the Alberta Oil Sands Environmental Research Program, part II : project information catalogue

James MacLaren Industries Inc. Edmonton : Alberta Environment, Alberta Oil Sands Environmental Research Program, 1979. ix, 181 p. (AOSERP report ; PM-4)
MICROLOG 91-03413 2 fiche

Since the inception of the Alberta Oil Sands Environmental Research Program, vast amounts of raw data have been collected by many projects. This data comes in many forms at different locations in Canada. This report presents recommendations for a data management system and a data information catalogue. The catalogue is divided into air, human, land and water, with an index at the beginning of each section. Data sheets contain information on fiscal year of completion, last time the data sheet was updated, project number, research group, title, terms of reference, organization conducting the research, level of effort to date, starting and completion dates, location, information contact, types of data collected, project status and comments on the project.

An Assessment of effluent quality at a large metal finishing plant

by D.H. Bergman and E. Tsai. Ottawa : Environmental Protection Service, Western and Northern Region, 1991. v, 55 p. Bibliogr. (Report ; CP(EP) WNR90-91-7)
MICROLOG 91-05908 1 fiche

A technical assistance program directed at small industries, the first being metal finishing operations, was developed in 1986. Under this program companies may receive assistance through either a field assessment or audio-visual training courses. The program focuses on practical options for reducing waste generation at source. This report describes the processes involved in such plants; methods used in sampling and measurements of waste water flow; a description of the plating lines; existing water uses and water management practices; waste characterization; regulatory requirements; and recommendations.

An Assessment of effluent quality at a small metal finishing plant

by D.H. Bergman and E. Tsai. Ottawa : Environmental Protection Service, Western and Northern Region, 1991. v, 32 p. Bibliogr. (Report ; CP(EP) WNR90-91-8)
MICROLOG 91-06002 1 fiche

Generators of small quantities of hazardous waste are often not aware of the availability of waste minimization technology, as well as lacking the capacity to devise cost-effective waste management strategies. In 1986, a technical assistance program was developed directed at small industries, the first being metal finishing operations. Under this program companies may receive assistance through either a field assessment or audio-visual training. This report describes the program at a metal finishing plant consisting of a single plating line which includes nickel, brass and chrome, whose rinsing water is obtained from an on-site well and from the City of Winnipeg distribution system. The report presents a physical description of the plating process, an assessment of rinse tank water and plant effluent, and the results, including water use and waste management practices, and waste characterization. A discussion of the regulatory requirements is also included.

Assessment of Harrison River chinook salmon

by P.J. Starr and N.D. Schubert. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1990. ix, 47 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2085) ISSN 0706-6473
MICROLOG 91-01685 1 fiche

The Harrison River is part of a complex system which drains a mountainous coastal watershed in southern B.C. It supports one of the largest naturally spawning chinook salmon stocks on the Pacific coast. The Harrison River was selected as a key stream to evaluate responses to chinook management actions resulting from the Pacific Salmon Treaty of 1985. This report provides a comprehensive stock assessment statement, reviewing available terminal abundance, harvest distribution, and survival data, summarizing biological sample data, and evaluating escapement estimation techniques and the escapement goal. The report concludes with recommendations for further research and for the management of this stock.

Assessment of heat recovery ventilator operation and performance in Alberta

Howell-Mayhew Engineering Inc. Edmonton :

Alberta Municipal Affairs, Innovative Housing Grants Program, 1990. iv, 69 p. : ill. ISBN 0-88654-288-X
MICROLOG 91-01252 1 fiche

The trend toward more airtight, energy efficient houses leads to the increased use of heat recovery ventilators (HRVs). Although great improvements have been made in ventilation technology over the past 10 years, problems are still being reported in the field which raise questions about the effectiveness of HRV ventilation strategies in providing good indoor air quality. This project identified operating and performance problems with HRV systems and worked with the major manufacturers to develop and test practical and cost effective solutions to these problems. The study concentrated on ventilation strategies in Alberta using vanEE and Lifebreath HRVs. It surveyed regulatory agencies, research organizations, manufacturers and distributors to determine concerns within the industry; surveyed builders, installers and homeowners to determine the extent of problems in the field; and conducted a field investigation to study problems first-hand and to test potential solutions.

Assessment of new technologies for natural gas conversion using scenario analysis

by A.J. Szladow and R.F. Fernet. Regina : Lobbe Technologies Ltd., 1990. 2 v. : ill. Bibliogr. CANMET contract: 89089-01-SQ.
MICROLOG 91-00735 5 fiche

This study assesses research projects in natural gas conversion to identify opportunities, constraints and critical factors for the conversion of natural gas to liquid fuels and fuel components, and to define possible criteria for evaluating various technological options. A data base of Canadian energy supply, demand and resources from 1967-87 was developed. Historical trends in the Canadian economy, energy demand, regulations and technology developments were analyzed to identify key variables that influence Canadian energy demand and supply patterns. Four scenarios were developed for future transportation fuels demand, each of which was based on a different set of assumptions. For each scenario, such key factors as economic parameters, availability and price of natural gas, efficiency in existing end-use applications, fuel interchangeabilities, environmental concerns, government involvement in the economy, and key structural changes were identified and their impact on various aspects of fuel production and use was assessed. A list of opportunities and constraints was also prepared for each scenario.

Assessment of the ground source heat pump performance in 27 homes

by A.L. Punhani and T.C. Olivares. Toronto : Ontario Hydro, Research Division, 1990. i, 96 p. : ill. (Report ; no. 90-130-K)
CSI 56125.204.
MICROLOG 91-00800 2 fiche

Little is known about the capabilities and performance of ground source heat pumps (GSHP), which are machines that remove heat from the ground or groundwater to provide heat at temperatures suitable for space heating and/or hot water heating. The principal advantage of a GSHP is that it delivers 2-1/2 to 3 times more energy to the heated space than what is consumed by its electrically-driven compressor and associated equipment. GSHPs were installed in 27 homes and were monitored, beginning with the 1987 heating season, to determine the feasible residential conservation potential which should result in lowering the system load demand. The monthly energy load profiles of each of these homes and their average thermal and GSHP loads were then calculated. This report covers 1988 heating season data.

Assessment of the state of knowledge on the long-range transport of air pollutants and acid deposition, part 6 : direct and indirect human health effects

Federal/Provincial Research and Monitoring Coordinating Committee (Canada). Ottawa : The Committee : Health and Welfare Canada, Environmental Health Directorate, 1990. 30 p. Bibliogr. French ed. (Rapport de 1990...et indirects) : 91-04764/1. Cover title: The 1990 Canadian long-range transport of air pollutants and acid deposition assessment report, part 6 : human health effects.
MICROLOG 91-04765 1 fiche

There is increasing evidence that chronic exposure to acid particles and other transported air pollutants is associated with modest but measurable effects on human health. This report examines current research findings and attempts to provide a risk perspective of acid air pollution in Canada. The report focuses on acid aerosols and ozone, the two components of LRTAP most likely to be affecting human health. The review

includes data from animal toxicology, human clinical studies, and epidemiological studies, and some theories are proposed for how these pollutants may act on the respiratory system. The report also examines monitoring data for acid aerosols and ozone in different regions of the country; assesses the exposure information and the health effects information to provide a statement on the risk posed to the health of Canadians by LRTAP; identifies ongoing research needs; and summarizes current Canadian research projects.

Atlantic Canada Workshop on Methods for the Production of Non-Maturing Salmonids : proceedings

edited by V.A. Pepper. St. John's : Dept. of Fisheries and Oceans, Newfoundland Region, Science Branch, 1991. vi, 152 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1789) ISSN 0706-6457
MICROLOG 91-03903 2 fiche

There is concern among salmonid managers that accidental release of aquaculture fish may cause changes in genetic structure of wild populations. In consideration of the present uncertainty on this issue, this workshop was convened to determine the state-of-the-art for suppressing maturation of salmonids. Papers were presented on the technology, production and performance of non-maturing triploid salmonids in eastern and western Canada,

Scotland, and Tasmania. Highlights and summaries of the discussion sessions of workshop presentations, and a synthesis of workshop recommendations, are also included.

Atlantic salmon habitat survey : enhancement opportunities and problems in the Dunbar Stream, Nashwaak River, N.B.

by J.R. Semple. Halifax : Dept. of Fisheries and Oceans, Biological Sciences Branch, Freshwater and Anadromous Division, 1991. vii, 35 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2076) ISSN 0706-6473
MICROLOG 91-04510 1 fiche

Dunbar Stream flows into the Nashwaak River, which then flows into the Saint John River at Fredericton. Salmon angling is considered good, but the increasing demand is nearing the point where supply is threatened. The habitat survey for Atlantic salmon was conducted from August 9-25, 1983, by walking the stream and recording water temperature, degree of shading, bottom composition, stream width and depth, and the extent of riffles, runs, flats, stills, and pools at intervals. Records were

also kept of the numbers and kinds of potential predators of brook trout and juvenile Atlantic salmon and of complete and partial obstructions to migrating salmon. A quality classification for salmon parr nursery habitat was devised and spawning areas were classified also. This report presents the results of the survey.

The Atlantic salmon resource of the North River, Victoria County, N.S., to 1984

by P.G. Amiro and T.L. Marshall. Halifax : Dept. of Fisheries and Oceans, Biological Sciences Branch, Freshwater and Anadromous Division, 1990. vii, 34 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2075) ISSN 0706-6473
MICROLOG 91-00045 1 fiche

The North River of Cape Breton Island is an important producer of Atlantic salmon. The stock is both early-run and two-sea-winter in composition, a characteristic which is currently scarce on the island. Historic exploitation by commercial and sport fisheries has contributed to concerns about the status and management of the North River stock. This report summarizes and analyzes data for setting and achieving target spawning escapement in the North River prior to and exclusive of the 1984 salmon management plan.

Attention and performance while driving with auxiliary in-vehicle displays

by Y.I. Noy. Ottawa : Transport Canada, Road Safety, 1990. ix, 130 p. : ill. Bibliogr.
MICROLOG 91-02927 2 fiche

This study reports on a series of three experiments conducted to investigate basic human factor issues relating to the design and use of auxiliary in-vehicle displays. The three tasks measuring driver attention and performance involved: 1) spatial perception tasks on a CRT display in conjunction with driving simulation; 2) a verbal memory task in conjunction with driving simulation; and 3) monetary rewards for performance of memory tasks in conjunction with driving simulation. The reported results of these experiments clarify theoretical considerations for the development of ergonomic design guidelines for automotive driver information systems.
CA SC TR

Attic air change testing : protocol development : final report

Buchan, Lawton, Parent Ltd. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1989. 44 p. : ill.
MICROLOG 91-02097 1 fiche

Attics are continually plagued by moisture problems which, according to empirical testing, can be alleviated by increased ventilation. However, the lack of actual scientific research into the magnitude and effects of ventilation indicates that a better understanding of the processes is required and in fact, some recent

research suggests that it may be counter-productive. This report describes the development of a procedure to field test the magnitude and effect of ventilation in attics using a tracer gas. The procedure incorporated a constant injection tracer gas methodology. Time-average sampling was achieved by using small pumps in the attic to transfer sampled air to a sample bag. Samples for analysis were drawn from these bags. The development process began with a test set-up comprised of 30 sample locations and 4 injection locations in the attics of 2 houses of similar size.

L'Autoconstruction : être patron, gestionnaire et contremaître

par Claude Saint-Germain ; conseiller René Nadeau ; réalisation Société imager. Ottawa : Société canadienne d'hypothèques et de logement, 1990. 101 p. Bibliogr.
MICROLOG 91-02827 2 fiche

Ce guide a été conçu pour aider toute personne à gérer et à réaliser un projet d'autoconstruction. Il présente une conception claire, cohérente et globale de toute la démarche. C'est à la fois une introduction aux notions de base de la construction et un guide pratique pour tous ceux qui veulent diriger leur projet. Il se penche particulièrement sur les préparatifs, les moyens de contrôle, et la mise en chantier.

Automation evaluation report : the impact of implementing Dynix on Provincial Library operations and services

by J. Campbell. Regina : Saskatchewan Community Services, Provincial Library, 1991. 79 p. Bibliogr. ISBN 0-919059-50-3
MICROLOG 91-05315 1 fiche

This report assesses how well the implementation of the Dynix library system has met the automation needs of the Provincial Library and the criteria used for selection of a vendor. It examines each of the following functions and subfunctions for changes in efficiency and effectiveness: catalogue support; circulation of individual items; block control; circulation sub-functions; online public access catalogue; and acquisitions. The report also examines how the implementation of Dynix has affected the service of providing bibliographies.

Automotive research and development capability in Canada

Ottawa : Industry, Science and Technology Canada, Surface Transportation and Machinery Branch, Automotive Directorate, 1991. iv, 153 p. ISBN 0-662-18558-7
MICROLOG 91-02850 2 fiche

Directory of the capabilities of organizations conducting automotive R&D in specific technological areas, vehicle types or manufacturing processes. Responding organizations rated their own R&D capability in various technical areas of expertise on a scale from 0-10, with 10 indicating highest capability. The directory is based on a survey of over 500 organizations, with participation voluntary. Organizations are listed alphabetically and information is given on organization type, level of staffing, R&D staffing, type of R&D performed, vehicle applicability, manufacturing process expertise, knowledge specialty, automotive component specialty, affiliations with other organizations, special R&D facilities, and current projects.

L'Autonomie politique des Indiens -- Rév.

par W. Moss. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990.
19 p. Bibliogr. (Bulletin d'actualité ; 89-5F)
L'éd. anglaise (Indian self-government) sur la même fiche. Révisé le 24 septembre 1990. ISBN 0-660-93250-4
MICROLOG 91-04856 1 fiche

La question de l'autonomie politique est devenue l'une des grandes préoccupations des autochtones au cours des dix dernières années. C'est depuis 1981 environ que les organismes représentant les peuples autochtones placent l'autonomie politique au premier rang de leurs préoccupations. Ce document se penche sur ce sujet et examine les points suivants: la Loi sur les Indiens; le Comité spécial sur l'autonomie politique des Indiens; les mesures législatives en vue de la reconnaissance de l'autonomie politique des autochtones; et, les modifications de la Loi sur les Indiens.

L'Autorité de la chose jugée, la réponse à l'accusation et le verdict

Ottawa : Commission de réforme du droit du Canada, 1991. xv, 115, xvi, 109 p. Bibliogr. (Document de travail ; 63) *Bilingue (Double jeopardy, pleas...).* En tête du titre: *Droit pénal.* ISBN 0-662-57964-X
MICROLOG 91-04453 3 fiche

On propose dans ce document de travail d'étudier la protection offerte en droit pénal par le principe de l'autorité de la chose jugée, ainsi que les plaidoyers, les moyens de défense spéciaux et les verdicts prévus par le droit actuel. Pour ce faire, le document répond à la question suivante: la conformité aux grands principes exposés dans le rapport de la Commission intitulé 'Notre procédure pénale' est-elle possible, dans ce volet de la procédure pénale, sans une réforme globale? Les propositions faites viseront à rassembler l'ensemble des règles applicables, et à les rendre plus rationnelles et plus faciles à comprendre.

Availability and markets of structural industrial minerals in Saskatchewan

by M.A. Simpson. Saskatoon, Sask. : Saskatchewan Research Council, 1990. xiii, 63 p. : ill. (SRC technical report ; no. 226) (SRC publication ; no. R-1210-1-B-90)
MICROLOG 91-07199 1 fiche

This study was conducted to obtain preliminary information on the availability and markets of selected structural industrial minerals in Saskatchewan. The information was derived from currently available data and reports. Minerals reviewed include clay (including bentonite, bloating, brick, kaolin, ball, and fire) and their related clay products; sand and gravel; gypsum; limestone (lime and cement); building stone; and silica sand. For each mineral, information is given on deposits, uses and specifications, production and consumption, and prices and markets.

L'Avenir démographique du Canada et les groupes linguistiques

par R. Lachapelle. Ottawa : Institut de recherche politiques. Etudes en politique sociale, 1987. 21 p. Bibliogr. (Discussion paper ; 87.A.8) CSI 99545.206.
MICROLOG 91-01535 1 fiche

La dualité ou plus généralement la diversité linguistique constitue l'une des dimensions fondamentales du Canada. Au recensement de 1981, 68 p. cent de la population a déclaré l'anglais comme langue parlée le plus souvent à la maison, 25 p. cent le français et 7 p. cent d'autres langues. En raison de la forte concentration géographique des groupes de langue officielle, la plupart des provinces présentent une diversité linguistique beaucoup plus faible que celle de l'ensemble du pays. Ce document s'intéresse d'abord à une question d'ordre méthodologique, soit la

délimitation des régions linguistiques. Il présente ensuite les évolutions récentes de la composition linguistique ainsi que l'effet des différents facteurs responsables des tendances observées. Il fait aussi état des interrogations qui soulèvent les tendances futures de la composition linguistique. Enfin, en guise de conclusion, il indique les principales lacunes de la recherche démolinguistique.

B.C. Hydro Kitimat-Skeena 287 kV transmission line : public consultation report

presented by Professional Environmental Recreation Consultants Ltd. ; to B.C. Hydro. Surrey, B.C. : The Consultants, 1990. 162 p. : ill., maps. Bibliogr. MICROLOG 91-02346 2 fiche

B.C. Hydro proposes to construct a 287 kV transmission line from Alcan's Kitimat Substation, southwest of Kitimat, to B.C. Hydro's Skeena Substation south of Terrace. The public consultation program was carried out from September 1989 to May 1990. This report provides a detailed account of that process, along with the comments and concerns of the public. The report gives a detailed discussion of

the methodology, the public issues and concerns, and an analysis of the effectiveness of the consultation program, as well as background public information materials, newspaper ads, and notes of meetings. Public concerns included project justification, environmental management, the common corridor concept, health effects, and economic benefits. BC EN EV PR SC

B.C. Hydro pest management strategy

Vancouver, B.C. : B.C. Hydro, Corporate and Environmental Affairs, Environmental Resources, 1990. vii, 35 p. : ill. ISBN 0-7726-1218-8 MICROLOG 91-01080 1 fiche

B.C. Hydro must control vegetation on rights-of-way, at dam sites, in electrical yards, and in various industrial compounds. Traditionally, the management of vegetation on these sites has relied heavily on the use of herbicides. In addition, wood preservative pesticides are used for electrical poles, both prior to installation and for the maintenance of standing poles. B.C. Hydro is now in the process of eliminating its dependence on herbicides and the release of wood preservative pesticides from utility poles. This report traces the history of pesticide use by B.C. Hydro, comparing its usage to others in the province and Canada; provides a rationale and proposed strategy for the various areas of vegetation management and for the preservative treatments of power poles to meet the objectives; and contains a proposed action plan. B.C. Transit's mission is to enhance the social and economic life of the communities it services by providing safe, reliable, environmentally sound and effective public transit. The report provides highlights, information and testimony to the 1989-90 fiscal year. Special services such as SeaBus, SkyTrain and handyDART are covered as are the Vancouver and Victoria Regional Transit Systems. Includes statistics on ridership, service hours and kilometres, total cost per passenger and service hour and revenue as a per cent of total cost.

Back injury prevention

Regina : Saskatchewan Human Resources, Labour and Employment, Occupational Health and Safety Branch, 1990. 25 p.
MICROLOG 91-02276 1 fiche

There are multiple causes and aggravating factors for occupational back pain. Prevention programs, based mainly on training in lifting, have been unsuccessful in reducing the incidence of back pain compensation claims. Therefore, a program of prevention should be tailored to workplace needs. This booklet presents the problem, recommends some solutions and explains the responsibility of the employer and the worker under The Occupational Health and Safety Regulations.

Back on track : report on short-term reform

Ontario. Advisory Group on New Social Assistance Legislation. Toronto : Ministry of Community and Social Services, 1991. ix, 167 p. : ill. French ed. (*Relance : rapport sur la réforme...*) : 91-05928/2. ISBN 0-7729-8133-7
MICROLOG 91-05929 2 fiche

This document urges the Ontario government to move forward quickly on reform of the province's social assistance system. It recommends a package of 88 actions for implementation by the government. These actions address crucial problems in the system related to inadequacy of benefits, inequities in the treatment of people and unnecessary complexities. It also proposes giving people who receive social assistance a formal role in the decision-making process through a Council of Consumers. In addition, it asks the government to establish standards for service in the systems and to provide sufficient funding to ensure that the standards are met.

Bacteriological characterization of feces and source differentiation

by P. Seyfried and E. Harris. Toronto : Environment Ontario, Water Resources Branch, 1990. xiv, 130 p. Bibliogr. ISBN 0-7729-7313-X
MICROLOG 91-01576 2 fiche

The extensive degradation of water quality in the Toronto area watersheds and lakefront, highlighted by the closure of a number of beaches due to fecal pollution, has led to ways of implementing corrective measures to reduce pollution loadings and improve water quality. This study was designed to remedy the existing situation by examining the bacterial populations in the feces of humans, animals and birds likely to have an impact on the Metropolitan Toronto area. Both the concentrations and species distribution of the fecal coliform (FC) and fecal streptococcus (FS) bacterial groups were determined using current methods and newer procedures that may soon be used in Ontario. The effect of environmental stress on the FC/FS ratios and the bacterial populations from the feces of human and non-humans were assessed along with a determination of the potential impact of pathogenic bacteria from these sources.

Bacteriological water quality study examining the impact of sediment and survival times in the Humber River and Black Creek

by P. Seyfried. Toronto : Environment Ontario, Research and Technology Branch, 1990. xi, 264 p. : ill. Bibliogr. ISBN 0-7729-5637-5
MICROLOG 91-02858 4 fiche

Understanding the impact of fecal pollution inputs to a surface water body requires a knowledge of the input type and an understanding of the instream processes which determine the effect that a given input may have on downstream water quality. This report presents the results of a study on bacterial transfer between the water column and bed sediments to determine the potential for sediment resuspension, which would contribute to bacterial loading in areas impacted upon by different point and non-point pollution inputs. The possible impact of stream flow on sediment resuspension was also examined. Sediment bacterial contributions were measured during dry weather (both before and after mechanical agitation of the sediment bed), wet weather conditions, and intermediate periods sampled within 2 days of a rainfall. The 6 locations chosen for sampling were situated along both the upper and lower Humber River and Black Creek, and represented various pollution input types.

The Bankruptcy Act : proposed revisions -- Rev.

by H. Morrison and M. Smith. Ottawa : Library of Parliament, Research Branch, 1990. 24 p. Bibliogr. (Current issue review : 88-16E) French ed. (La Loi sur la faillite...) on the same fiche. Revised November 27, 1990. ISBN 0-660-13897-2
MICROLOG 91-04801 1 fiche

The present Bankruptcy Act dates back to 1949 and is long overdue for an overhaul. Six omnibus reform bills were introduced in Parliament between 1975 and 1984 but none was passed into law. Three different advisory committees have made recommendations for amendments, none of which has been implemented. This paper presents the most recent reform proposals of the Government with respect to bankruptcy law in Canada. A reference to bankruptcy reform in the Throne Speech of 3 April 1989 suggests a bill may be introduced in the 34th Parliament.

Barriers to recognition of the credentials of immigrants in Canada

by K. McDade. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1988. ix, 60 p. Bibliogr. (Discussion paper : 88.B.1)
MICROLOG 91-01502 1 fiche

This paper presents a review of research addressing the question of the extent of barriers to the recognition of credentials, and describes what is known about the nature of these barriers, both in general terms and with reference to selected professions. It examines the activities of human rights commissions in Canada on the basis of their mandate to investigate the types of barriers. It also evaluates the provincial support services available in Canada to immigrants seeking recognition of academic and/or professional qualifications. It suggests the potential for federal involvement in the resolution of problems related to foreign credentials by linking the issue to four areas of federal policy: multiculturalism, human rights, immigration, and international relations. Finally it presents concluding comments and policy recommendations that recognize the need for participation by both levels of government in resolving the problems identified in the paper.

Basal area response nine years after fertilizing and thinning western hemlock

by S.A.Y. Omule and G.M. Britton. Victoria : Forest Resource Development Agreement, 1991. vi, 33 p. : ill. Bibliogr. (FRDA report : 137) ISSN 0835-0752 ISBN 0-7726-1259-5
MICROLOG 91-03600 1 fiche

Western hemlock is one of the most important commercial tree species in coastal B.C. Harvest of immature stands of western hemlock can be accelerated by fertilizing and thinning treatments. This report addresses the problems of the magnitude and duration of the net basal area response; the effect of fertilizer dosage and percent basal area removed on the response; and how treatment response varies with stand age, basal area, and site index at the time of treatment. The report is based on 9-year remeasurement data from the largest single study undertaken in B.C. on the impact of silvicultural practices on free and stand growth and yield.

The Bell Island Bay Group, remnant of an early Proterozoic ensialic marginal basin in Wopmay Orogen, District of Mackenzie

by I.G. Reichenbach. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1991. 43 p. : ill., maps. Bibliogr. (Paper ; 88-28) Fold. maps not filmed. ISSN 0068-7650 ISBN 0-660-13764-X. MICROLOG 91-04837 1 fiche

Rocks of the Bell Island Bay group have previously been mapped only on a reconnaissance scale. This report is based on 4 months of field work during the summers of 1983 and 1984. Mapping was done on 1:16000 black-and-white aerial photographs enlarged from standard 1:63360 photographs

and the data compiled on 1:25000 topographic maps. Petrographic interpretations are based on a study of approximately 250 thin sections. Because most of the rocks in the study area are either aphyric or only sparsely porphyritic, names are based upon chemical composition where possible. Where chemical analyses are not available, the rocks were classified on the basis of petrographic similarity to analyzed samples. The terminology for ash-flow tuffs is that of R.L. Smith and grain size of pyroclasts is that of Fisher. CA NO NR PS SC

Bell Island Wind Demonstration Project, vol I

Newfoundland Light & Power Co. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1991. 100 p. : ill. Bibliogr. ISBN 0-662-18933-7. MICROLOG 91-06135 2 fiche

Newfoundland Power and Light Co. Ltd. installed a 300 kW Carter wind system wind turbine on Bell Island, Newfoundland, in 1988/89. The system was operated from April 1, 1989 to May 9, 1990. The project was conducted to identify the potential for grid-connected wind turbines in Newfoundland; to monitor the operational parameters associated with such and assess the performance in the Newfoundland climate; to evaluate the project economics based on the actual power generated and the actual capital and operating costs; to evaluate the reliability of wind generation; and to assess the environmental impact of a wind turbine installation. This report evaluates the success of the project. • CA CM EN SC

Beneficial insects and common pests on strawberry and raspberry crops

written under contract by D.E. Henderson ; in collaboration with D.A. Raworth. Ottawa : Agriculture Canada, Communications Branch, 1991. 33 p. : ill. Bibliogr. French ed. (*Insectes utiles et nuisibles...*) on the same fiche. ISBN 0-662-18483-1. MICROLOG 91-07128 1 fiche

Because of concerns about the environment, many growers are trying to reduce their reliance on chemical pesticides. This method of using natural means is called integrated pest management (IPM). This handbook describes beneficial flies, wasps, beetles, true bugs, lacewings and mites found on strawberry and raspberry crops, as well as other predators and the common insect pests. AG CA LS SC

Benefits of the Canada-United States Free Trade Agreement for foreign investors

Victoria : Ministry of International Business and Immigration, 1990. 7 p. MICROLOG 91-00199 1 fiche

The free trade agreement between Canada and the U.S. has opened the door for investment in Canada from third countries. The purpose of this paper is to inform investors from third countries how they can take advantage of the opportunities created by the FTA by establishing manufacturing operations in British Columbia. It also outlines the basic requirements that must be met in order to do so. BC CO EX PR

Benefits to beach users from water quality improvements

Ecologistics Limited. Toronto : Environment Ontario, Research and Technology Branch, 1990. xi, 101 p. : ill. Bibliogr. ISBN 0-7729-7856-5. MICROLOG 91-02536 2 fiche

This report documents an empirical study of the value of water quality improvements at

beaches in Ontario. A user survey was undertaken to develop basic descriptive information on beach use behaviour and water quality perceptions in Ontario. A new approach to the valuation of environmental amenities is used to estimate annual benefits associated with improved water quality at beaches. The research also explores key methodological issues. Benzo(a)pyrene concentrations in smoked fish and shellfish products

by L. Kipper and R. Flemmig. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1990. 28 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5498) *Originally published in German by Deutscher Fachverlag GmbH (Frankfurt am Main).* ISSN 0704-3716

MICROLOG 91-01006 1 fiche

Polycyclic aromatic hydrocarbons (PAHs) are widespread in the environment and have a high carcinogenic potential. Many studies have demonstrated that they are present in a wide range of foods, sometimes in high concentrations. Such contamination could be produced by environmental influences or by smoke during processing of such foods as meat and fish. Because of its particularly high carcinogenicity, BAP (benzo(a)pyrene) was selected as the index substance in the Federal Republic of Germany. This paper provides an overview of BAP concentrations in samples of smoked fish and shellfish using 122 samples obtained from wholesale and retail establishments.

Besoins de logements des groupes spéciaux : une synthèse des recherches francophones : rapport

par Mario Lebeau...et al. : soumis à la Société d'habitation du Québec. Ottawa : Société canadienne d'hypothèques et de logement, 1990. 81 p. Bibliogr. MICROLOG 91-04483 1 fiche

Le Groupe de travail sur les groupes spéciaux du Comité national de recherches sur le logement a demandé en 1987 à la SCHL d'effectuer la synthèse des recherches entreprises au Canada jusqu'à ce jour sur les besoins de logements spéciaux. Les objectifs de cette étude sont de relever les principales recherches sur le logement des groupes particuliers produites en français au Canada; d'évaluer ces recherches et d'en faire la synthèse; et, d'élaborer des recommandations quant à l'orientation des recherches déjà effectuées.

Les Besoins en personnel enseignant de 1990 à 2010

par G. Léveillé et C. Arsenault. Fredericton : Ministère de l'éducation, Direction des services administratifs et de la recherche, 1991. 31 p. : ill. Bibliogr. *CS1 45104.202.* ISBN 0-88838-771-7

MICROLOG 91-04097 1 fiche

Cette étude a pour but de présenter l'évolution des principales variables qui régissent les besoins en matière de personnel enseignant dans l'ensemble des 15 conseils scolaires francophones. Elle vise également à présenter la tendance de ces variables pour les deux prochaines décennies, soit la période comprise entre 1990 et 2010. Elle examine particulièrement la présentation de l'étude et du modèle; les résultats du modèle; et, le recrutement de personnel enseignant.

Better gypsum board at lower cost

by R.C. Joshi and J.O. Thomas. Edmonton Alberta Municipal Affairs, Innovative Housing Grants Program, 1990. x, 140 p. : ill. Bibliogr. ISBN 0-88654-286-3

MICROLOG 91-01251 2 fiche

Examination of the feasibility of using fly ash, a by-product of coal combustion in thermal power plants, as a partial replacement for gypsum in wallboard. The study analyzed and assessed the health and safety suitability of fly ash for incorporation into residential building products of using fly ash in residential building products; formulated wallboard with various concentrations of fly ash as a replacement for gypsum; tested the wallboard and assessed the performance of the various fly ash mixes; compared the performance of the fly ash gypsum board with conventional gypsum board; performed tests recommended by the Canadian Standards Association to further assess the suitability of the product; evaluated the economic aspects of adoption of fly ash gypsum board for industry and consumers; and assessed energy and natural resource consequences of a potential switch to fly ash gypsum board production.

A Better way : creating a sustainable development strategy for British Columbia

Victoria : British Columbia Round Table on Environment and Economy, 1990. 21 p. ISBN 0-7726-1221-8

MICROLOG 91-01682 1 fiche

The B.C. Government has established a body to foster the creation of, and seek consensus on, a strategy for sustainable development in the province. The Round Table on the Environment and the Economy is a group of women and men from all regions of the province, representing the spectrum of opinions on environmental, social and economic issues. Its task is to stimulate and coordinate the efforts of all British Columbians who wish to join in the process of finding a better way for the province. This paper sets out the principles of sustainable development and the context within which they may be applied in B.C.

Bibliographie analytique des langues officielles au Canada

Centre international de recherche sur l'aménagement linguistique. Ottawa : Commissariat aux langues officielles, 1991. 53 p. *Bilingue (Annotated bibliography of the...)*.
MICROLOG 91-04773 1 fiche

Préparée pour et en collaboration avec le Commissariat aux langues officielles, cette bibliographie analytique traite de la problématique générale des langues officielles au Canada entre 1960 et 1989. Elle sert de guide de lecture destiné au grand public. La plupart des ouvrages sont décrits dans les deux langues officielles, et les résumés sont suivis des initiales de leur auteur. La description bibliographique des ouvrages porte sur les sujets suivants: attitudes des Canadiens à l'égard du bilinguisme officiel; bilinguisme institutionnel; collaboration fédérale-provinciale; coûts du bilinguisme officiel; démographie linguistique; droits linguistiques; dualité linguistique; éducation; histoire (bilinguisme officiel); immigration; langue de travail; langues de contact; minorités linguistiques; et multiculturalisme.

A Bibliography on old-growth forests in British Columbia : with annotations and abstracts

compiled by Carmen Cadrin, Elizabeth Campbell, and Alison Nicholson ; commissioned by the Old Growth Strategy Working Group. Victoria : Ministry of Forests, 1991. v, 261 p. (Land management report ; no. 72) ISSN 0702-9861 ISBN 0-7718-9000-1 MICROLOG 91-05112 3 fiche

In November 1989, a working group was formed to develop a strategy for handling old-growth issues. This group provided the incentive for a number of projects to compile and synthesize information about old growth, one of which is this annotated bibliography. It provides background information on the biological characteristics, ecological relationships, and management implications for BC's old growth. References are divided into forest types, stand structure, harvesting and silvicultural systems, biological diversity, wildlife and wildlife habitat, landscape ecology, values and conservation strategies, and ecosystem function. Included are classic works, review articles, bibliographies, and research papers current to the winter of 1990. Proceedings papers or chapters within books are cited individually. Government reports and field guides

that describe biogeoclimatic subzones of BC are excluded. Indices for author, subject and geographic area are given. BC FO PR SC

Bibliothèque nationale du Canada : Rapport annuel 1989-90

Ottawa : la Bibliothèque, 1990. 82 p. : ill. Bibliogr. Bilingue. CSI 22258.001. ISBN 0-662-57566-0 MICROLOG 91-03776 1 fiche

Depuis sa création, la Bibliothèque nationale a ces principaux objectifs : rassembler, préserver et rendre accessibles les documents canadiens, qui constituent le patrimoine publié du pays ; et faciliter la mise en commun des ressources des bibliothèques du pays tout entier et l'expansion des services de bibliothèque. Ce rapport annuel fait le bilan des activités et des réalisations des différents services de la Bibliothèque nationale : promotion, acquisitions, conservation, accès, le développement des services de bibliothèque au Canada, et la mise en commun des ressources entre les bibliothèques. En annexes on donne un organigramme et des listes des membres de conseils et comités.

Big game hunter questionnaire survey, 1989-90

by D.W. Soprovich. Winnipeg : Manitoba Natural Resources, Wildlife Branch, Biological Services, 1990. vi, 77 p. Bibliogr. (Manuscript report ; no. 90-17) MICROLOG 91-02121 1 fiche

Presents harvest statistics, as determined by the hunter questionnaire method for Manitoba big game seasons. Resident bear, caribou, deer, elk, and moose hunters were surveyed. For 1989-90, 1,613 bear, 291 caribou, 45,710 deer, 2,663 elk, and 6,158 moose licenses were issued for a total of 56,435 resident big game licenses. Sampling varied with respect to intensity, frame, and number of mailings. The response rate, by season, varied between 54 percent and 100 percent. It discusses uses and limitations of the harvest statistics and suggests that harvest statistics should be treated as indices because they are generally inaccurate as collected in Manitoba.

Biochemical genetic stock identification of chum salmon in southern British Columbia, 1990

by L. Hop Wo, A.P. Gould and W.H. Luedke. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, South Coast Division, 1991. vi, 10 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 841) ISSN 0706-6465
MICROLOG 91-05893 1 fiche

Genetic stock identification (GSI) has been conducted in Canadian chum fisheries since 1981 to provide stock identification information to effectively manage commercial fisheries and to estimate harvest by country for use in implementing the terms of the Pacific Salmon Treaty. This annual report presents a description of GSI sampling procedures and results for the 1990 fishing season. A total of 7,198 fish were sampled from Johnstone Strait, mid-Vancouver Island, Cowichan, and Nitinat areas in southern BC from early September to November. Samples were collected from gillnet and seine commercial fishing boats, fish processing plants and DFO chartered fishing vessels. Samples collected consisted of heart, liver, and muscle tissues from freshly caught adult chum salmon. Protein analysis was also conducted.

In 1986, in response to concerns that overfishing had reduced the Arctic charr stocks in the Pond Inlet area, a multi-year program was initiated, with the Salmon River the first stock to be assessed. The study was initiated by gillnetting at a number of locations throughout the watershed and by sampling the subsistence fishery at the mouth of the river. In 1987 charr were gillnetted and tagged at two different locations on the river. Prior to this, a biological sample was taken in 1979 (subsistence fishery) and in 1980 (experimental gillnetting). This report presents the results of these programs.

A Biological inventory and evaluation of the Allandale Lake Algonquin Bluffs area of natural and scientific interest

by S. Varga. Toronto : Ministry of Natural Resources, Central Region, Parks and Recreational Areas Section, 1988. vi, 65 p. : ill., maps. Bibliogr. (Open file ecological report ; 8809) Fold. maps not filmed. ISBN 0-7729-5002-4
MICROLOG 91-05997 1 fiche

The Allandale Lake Algonquin Bluffs area of natural and scientific interest (ANSI) is located southwest of the City of Barrie, in Essa and Innisfil Townships, Simcoe County. This study describes and maps the vegetation communities; identifies and maps the significant or sensitive areas and provincially or regionally rare species; and re-assesses the boundaries of the ANSI. Fieldwork was carried out over 15 days from July-November 1987 and in May and June 1988 and consisted of systematically cruising the ANSI to ensure that each habitat type was visited. Within each community, species lists were compiled for the tree, sapling, shrub and herbaceous layers. Environmental parameters such as soil type, soil moisture, microclimate, slope aspect and degree of disturbance were noted. Incidental observations of mammals, breeding birds, reptiles and amphibians were also made. The status of breeding birds was assessed using the criteria outlined in the Atlas of Breeding Birds of Ontario.

A Biological inventory and evaluation of the Matchedash Bay Provincial Wildlife Area

Gartner Lee Limited. Aurora, Ont. : Ministry of Natural Resources, Central Region, Parks and Recreational Areas Section : Midhurst, Ont. : Huronia District, Fish and Wildlife, 1990. iii, 211 p. : ill., maps. Bibliogr. (Open file ecological report ; 9003) *Fold. maps not filmed.* ISBN 0-7729-7529-9
MICROLOG 91-04463 3 fiche

The Matchedash Bay area of southeastern Georgian Bay has long been recognized as a significant waterfowl staging area and waterfowl production area, and an area needing provincial protection. Despite this, it has come under increasing pressure from marina and cottage development, drainage alterations, and deteriorating water quality. For these reasons, Matchedash Bay was chosen as Ontario's first candidate project under the North American Waterfowl Management Plan, a cooperative agreement between Canada and the US signed in 1986. This report describes waterfowl use of the area, with particular reference to staging and breeding; vegetation communities and physiographic features; past and present biological resources; significant areas, features and species; areas with constraints to development; and the framework for a monitoring program. The report documented the findings of the study in such a way as to satisfy the requirements of the Environmental Assessment Act.

A Biological inventory and evaluation of the Sudden Bog area of natural and scientific interest

by D.A. Sutherland. Aurora, Ont. : Ministry of Natural Resources, Central Region, Parks and Recreational Areas Section, 1990. vi, 69 p. : maps. Bibliogr. (Open file ecological report ; 9004) *Fold. maps not filmed.* ISBN 0-7729-8049-7
MICROLOG 91-04470 1 fiche

Sudden Bog is located in the Township of North Dumfries, Regional Municipality of Waterloo, 6 km south-southwest of Galt (Cambridge). This study was conducted to provide a detailed life science inventory of the area and to assess its significant life science resources and their contribution as representational or unique features satisfying the life science protection objectives. This report describes the place of Sudden Bog in the region, its vegetation, and the planning considerations involved with significant features of flora and fauna. Appendices include lists of the vascular plants, birds, amphibians and reptiles of the bog, as well as the distribution in Ontario and North America of 6 provincially rare plant species.

Biological survey of Smoothstone Lake

by J.J. Merkowsky and W.W. Sawchyn. Regina : Saskatchewan Parks and Renewable Resources, Fisheries Branch, 1990. xi, 108 p. : ill., maps. Bibliogr. (Fisheries technical report ; 90-1)
MICROLOG 91-02279 2 fiche

Smoothstone Lake is located east of Dore Lake, 240 km northwest of Prince Alberta, and is road accessible. A limnological and fisheries investigation was carried out in the summer of 1988 to prepare a bathymetric map; to obtain data on the physico-chemical characteristics and biota; to carry out a biological survey of the net-plankton, bottom fauna and fishes; and to identify reasons for the apparently low productivity of fish in this lake. Information gathered was integrated with earlier data and used to estimate potential productivity, sustained yields, and population trends; makes recommendations on fishery utilization programs; and provides background information.

Biostratigraphy and conodont faunas of Upper Ordovician through Middle Devonian rocks, eastern Arctic Archipelago

T.T. Uyeno ; with contributions by U. Mayr and R.F. Roblesky. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1990. 211 p. : ill., maps. Bibliogr. (Bulletin ; 401) ISBN 0-660-13614-7 MICROLOG 91-04889 3 fiche

This investigation is part of a comprehensive taxonomic and biostratigraphic study of Silurian and Devonian conodonts of the Canadian Arctic Islands. The study areas encompasses the southwestern part of Ellesmere Island and northwestern part of Devon Island, including Grinnell Peninsula. It also includes Crescent, Hyde Parker, and Spit islands, three small islands located in the Penny Strait and to the west of Grinnell Peninsula. Seven stratigraphic sequences were examined, of which 3 surface sections are continuous. The report covers information on conodont faunas, gives a brief history and general geological-biostratigraphic summary, then details the stratigraphy and biostratigraphy of the area and the systematic paleontology of the conodont fauna.

Blackfly larvicide efficacy, bacterial distribution and regeneration of *Bacillus Thuringiensis* ser. H14 (BTH-14) in a 10 kilometer segment of the South Saskatchewan River : final report

by G. Khachatourians. Regina : Saskatchewan Agriculture Development Fund, 1990. 32 p. : ill. ISSN 0829-9455
MICROLOG 91-01882 1 fiche

Bacillus thuringiensis (BTH) ser. H14 is a biological control agent which specifically kills the larvae of mosquito and blackfly species. Commercial formulation of BTH-14 has been applied recently into the South Saskatchewan River near Prince Albert (Birch Hills ferry site) where blackflies cause considerable disturbance to livestock. The abatement program results in partial control and a success rate of 60-75 per cent. This study examined some underlying problems affecting the South Saskatchewan River blackfly abatement program and monitored the mortality of blackfly larvae up to 10 km downstream of the application site. The study examined naturally occurring aquatic bacteria; the distribution of BTH-14 spores, cells and crystal toxin in the river; determined blackfly larva associated bacteria and BTH-14 induced mortality; and examined the recycling potential in BTH-14 treated blackfly larvae.

Blood lactate response to the CF EXPRES step test : final report

by D.G. Bell and I. Jacobs. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1991. 18 p. Bibliogr. (DCIEM research report ; no. 91-RR-44)
MICROLOG 91-06060 1 fiche

Final report of a study to determine the blood lactate (LA) response to the Canadian Aerobic Fitness Test EXPRES step test. The study determined if LA could be used to predict maximal aerobic power (VO2max) from the EXPRES step test procedures and to compare this prediction with the current procedures which employ submaximal heart rate. One hundred thirty-seven male and 98 female Canadian Forces personnel between 18 and 25 years of age participated in the study. The LA concentration after each stage of the step test was measured in all subjects by sampling blood from the finger-tip. A sub-sample of this population, 90 males and 66 females, had their VO2max measured directly during a maximal treadmill run. LA and heart rate from stage 5 were correlated with the treadmill-determined VO2max.

Boitano Park, causes of tree decline : soil and vegetation analysis : report

submitted to the Roadside Tree Injury Committee ; by J.W. Van Barneveld and R.H. Louie. Victoria : Ministry of Environment, 1990. vii, 60 p. : ill. (MOE working report) ISSN 0821-0659 ISBN 0-7718-8748-8
MICROLOG 91-01158 1 fiche

In the spring of 1989, a number of inquiries regarding damage to trees near highways spanned much of the dry interior of the province, particularly in Boitano Park, Williams Lake. The Roadside Tree Injury Committee was set up to make an investigation into the causes of what appeared to be a wide-spread and visible problem. A preliminary investigation was made which involved testing for insect infestations or disease, inadvertent contamination from herbicides or pesticides, and soil sampling to investigate the likelihood of salt contamination. More comprehensive sampling and analysis of soil and vegetation was conducted to obtain

conclusive evidence of causes of tree injury in the park and the role of de-icing salt in the decline of the trees.

Borage agronomy and harvesting trials : 1987 research contract

Rogers Engineering Inc. Regina : Saskatchewan Agriculture Development Fund, 1987. ii, 31 p. : ill.
MICROLOG 91-04740 1 fiche

Borage is a semi-domesticated herb crop from which an oil rich in GLA (gamma linolenic acid) is extracted. The crop has an indeterminate flowering pattern, making it difficult to harvest, and no research has been done in Canada. This report covers various aspects of growing borage as a crop, including the oil quality of swathed vs vine ripened seed; herbicide screening; swathing time for the optimization of yield; the design of a swather seed catcher; the economic viability of a swather attachment to catch borage seeds; and moisture testing.

Bow/Canmore Corridor : environmental issues analysis

Cottonwood Consultants Ltd. Edmonton : Alberta Tourism, 1990. iv, 64 p. : maps. Bibliogr.
MICROLOG 91-05864 1 fiche

This study defined a wide range of environmental concerns and issues related to proposed tourism developments in the Bow/Canmore corridor, ranked them, and made some broad suggestions for reducing potential impacts. Significant opportunities and major problems are discussed for the issues of wildlife, fisheries, environmentally significant areas, vegetation, watersheds, cultural resources, terrain and soil, air quality, land use, aesthetic impacts, solid waste disposal, and abandoned mines. Specific proposed tourism developments are detailed. A discussion of the literature related to tourism and the environment, and an outline of the National Audubon Society's Tourism Code of Conduct, are also included.

Breeding sites of gulls, terns, and jaegers at Iles du Large, Resolution Bay, and along the west shore of Great Slave Lake, Northwest Territories

by J. Sirois, S.A. Alexander and S.E. Westover. Ottawa : Canadian Wildlife Service, 1991. 11 p. : maps. Bibliogr. (Progress notes : no. 192) French ed. (Sites de nidification des mouettes, goélands...) : 91-05902/1. ISSN 0069-0023 ISBN 0-662-48641-9
MICROLOG 91-04772 1 fiche

Great Slave Lake is the 5th largest lake in North America and the 2nd largest lake north of 60N. Its significance to migratory birds is poorly known, with larids (gulls and terns) the only colonial waterbirds that nest on the lake. In 1986, a comprehensive survey of all larid breeding sites on the lake was begun. This note presents the results of the 1989 survey conducted in June on the west shore between Whitebeach Point and Slave Point, at Resolution Bay, and at Iles du Large to determine the distribution and abundance of Caspian Terns and other larids and to assess these areas as potential key habitat sites for migratory birds. Caspian Terns are the focus of the study as they are classified as 'vulnerable' by the Committee on the Status of Endangered Wildlife in Canada.

British Columbia meeting market study

prepared by Pannell Kerr Forster, Management Consultants [and] Campbell Goodell Consultants Limited. Ottawa : Industry, Science and Technology Canada ; Victoria : Ministry of Tourism ; Ministry of Regional and Economic Development, 1990. 166 p. Summary report (44 p.) laid in. ISBN 0-7718-8957-7. MICROLOG 91-01677 3 fiche

British Columbia has received increasing national and international exposure in recent years due to the economic ties the province has forged in the Pacific Rim and the hosting of Expo '86 in Vancouver. One of the areas which has shown promising growth in recent years is the 'meeting market.' To date, little information specific to B.C. has been collected about the potential of the meeting market, particularly the larger meetings that attract over 100 attendees. The purpose of this study is to inventory the B.C. meeting product and determine and identify demand sources within Canada and the United States which have the greatest potential of travelling to B.C. for meetings and which, therefore, represent the best market opportunities for the B.C. meeting product. British Columbia seabird colony inventory, report no. 2 : west coast Moresby Island

by M.S. Rodway, M.J.F. Lemon and G.W. Kaiser. Edmonton : Canadian Wildlife Service, Pacific and Yukon Region, 1990. x, 163 p. : maps. Bibliogr. (Technical report series ; no. 65) ISSN 0831-6481 ISBN 0-662-16888-7
MICROLOG 91-04417 2 fiche

Detailed inventories of seabird colonies were conducted along the west coast of Moresby Island in 1985 and 1986 as part of the BC Seabird Colony inventory program. All colonies in Englefield Bay and off the south end of Moresby Island were surveyed. A few small colonies along the stretch of precipitous coastline between these two areas were not visited. Total or partial counts were made for surface-nesting species and small colonies of burrow nesters. Burrow densities on larger storm-petrel and alcid colonies were estimated using systematic sampling within quadrats surveyed along line transects. Due to time constraints, burrow occupancy rates were not obtained at most colonies, and population estimates were based on median occupancy rates at other colonies in the province. Major concerns to breeding seabird populations include the spread and potential impact of introduced mammalian predators, and disturbance caused by increasing recreational traffic, especially within the South Moresby National Park Reserve.
BC CA EV SC

British Columbia seabird colony inventory, report no. 7 : northern mainland coast

by M.S. Rodway and M.J.F. Lemon. Edmonton : Canadian Wildlife Service, Pacific and Yukon Region, 1991. xi, 182 p. : maps. Bibliogr. (Technical report series ; no. 121) ISSN 0831-6481 ISBN 0-662-18658-3
MICROLOG 91-04421 3 fiche

Detailed inventories were conducted of seabird colonies along the northern mainland coast in 1983, 1987 and 1988 as part of the BC seabird colony inventory program. All colonies of burrow-nesting species were surveyed. A few small gull colonies were not visited. Total or partial counts were made for surface-nesting species and small colonies of burrow nesters. Burrow densities on larger storm-petrel and alcid colonies were estimated using systematic sampling along strip transects or within quadrats surveyed along line transects. Burrow occupancy rates were not obtained at small storm-petrel and alcid colonies, and population estimates were based on median occupancy rates at other colonies in the province.

Brudenell-Cardigan Rivers Complex : watershed activities

prepared by Environment Canada, Inland Waters Directorate, Atlantic Region [and] P.E.I. Dept. of the Environment, Fish and Wildlife Branch. Ottawa : The Region ; Charlottetown : The Branch, 1990. ix, 27 p. : ill. Bibliogr. At head of title: The Canada-Prince Edward Island Water Management Agreement, Surface Water Program.
MICROLOG 91-00641 1 fiche

This report was produced as part of the Watershed Inventory Project under the Canada-Prince Edward Island Water Management Agreement. The research was initiated to gain a better understanding of the activities which may impact on the quality and quantity of surface waters drained by the Brudenell and Cardigan Rivers. Topics covered include: general characteristics of the Brudenell-Cardigan watershed complex, agricultural operations, fish and wildlife resources, recreational activities, fisheries operations, industrial operations,

alterations of natural features of waterways, wetlands, and additional activities affecting the watershed.

A Building and decorative stone inventory of selected map areas in New Brunswick

Three-D Geoconsultants Limited. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1991. ii, 253 p. : maps. Bibliogr. (Open file report ; 90-11) Fold. maps not filmed. ISSN 0712-4562
MICROLOG 91-03093 3 fiche

The purpose of this study was to identify stone deposits in New Brunswick that have the potential to be developed as new stone quarries. The study included a comprehensive review of available geological data to identify areas of potential interest for further field study. The characteristics, colour, texture and aesthetic appeal of the stone from selected field sites was assessed relative to the commercial market. Several criteria basic to quarrying potential, such as bed thickness, homogeneity of colour and texture, and proximity to an access road, were also evaluated.

Building energy analysis : a look into the future

by S.A. Barakat. Ottawa : National Research Council Canada, Institute for Research in Construction, 1987. 11 p. Bibliogr. (Paper ; no. 1521) Reprint from Third International

Congress on Building Energy Management, ICBEM '87.
MICROLOG 91-01600 1 fiche (Available on fiche only)

Recent developments and future trends in building energy analysis techniques and design tools are discussed in light of papers presented at the International Congress on Building Energy Management '87 session on building planning and design tools. The presentations cover both detailed and simplified tools, and their use in the analysis of energy conservation strategies and the development of simpler energy conservation guidelines. Presentations related to case studies on energy savings in practice, as well as occupant interaction, are also summarized.

Building stone potential in eastern Ontario, 1990

by P.S. LeBaron...et al. Toronto : Ministry of Northern Development and Mines, Ontario Geological Survey, 1990. xii, 368 p. : ill., maps. Bibliogr. (Mineral deposits circular ; 30) ISSN 0706-4551 ISBN 0-7729-6730-X
MICROLOG 91-00560 4 fiche

Development of the dimension stone industry in eastern Ontario began in the early 1800s with the use of local, easily quarried limestones, sandstones, granites, marbles and gneisses. The current resurgence in the use of building and decorative stone in both the commercial and residential markets offers an opportunity for expansion of the stone industry in eastern Ontario. This study provides both general guidelines for evaluating dimension stone prospects and detailed information on over 200 sites. The report also includes 1985 property report summaries and 1986 property examination reports of granite by location, of marble and of limestone. A list of granite properties examined in 1985-86 and a list of properties with polished samples are also included, as well as ASTM tests on granite and marble samples.

Bulletin de terminologie : astronautique -- 2e éd.

Ottawa : Bureau des traductions, Direction générale de la terminologie et des services linguistiques, 1973. xiii, 203 p. (Bulletin de terminologie ; 138) *Bilingue (Terminology bulletin : astronautics)*. MICROLOG 91-01123 3 fiche

L'astronautique est une science où se donnent rendez-vous des disciplines de tous ordres - électronique, physique, téléphonie, télévision, photographie, médecine, etc. - et où la recherche scientifique englobe une large part de l'astronomie, de la géophysique, de la physique nucléaire et de la chimie. Ce document fournit un bulletin de terminologie anglais-français sur ce domaine et donne les expressions définies dans les conventions internationales. Il englobe également l'argot de l'espace et les sigles couramment employés par les fuséologues et les agents des services techniques. Finalement, il donne une brève définition des termes polysémiques ou peu connus. CA PS SC TR

Bulletin des décisions prises à la suite d'évaluations initiales et des examens par commission indépendante -- 6e éd.

Hull, Québec : Bureau fédéral d'examen des évaluations environnementales, 1990. 40, 39 p. *Bilingue (Bulletin of initial...)*. MICROLOG 91-00068 1 fiche

Ce bulletin est publié trimestriellement par le BFEE. Il consiste en deux parties. La première est une liste des décisions prises à la suite d'une évaluation environnementale initiale. La deuxième est un résumé des projets qui font l'objet d'un examen public par une commission indépendante. • CA EV SC

Bulletin des décisions prises à la suite d'évaluations initiales et des examens par commission indépendante -- 7e éd.

Ottawa : Bureau fédéral d'examen des évaluations environnementales, 1990. 59, 58 p. *Bilingue (Bulletin of initial...)*. MICROLOG 91-02917 2 fiche

Ce bulletin est publié trimestriellement par le Bureau fédéral d'examen des évaluations environnementales. Il consiste en deux parties. La première est une liste des décisions prises à la suite d'une évaluation environnementale initiale. La deuxième est un résumé des projets qui font l'objet d'un examen public par une commission indépendante. Bulletin of initial assessment decisions and panel reviews -- 6th ed.

Hull, Que. : Federal Environmental Assessment Review Office, 1990. 39, 40 p. *Bilingue (Bulletin des décisions...)*. MICROLOG 91-00068 1 fiche

The federal Environmental Assessment and Review Process is used to implement government policy on environmental assessment. The process applies to proposals that are to be undertaken directly by the government; to which the government makes a financial commitment; that are located on federally administered land, including offshore; and that may have an environmental effect on an area of federal responsibility. This bulletin lists the

decisions on proposals from initial assessment by province and gives a summary of projects that are under public review by independent panels.

Bullying at school : Toronto in an international context

by S. Ziegler and M. Rosenstein-Manner.
 Toronto : Toronto Board of Education,
 Research Services, 1991. vi, 38 p. Bibliogr.
 MICROLOG 91-02351 1 fiche

At the request of the Board, a study was undertaken of the phenomenon of bullying among elementary schoolchildren. The three components of the study were: 1) a review of literature on the topic; 2) an exploration of what Toronto schoolchildren of different ages know and understand about bullying, using a story, discussion, and sometimes role-play to elicit this information in a whole-class context; and 3) collect data from students, staff and parents on the incidence, correlates and frequency of bullying in a random sample of Toronto elementary schools.

Business and information technology planning : general approach and methodology

by T. Russell, J. Evans and M. Fick.
 Toronto : Ministry of Revenue, 1988. i,
 58 p. : ill. (Growth management studies ; 1)
 ISBN 0-7729-4922-0
 MICROLOG 91-01496 1 fiche

In 1984 a series of studies was commissioned by the ministries as part of the development of an overall information technology strategy for the government. This is one of two studies undertaken by the Ministry of Revenue. The study demonstrates a general methodology for integrating business and technology planning and management, based on commonly accepted principles and best practices. The study has been revised to reflect recent experiences in technology management. The study covers the foundations and principles of improved technology planning and management, strategic direction and coordination, program-level planning and management, project design and implementation, life-cycle management of systems, and the role of independent reviews as an additional means of proofing projects before they are finally approved for implementation.

Cage culture of salmonids : final report on demonstration ADF project

by R. Alexander. Regina : Saskatchewan Agriculture Development Fund, 1989. 30 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-01768 1 fiche

Cage culture of rainbow trout has been investigated over the last 5 years in northern Saskatchewan lakes, but very little information is available on such production of other fish species. 1989 was the first year that certified disease-free stocks of Arctic char and brook trout were available from the nearest hatcheries. This project compared and examined cage culture production of Arctic char and brook trout with rainbow trout reared under northern Saskatchewan conditions. During the summer of 1989, rainbow trout, Arctic char and brook trout were obtained from 4 different hatcheries and stocked into Kames cages at Devil Lake in northern Saskatchewan. Production techniques, site selection, survivability, feed conversion and growth rates were examined.

Les Campagnes en faveur des droits des animaux : leur impact au Canada -- Rév.

par S. Dakers. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 22 p. Bibliogr. (Bulletin d'actualité ; 88-4F) L'éd. anglaise (Animal rights campaigns : their...) sur la même fiche. ISBN 0-660-93062-5 MICROLOG 91-02089 1 fiche

Ce bulletin décrit les effets néfastes de la dernière campagne sur les moyens de subsistance des chasseurs de phoque du Labrador et de Terre-Neuve et des Inuit du Nord canadien, qui ne chassaient que des phoques adultes. Il expose ensuite les répercussions qu'une campagne semblable pourrait avoir sur le piégeage et l'élevage des animaux à fourrure au Canada. Il aborde aussi deux autres activités sur lesquelles différents groupes sont parvenus à attirer sporadiquement l'attention publique et qui sont toutes désignées pour devenir les prochaines cibles des campagnes en faveur des droits des animaux au Canada.

MICROLOG 91-03763 9 fiche

Describes the three main goals of the Commission in incorporating both French and English into the cultural identity of Canada. These goals are: the equality that is proclaimed by the Constitution and the Official Languages Act, the quality of service, education and financial management all citizens are entitled to receive from government; and continuity of programs as well as consistency of motivations to ensuring the existence of these programs. The report discusses official languages from a national agenda perspective, with a look at affairs of state, language rights, and government policies and programs. The report also evaluates equality of language rights in federal institutions and gives an overview and a province-by-province review of minorities. Also discusses the promotion of second-language instruction in public schools. Appendices include a review of activities for the year and plans for the coming year; complaints, statistics, audit reports and publications list; and, new

linguistic profiles from the census.

The Canada Assistance Plan : no time for cuts

National Council of Welfare (Canada). Ottawa : The Council, 1991. 26 p. : ill. Bibliogr. French ed. (L'opportunité des réductions...) : 91-03990/1. ISBN 0-662-18600-1
MICROLOG 91-03293 1 fiche

Since its creation in 1966, the Canada Assistance Plan (CAP) has been an indispensable source of financial help for millions of low-income Canadians who find themselves with no other means of support at some time in their lives. This report provides a description of the Plan including the way it operates, the support it provides, and the people it helps. It also addresses the 1990 federal budget proposal to trim funds for CAP programs in Ontario, Alberta, and B.C. for the sole purpose of reducing the federal deficit.

Canada at risk : Canadian public policy in the 1990s

edited by G. Bruce Doern and Bryne B. Purchase. Toronto : C.D. Howe Institute, 1990. 255 p. : ill. Bibliogr. (Policy study ; no. 13) The papers in this volume were among the conference's background presentations at The Way We Will Be : a public policy conference for journalists. ISSN 0832-7912 ISBN 0-88806-259-1
MICROLOG 91-01951 3 fiche

This document contains papers presented at a two day conference of journalists held in April 1990. The papers assess the current and future role of the federal government at a time when there is an unprecedented sense of

malaise about the Canadian body politic. The papers involve two basic kinds of analysis. Papers in the first section deal with broad, crosscutting issues and parameters that shape and reflect the overall conduct of Canadian public policy. Papers in the second section deal with several important policy fields by looking back over the 1980s and earlier and projecting developments into the 1990s.

Canada Brick Quarry ground water survey : Annual report 1989-90

by D.H. Barber and A.Z. Mlynarczyk. Toronto : Ontario Hydro, Research Division, 1990. i, 178 p. : ill. Bibliogr. (Report ; no. 90-344-K) CSI 56125.012.
MICROLOG 91-05275 2 fiche

Lakeview Thermal Generating Station fly ash disposal at the Canada Brick Quarry began in December 1981, following the issuance of a Provisional Certificate by the Ontario Ministry of the Environment (MOE). The ash placement operation was completed as of December 1986, and final cover development for the quarry reclamation project is now in progress. A ground water monitoring program set by the MOE as one of the conditions for fly ash placement is still on-going. This report covers the analyses of ground water samples from September for the year, as well as previous ground water surveys.

Le Canada et la Convention de Ramsar : convention relative à la conservation des zones humides d'importance internationale

Ottawa : Environnement Canada, 1987. 11, 11 p. : ill. *Bilingue (Canada and the Ramsar Convention...).* ISBN 0-662-54973-2
MICROLOG 91-03102 1 fiche

Les terres humides ont une grande valeur en raison de leur productivité biologique très élevée, et ce fait a été officiellement reconnu à l'échelle internationale lorsque 18 pays ont signé en 1971 à Ramsar, en Iran, la Convention relative à la conservation des zones humides d'importance internationale. Comme on le sait, le Canada est devenu l'un des signataires de la Convention en 1981. Avec la collaboration des gouvernements provinciaux et territoriaux, le gouvernement du Canada a désigné jusqu'ici 17 zones humides, auxquelles plusieurs autres viendront s'ajouter en 1987. De ces 17, les zones suivantes sont examinées dans ce document: la pointe Mary, la réserve nationale de faune de Shepody, du cap-Tourmente, de Long Point, du lac de la Dernière-Montagne, d'Alaksen, du col Polar Bear, ainsi que les sites Ramsar au Canada.

Canada's Green Plan : Canada's Green Plan for a healthy environment

Ottawa : Government of Canada, 1990. ix, 174 p. : ill., maps. *French ed.* (Le Plan vert du Canada...). : 91-02055/2. ISBN 0-662-18291-X
MICROLOG 91-02054 2 fiche

This plan is Canada's reply to the Brundtland Report. It explains how Canada will manage the economy and the environment to attain sustainable development. The plan was developed through an extensive, national consultation process which began in March 1990 with the release of a background paper and continued with consultations between the federal government and people of all backgrounds. This document is the result of that process and covers principles for environmental action; the health and environment action plan; action to protect air and water; sustaining renewable resources, protecting unique ecosystems; action on global warming; division of responsibilities among the various players, including governments, industry, native peoples, consumers, and non-governmental organizations; federal government actions; and emergency responses to marine and non-marine spills.

Canada's law on child sexual abuse : a handbook

by M. Wells. Ottawa : Dept. of Justice, 1990. viii, 117 p. Bibliogr. *French ed.* (L'Exploitation sexuelle des...) : 91-03996/2. ISBN 0-662-17857-2
MICROLOG 91-05235 2 fiche

The changes to the Criminal Code and the Canada Evidence Act on January 1, 1988, created new child sexual abuse offenses and expanded the opportunities for courts to receive children's testimony in cases of child sexual abuse. This has major implications for professionals working with sexually abused children, particularly social workers who will find themselves increasingly participating in investigative activities and may be required to give evidence at criminal trials. This handbook outlines the criminal justice process and its principles; explains the law on child sexual abuse; discusses the need for the adaptation of investigative methods when a child sexual abuse case becomes a criminal justice matter; explains changes in the rules of evidence relating to child witnesses; and suggests roles child protection workers may assume under the new law.

Canada's timber supply : current status and outlook

by K.L. Runyon. Ottawa : Forestry Canada, Economics and Statistics Directorate, 1991. 132 p. : ill., maps. Bibliogr. (Information report ; E-X-45) French ed. (Approvisionnement en bois au Canada...) : 91-06702/2. ISSN 0705-3282 ISBN 0-662-18485-8
MICROLOG 91-06703 2 fiche

This report is the first phase of a long-term comprehensive assessment of Canada's timber supply and demand. Issues to be addressed include the current supply of timber in Canada and the future outlook; the principal factors/determinants affecting supply; how these factors have affected supply historically and how they might change over time; the policy and program options for affecting supply and the probable impacts; the possibility of realistically modelling supply and demand relationships to simulate impacts of a variety of policy and program options. This report addresses the first two of these issues based on recent provincial analyses. Allowable annual cut and recent harvest levels are given for each province and the issues, their problems and opportunities, are discussed. The issues include depletion, protection, land use changes, silvicultural investment, and economic, institutional and technological issues in harvesting and processing.

Canada, the Pacific and global trade

edited by Murray G. Smith. Vancouver, B.C. : Institute for Research on Public Policy, 1989. xviii, 200 p. Bibliogr. Papers presented at the Conference on Canada, the Pacific and the Uruguay Round and the Pacific Economic Cooperation Conference. ISBN 0-88645-100-0
MICROLOG 91-00594 3 fiche

This volume reports the proceedings of the Institute conference, which examines Canada's stake in expanding economic ties across the Pacific. The main conclusion emerging from the conference is that recent proposals for Pacific economic cooperation are widely perceived as motivated by desires for a new trade bloc. Instead, however, the current focus of Pacific economic cooperation is directed toward promoting progress in the Uruguay Round of GATT negotiations. In light of common concerns about unilateral trade actions by the U.S. and the European Community, strengthening the multilateral trading system is a key priority shared by Canada and other Pacific economies.

Le Canada--chef de file mondial en matière de biens et de services pour l'environnement

Ottawa : Affaires extérieures et commerce extérieur Canada ; Industrie, sciences et technologie Canada, 1989. 68 p.
MICROLOG 91-03265 1 fiche

Ce document fournit un répertoire visant à faire connaître les sociétés canadiennes qui fournissent des biens et des services pour la protection de l'environnement. Les renseignements fournis proviennent des réponses obtenues à la suite de l'envoi d'un questionnaire à toutes les entreprises engagées dans le domaine de l'environnement. En dépit des efforts déployés, ce ne sont pas tous les fournisseurs canadiens qui y sont mentionnés. On y donne également un index alphabétique des entreprises et des catégories de biens et services, ainsi que des renseignements sur le profil des entreprises.

Canada-British Columbia Agreement Respecting Floodplain Mapping : Annual report 1988-89

Ottawa : Environment Canada ; Victoria : Ministry of Environment, 1989. 19 p. : ill. CSI 32158.001. ISSN 1180-5684
MICROLOG 91-02391 1 fiche

The 10-year Agreement was signed in December 1987 to provide for the determination of the location and extent of selected floodplain areas, for the designation or interim designation of the mapped floodplains by the Ministers, and for the preparation and distribution of information about the floodplains to zoning authorities, governmental agencies, and to the general public. This annual report summarizes the progress made during the first year of the Agreement, covering the organization, the program for 1988/89, including

expenditures, public information, engineering studies, river surveys, and base mapping; and those areas designated as floodplain areas.

Canada-Newfoundland Water Quality Monitoring Agreement : Exploits River survey report, 1987-88

by S. Roussel, R. Arseneault and T. Blouin.
St. John's : Dept. of Environment and Lands,
Water Resources Division, Surface Water
Section ; Moncton, N.B. : Environment Canada,
Inland Waters Directorate, Water Quality
Branch, 1990. v, 98 p. : ill., maps. Bibliogr.
MICROLOG 91-03104 2 fiche

This report presents the results of the Exploits River Basin Recurrent Survey, conducted in the Fall of 1987 and the Spring of 1988 (low and high flows), as part of the Canada-Newfoundland Water Quality Monitoring Agreement. It is the first in a series of intensive studies to characterize selected rivers of Newfoundland by sampling water, bottom sediments, and biota in an integrated manner. The two principal objectives of the study were to gather data on the spatial heterogeneity of water quality parameters along the course of the Exploits River, and to determine the extent of heavy metal accumulation in bottom sediments and fish populations of the Red Indian Lake system.

Canada-U.S.-Mexico free trade negotiations : the rationale and the investment dimension

Ottawa : Investment Canada, 1990. 38 p. MICROLOG 91-01357 1 fiche

President Bush announced on August 8 that the United States and Mexico have undertaken to negotiate a free trade agreement. In order for Canada to be included in the initiative, the Government of Canada must formally request the President to enter into trilateral negotiations. This document explores some of the factors bearing upon the decision facing Canada. Its purpose is to set out arguments relevant to a decision on whether or not to join the U.S.-Mexico trade negotiations, and to provide preliminary material on investment regulations and flows, in the expectation that investment concerns will figure importantly in the negotiations.

This report is one of a series of investigations undertaken in 1986 in response to requests by both the mining industry and the mine regulatory authorities to examine, document and analyze the reasons for continuing rope failures, despite mandatory wire-rope examinations with electro-magnetic instruments at regular intervals. The rope tested is a head rope at International Nickel Company of Canada's Shebandowan mine at Shebandowan, Ontario. The rope is a 1 7/16 inch diameter, 1x176, full-locked-coil hoist-rope which was examined reel-to-reel and tested non-destructively with the Canadian Magnograph, Rotesco AC, and Rotesograph, with the American LMA-250, and with German WBK instruments.

Canada/NB MDA project on mine-shaft rope testing : testing of 1 7/16 in., FLC, H.R. (our rope no. 5)

by L.B. Geller...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iii, 46 p. : ill. Bibliogr. (Report ; MRL 90-053(TR)) MICROLOG 91-00387 1 fiche

Results described in this report constitute an integral part of a project undertaken in 1986 in response to requests by both the mining industry and its regulators to examine the continuing rope failures or near failures occurring despite mandatory wire-rope examinations with electro-magnetic (EM) instruments at regular intervals. This report analyzes the no. 2 head rope in Potash Co. of America's mine at Sussex, N.B. The rope had two short, relatively sound, sections at both ends, followed by rapid deterioration. EM testing was performed in the field with a Rotesco AC, Magnograph, and LMA-250 instrument. Six months later the rope was also tested reel-to-reel on the shop-floor with 5 instruments. This report gives the results of the testing.

Canada/NB MDA project on mine-shaft rope testing : testing of 1 1/2 in., 6x30, H.R. (our rope no. 7)

by L.B. Geller...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iii, 136 p. : ill. Bibliogr. (Report ; MRL 90-071(TR)) MICROLOG 91-01595 2 fiche

This report describes results from a project, undertaken in 1986, in response to requests by both the mining industry and the mine regulatory authorities, to examine continuing rope failures or near failures despite mandatory wire-rope examinations with electro-magnetic (EM) instruments at regular intervals. This is the 7th report in the series and analyzes the test results obtained both non-destructively and destructively on a 1 1/2 inch, 6x30, stranded hoist-rope. The rope was examined both in situ and on the shop-floor. In the field, EM testing was performed with one American (the LMA-250) and 3 Canadian (the Rotesco AC, Torescograph, and Magnograph) instruments. The same instruments, as well as a prototype version of a West German tester, were used on the shop-floor. The results are analyzed for repeatability, comparability, and levels of accuracy. Calculations are presented to document the legitimacy of comparing in situ EM test results with reel-to-reel results.

Canada/NB MDA project on mine-shaft rope testing : testing of 1 5/8 in., 18x7, NR, T.R., (our rope no. 8)

by L.B. Geller...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1991. iii, 21 p. : ill. Bibliogr. (Report ; MRL 91-057(TR)) MICROLOG 91-06274 1 fiche

This report is one of a series of investigations undertaken in 1986 in response to requests by both the mining industry and the mine regulatory authorities to examine, document and analyze the reasons for continuing rope failures, despite mandatory wire-rope examinations with electro-magnetic instruments at regular intervals. The rope tested is a tail rope at International Nickel Company of Canada's Shebandowan mine at Shebandowan, Ontario. The rope is a 1 5/8 inch diameter, 18x7, spin-resistant/non-rotating tail rope which was tested non-destructively with the Canadian Magnograph, Rotesco AC, and Rotesograph, with the American LMA-250, and with German WBK instruments.

Canada/NB MDA project on mine-shaft rope testing : testing of 1 3/4 in., 6x25, R.S., H.R., (our rope no. 10)

by L.B. Geller...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1991. iii, 43 p. : ill. Bibliogr. (Report ; MRL 91-002(TR)) MICROLOG 91-05143 1 fiche

This report is one of a series describing the results of an extensive project to examine, document, and analyze the reasons for mine-shaft wire-rope failures that continue to occur despite mandatory rope-examinations at regular intervals with electro-magnetic (EM) test instruments. The rope which is the subject of this report was used as a skip-hoist in Inco's Frood mine near Sudbury, Ontario. The rope was examined both in situ by its owners with a Rotesco AC instrument, and tested, reel-to-reel, on the shop floor with the Canadian Magnograph and Rotesograph, the American LMA-250, and the German WBK instruments. The results obtained are analyzed particularly for repeatability, comparability and levels of accuracy.

• CA CM NR PS SC

Canada/NB MDA project on mine-shaft rope testing : testing of 1 7/8 in., 34x7, NR, T.R. (our rope no. 9)

by L.B. Geller...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iii, 48 p. : ill. Bibliogr. (Report ; MRL 90-060(TR)) MICROLOG 91-00386 1 fiche

Results described in the report constitute an integral part of a project undertaken in 1986 in response to requests by both the mining industry and its regulators to examine the continuing rope failures which occurred despite mandatory wire-rope examinations with electro-magnetic (EM) instruments at regular intervals. This report analyzes the no. 7 tail-rope in shaft no. 2 of Denison-Potash Potash Co.'s Clover Hill mine at Sussex, N.B. The rope was reported as extensively corroded, with interstrand wear throughout the test length, and a 30 percent loss-of-breaking strength. The rope was examined both in situ and on the shop floor. In the field, EM testing was performed with a Rotesco AC instrument. Six months after the last field test, the rope was also examined reel-to-reel on the shop floor, with 5 instruments. Only 400-450 ft of the original 3,000 ft in situ length were available for shop-floor testing.

• AP CA CM NR PS SC

Canada/NB MDA project on mine-shaft rope testing : testing of 1 7/8 in., 34x7, NR, T.R. (our rope no. 12)

by L.B. Geller...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iii, 32 p. : ill. Bibliogr. (Report ; MRL 90-069(TR)) MICROLOG 91-01037 1 fiche

Sixth of a series of reports, begun in 1986, in response to requests by both the mining industry and the mine regulatory authorities to document, examine, analyse, and clarify continuing rope failures or near failures, despite mandatory wire-rope examinations with electro-magnetic instruments at regular intervals. The rope investigated was the no. PB3 tail-rope in shaft no. 1 of Potash Co. of America's mine at Sussex, N.B. The rope tested was in service for only 7 months and was nowhere near being discarded, so was tested in situ only. The results of the testing are reported and analyzed because of the unacceptably wide difference between the reported results. The reasons for the discrepancy are also examined.

• AP CA CM NR PS SC

Canada/NB MDA project on mine-shaft rope testing : testing of 2 1/4 in., 34x7, NR, T.R., (our rope no. 11)

by L.B. Geller...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1991. iii, 36 p. : ill. Bibliogr. (Report ; MRL 91-062(TR)) MICROLOG 91-06272 1 fiche

This report is one of a series of investigations undertaken in 1986 in response to requests by both the mining industry and the mine regulatory authorities to examine, document and analyze the reasons for continuing rope failures, despite mandatory wire-rope examinations with electro-magnetic instruments at regular intervals. This report analyzes the test results obtained in non-destructive testing on a tail rope at Bell Asbestos Mines Ltd., at Thetford Mines, Quebec. The rope was a 2 1/4 inch diameter, 34x7, spin-resistant/non-rotating tail rope which was examined in situ with the Canadian Magnograph and Rotesograph, as well as the American LMA-250, and with German WBK instruments.

Canada/Nova Scotia Forest Resource Development Agreement, 1982-89 : an overview

Canada. Forestry Canada. Ottawa : The Dept. Halifax : Dept. of Lands and Forests, 1990. 12, 12 p. : ill. *Bilingual (L'Entente Canada/Nouvelle-Ecosse...vue d'ensemble)*. MICROLOG 91-00548 1 fiche

This report deals primarily with the Canada/Nova Scotia Forest Resource Development Agreement (FRDA) which ran from 1982-89. In 1984, Canada and Nova Scotia signed the Forest Renewal Agreement (FRA) which ran concurrently with the FRDA until 1987. At this time FRDA was extended for 2 years and expanded to include features from the expired FRA such as augmenting forest renewal activities, increasing the number of group ventures, and heightening the level of resource and development of the forest resource. This report describes the objectives of FRDA and its programs, including forest resource enhancement on private and Crown lands, R&D, support services, education, information and evaluation, and forest nursery construction.

A Canadian challenge

by C. Dufour. Halifax : Institute for Research on Public Policy ; Lantzville, B.C. : Oolichan Books, 1990. 173 p. Bibliogr. ISBN 0-88645-113-2
MICROLOG 91-01717 2 fiche

This essay deals with the Conquest of 1763, the Rebellion of 1837, and many other historical events. It is a political essay on contemporary Quebec and Canada. It describes two parameters. The first concerns the fact that Canada is profoundly dependent on the conquest of 1763, and its appropriation of the political consequences that flow spontaneously from Quebec's specificity. The second focuses on the fact that within the geopolitical context of North America, it is to Quebec's advantage to have a politically functional Canada.

Canadian Forces aircrew ejection, descent, and landing injuries, 1 January 1975-31 December 1987

by W.R. Sturgeon. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1988. 16 p. : ill. (DCIEM research report ; no. 88-RR-56). MICROLOG 91-00061 1 fiche

From January 1, 1975 to December 31, 1987, 113 personnel were involved in front seat ejections and one individual ejected from the rear seat of a CF116 when the cockpit filled with smoke. This report analyses ejection sequence injuries according to the phase in which they occurred, determines the probable mechanisms of injury, and makes any pertinent recommendations for reduction in injury rate. • CA EX SC TR

The Canadian foreland of Chinese ports

by C. Comtois, F. Soulard and J.-P. Rodrigue. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 22 p. : maps. Bibliogr. (Publication ; no. 728). MICROLOG 91-00961 1 fiche

The Chinese port system is of major importance because of the growing importance of external trade in the development of the economy and because of the geographical location of the country. The very few studies conducted on the Chinese port system have concentrated on the hinterland, although a more important element is the size and economy of the foreland. This paper investigates how location factors affect interaction patterns; examines contemporary aspects of Chinese and Canadian ports; analyzes the impact of China's entry into world economic markets on marine transport; evaluates the Canadian forelands of Chinese ports; and analyzes investment policy implications, mainly in the maritime transport sector. PR PS QU SC TR

The Canadian Forest Fire Danger Rating System : an overview

by B.J. Stocks...et al. Victoria : Forestry Canada, Pacific Forestry Centre, 1989. 9 p. : ill. Bibliogr. In *Forestry Chronicle*: vol. 65, no. 6, 1989. MICROLOG 91-00091 1 fiche

Forest fire danger rating research in Canada was initiated by the federal government in 1925. Since then, 5 different systems have been developed, building upon each other and with increasing universal applicability across Canada. The current system has been under development since 1968. Two major subsystems provide numerical ratings of relative fire potential based solely on weather observations and variability in fire behaviour among fuel types (predicting rate of spread, fuel consumption, and frontal fire intensity). A third major subsystem is now being formulated, concerned with fire occurrence prediction. This paper briefly outlines the history and philosophy of fire danger rating research in

Canada, discussing in detail the structure of the current system and its application and use by fire management agencies throughout Canada. • CA FO SC

Canadian government housing expenditures : a ten year review

by J.D. Hulchanski. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1990. 12 p. Bibliogr. (Discussion paper ; no. 19). ISSN 0828-2412. MICROLOG 91-01087 1 fiche (Available on fiche only)

The 1990 federal budget specifies the distribution of \$140 billion. This document addresses the following questions: Where does housing fit into national spending priorities? What is the trend over the past decade? Can Canada afford to spend more on housing? And should priorities for budget expenditure and tax benefits be shifted? • CA CO SA

Canadian reserves as of January 1, 1980 : copper, nickel, lead, zinc, molybdenum, silver, gold

by W.H. Laughlin. Ottawa : Energy, Mines and Resources Canada, 1981. v, 32, v, 34 p. : ill. (Mineral bulletin ; MR 189) *Bilingual (Réserves canadiennes au 1er...)*. ISBN 0-660-50734-X. MICROLOG 91-00281 1 fiche

This report deals with the quantities of these metals contained in reserves of economically mineable (recoverable) ore for each producing mine and deposit committed for production in Canada as of January 1, 1980. These reserves were computed mainly on the basis of published or publishable information provided by mining companies. Data are presented, using a figure and several tables, on current reserves and on some possible sources of future reserves by province and by mine.

MICROLOG 91-02816 3 fiche

Small and medium sized businesses increase the chances of success for all kinds of individual and collective initiatives and ensure the development and maintenance of an economic and social fabric. This paper defines small and medium sized businesses, and offers a quantity of statistical data concerning the importance of their role in the economy. It discusses the necessary distinctions to be made between the terms entrepreneur and manager, and provides a detailed analysis of the major

advantages and problems peculiar to small- and medium-sized businesses in Canada. The purpose of the final portion of the paper is to sensitize the reader concerning what is being done about getting to know these businesses better.

The Canadian vegetation classification system : first approximation

National Vegetation Working Group, Canada Committee on Ecological Land Classification ; edited by W.L. Strong, E.T. Oswald, and D.J. Downing. Ottawa : Environment Canada, Canadian Wildlife Service, Land Conservation Branch, 1990. v, 22 p. Bibliogr. (Ecological land classification series ; no. 25). *French ed. (Le Système canadien...)* on the same fiche. ISBN 0-662-12726-0

MICROLOG 91-02022 1 fiche

The objectives of this report are: to describe the basic framework of a proposed vegetation classification system (first approximation), and to provide a mechanism for vegetation scientists and resource managers throughout Canada to participate in the development of this classification system. The system has seven levels defined by plant community physiognomy and species-dominance criteria. The composition of the upper four levels have been completed, whereas the remaining levels still require development. The report includes a rationale for the system, a description of the proposed system, its potential role in natural resources management, and a glossary of technical terms.

Canadian water quality guidelines for polychlorinated biphenyls in coastal and estuarine waters

by D.R.J. Moore and S.L. Walker. Ottawa : Environment Canada, Inland Waters Directorate, Water Quality Branch, 1991. vii, 61 p. : ill. Bibliogr. (Scientific series ; no. 186). *French ed. (Recommandations pour...polychlorobiphényles)* : 91-04403/1. ISBN 0-662-18769-5

MICROLOG 91-04402 1 fiche

Polychlorinated biphenyls (PCBs) are a complex group of chlorinated hydrocarbon compounds that are widespread in the environment. Serious concerns about PCB contamination have been raised because of their persistence in the environment, their tendency to bioaccumulate in biota, and their chronic toxicity effects on biota. These concerns have resulted in Canadian government actions to halt

the import and production of PCBs and ensure their safe disposal. In Canada and the US, water quality guidelines have been established at levels that ensure the protection of freshwater aquatic biota. However, whereas a water quality guideline has been established in the US for marine aquatic biota, none has yet been established in Canada. This report presents a Canadian water quality guideline for PCBs that ensures the protection and maintenance of marine aquatic biota by considering the physical and chemical properties of PCBs, their concentrations in the marine environment, their fate and persistence, their bioaccumulation, and their toxicity to marine biota.

Canadian Wildlife Lands Management Survey, 1989-90 : a final report to the Canadian Wildlife Management Community

by D. Arneson and S. Barber. Regina : Saskatchewan Parks and Renewable Resources, Wildlife Branch, 1990. 8 p. : ill.
Presented at the 1990 Wildlife Minister's Council of Canada Meeting.
MICROLOG 91-04078 1 fiche

The topic of management of 'wildlife lands' arose at the inaugural meeting of the Wildlife Ministers Council of Canada in the fall of 1989. A national survey was suggested to address questions about possible problems and opportunities in this area. The survey was designed in the summer of 1989, tested on a subjectively selected sample of the Canadian wildlife management community, and after being revised, was sent to all government agencies and non-government organizations in September 1989. This report presents the results of the survey and the views of these organizations on the values of wildlife lands, the merit of purchase of threatened lands, management problems, and non-governmental organization involvement, as well as other general comments.

**Cape Breton Senior Seminar for
Better Hearing : seminar proceedings**

Cape Breton Senior Seminar for Better
Hearing (1988 : Sydney, N.S.). Halifax : Co-
ordinating Council on Deafness of Nova Scotia ;
Cape Breton Parent Society for the Hearing
Impaired ; Senior Citizens Secretariat, 1988.
ix, 58 p. Bibliogr.
MICROLOG 91-03040 1 fiche

The objectives of the seminar were: to involve
the senior community and persons working in
the field of aging in an examination of the
nature and extent of hearing impairment in
seniors, to examine ways and means of
involving the deaf and hard-of-hearing senior
community more actively in self-help programs,
and to examine how technical aids could be
used to greater advantage with the senior
hearing impaired community. Summaries of
seminar presentations are included in this
publication along with information on the
seminar planning, program and participants.
Recommendations are included.

MICROLOG 91-06834 1 fiche

Ce document présente les résultats d'une
analyse du marché du travail pour des
travailleurs qualifiés dans six métiers de
l'industrie du bâtiment en Ontario (plombiers,
monteurs de tuyaux de vapeur, tôliers,
électriciens, mécaniciens en réfrigération et en
climatisation, et conducteurs d'engins de levage).
Pour réaliser cette étude, le ministère de la
Formation professionnelle a fait un sondage
auprès des titulaires de certificat dans les six
métiers en question pour déterminer certaines
caractéristiques relatives au marché du travail,
comme la situation professionnelle actuelle
(appartenant ou non à la population active), les
nombres de travailleurs employés et de
travailleurs sans emploi, les emplois occupés
par les travailleurs et les secteurs de
l'industrie dans lesquels ils travaillent, et enfin
le recyclage nécessaire pour les titulaires de
certificat. Ce document présente les
caractéristiques du marché du travail pour ces
six métiers de l'industrie du bâtiment.

Carbon monoxide as indicator for early detection of spontaneous heating in stored coal : an exploratory study : final report

by N. Berkowitz. Edmonton : Berkowitz Consulting Inc., 1990. 37 p. : ill. Bibliogr. CANMET contract: 23440-8-9067-01-SQ.
MICROLOG 91-06109 1 fiche

While the mechanisms of 'spontaneous combustion' of coal are now quite well understood, and hazards from it can be minimized, there still exists no means for reliably locating and monitoring developing hot spots within coal piles. This study measured CO concentrations at specified locations in a pile and used these data for construction of CO concentration surfaces which, by their departure from planarity, indicated hot spots. This concept was based on the fact that atmospheric oxidation of coal generates carbon monoxide. The concept was evaluated in the laboratory by using a 45 mm cubic reactor into which gas could be injected through a series of ports and gas samples withdrawn from porous monitor tubes which traversed the reactor. Experiments centred on simulated coal oxidation, as well as O₂-sustained oxidation of coal at elevated temperatures.

The Caribou Workshop : proceedings

editor: D. Hebert. Victoria : Ministry of Environment, Wildlife Branch, 1990. 74 p. : ill. MICROLOG 91-00132 1 fiche

Caribou habitat and merchantable timber for logging are in direct conflict, and the present management and planning systems are not capable of providing adequate solutions. The problem is further compounded by the lack of population inventory and the need for a better understanding of the role of the wolf as a major limiting factor. These workshop reports outline some of the inventory methods and procedures being used or tested which will eventually improve population estimates. Similarly, the discussion surrounding habitat and predation limiting factors demonstrated the potential and increasing impacts of wolf predation and the need for more detailed and intensive research.

The Case for a United Nations verification agency : disarmament under effective international control

by A.W. Dorn. Ottawa : Canadian Institute for International Peace and Security, 1990. 41 p. Bibliogr. (Working paper ; no. 26) ISBN 0-662-18029-1
MICROLOG 91-00446 1 fiche

It is now universally recognized that arms control treaties should be effectively verified. The best way to verify the majority of multilateral treaties would be through a new agency under the U.N. As a cooperative international effort to develop both the technology and the political framework for arms control verification, a U.N. verification agency would speed up and help secure the disarmament process by verifying a number of existing and future treaties, investigating alleged breaches of treaties, and certifying that voluntary arms control and confidence-building measures have been carried out. This paper presents the case for such a proposal, outlines a possible institutional configuration, considers

the possibilities for growth, and discusses the challenges facing the establishment of such an agency.

Case studies on air system improvements for intercity buses

by Pierre de Gagné, Ed Sloat, Marilyn Eaman ; Deluc ; in association with TES Limited, and Concord Scientific Corporation. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1990. xiii, 102 p. : ill.
MICROLOG 91-02500 2 fiche

A common problem with intercity buses in late fall and early spring is the build-up of fog on the interior of the driver's windshield, making it difficult to use the side mirrors. In order to develop a strategy to improve passenger compartment noise reduction and air quality, a testing program was developed to evaluate the climatic control system. This report presents the results of tests using a Prevost Marathon XL Intercity Coach. Two types of washable filters and two types of disposable filters were tested, with two of the four filters electrostatically augmented.

Cast irons from Les Forges du Saint-Maurice, Quebec : a metallurgical study

by H. Unglik. Ottawa : Parks Canada, National Historic Parks and Sites Branch, 1990. 55 p. : ill. Bibliogr. (Studies in archaeology, architecture and history) French ed. (Fontes provenant des Forges du...) : 91-01071/1. ISSN 0821-1027 ISBN 0-660-13598-1
MICROLOG 91-00625 1 fiche

Results of a metallurgical investigation carried out on 12 cast-iron artifacts from Les Forges du Saint-Maurice, Canada's first ironworks. The 18th-19th century iron-working site is situated near Trois-Rivières, Québec, and has been extensively excavated over the past 10 years. The material was recovered from a domestic area north of the blast furnace with a relative chronology covering the 4 different occupational periods. The macrostructure, microstructure, hardness, and chemical analysis of grey, mottled, and white irons are presented, with a short history of the site. The results of the examination are used to characterize the material, its composition, structure, and foundry and mechanical properties. Manufacturing methods of the cast irons and technological development of the ironworks are considered and comparisons are drawn between the cast irons from Les Forges and cast irons from other iron-working centres.

Castone-composite building panel

by G.J. Blanchard. Ottawa : Canada Mortgage and Housing Corporation, Project Implementation Division, 1990. 35 p. : ill. MICROLOG 91-06295 1 fiche

The Castone composite building panel provides an interior/exterior surfacing alternative to brick or conventional siding materials, without the costs and application problems associated with them. It represents an improvement over prior art composite building panels, since the surface of the panel can be made to replicate any conventional surfacing material, either natural or man-made, in texture and appearance, while exceeding the insulative properties. In addition, the panels are relatively lightweight, can be easily installed even by the inexperienced, and the work can be done year-round. This report describes the development of the panels, their construction, and test results with freeze thaw cycles, air leakage, water infiltration, and surface burning.

Catch, effort and biological data of fish, in particular lake trout *Salvelinus namaycush*, from Prelude and Prosperous lakes, Northwest Territories, 1973 and 1979

by M.M. Roberge, J.B. Dunn and M.R. Falk. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1990. v, 52 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 817) This is the 52nd data report from the Central and Arctic Region. ISSN 0706-6465
MICROLOG 91-01783 1 fiche

Prelude and Prosperous lakes receive fairly heavy sport fishing pressure from residents and non-residents of Yellowknife, since they are along the Ingraham Trail, and they provide ideal habitat for lake trout, one of the most important sport fish species in the NWT. In 1973, a survey was conducted on lakes along the Ingraham Trail, including Prelude and Prosperous lakes. Data were collected on the biology and limnology of these lakes. During the 1970s, concerns were raised locally that both lakes were being over-fished, resulting in a decline in the availability of game fish. In 1979, in response to this concern, an investigation of the status of the lake trout in Prelude and Prosperous lakes was undertaken. This report presents the biological data collected during this study and an expansion of the biological data collected in 1973. Catch and effort data on the sport fishery occurring on both lakes in 1979 are also included.

Catch-fluctuation patterns of *Todarodes pacificus* (Steenstrup) in northern Japanese coastal waters of the Pacific Ocean

by Y. Ogawa and T. Sasaki. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1991. 88 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5523) Originally published in Japanese, in Japan. ISSN 0704-3716
MICROLOG 91-04124 1 fiche

The squid angling fishery is one of the important coastal fisheries, particularly for small fishermen, around the Sanriku areas of the northern Japanese coastal waters of the Pacific Ocean. The annual winter catch fluctuates and has been at a low level since 1973. This paper analyzes catch fluctuations and their characteristics; discusses the changes in the structure of catch groups in relation to resource changes; analyses the biological and hydrological aspects of catch fluctuations; analyses the importance of environmental effects; and discusses the possibility of catch forecasts.

Cathodic protection for the rehabilitation of concrete parking structures

Robert Halsall and Associated Limited. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1990. vi, 74 p. : ill. Bibliogr.
MICROLOG 91-05046 1 fiche

This report documents the present state of knowledge about cathodic protection (CP) systems for concrete parking structures. It explains the principles behind cathodic protection; covers basic design considerations and the systems currently available; outlines the information which should be obtained about a specific structure to evaluate rehabilitation

strategies and the suitability of cathodic protection; presents criteria that can be used to compare cathodic protection to other rehabilitation methods; and contains recommendations for the physical installation and the monitoring and operating phases.

CDT répertoire des projets, 1991

Centre de développement des transports (Canada). Montréal : le Centre, 1991. viii, 152 p. : ill. Bibliogr. L'éd. anglaise (TDC project directory, 1991) : 91-05174/2. CSI 22293.002F. ISSN 0225-6444 ISBN 0-662-96807-7
MICROLOG 91-05173 2 fiche

Ce répertoire annuel, le onzième de la série, traite des travaux de recherche et de développement du Centre de développement des transports (CDT) de Transports Canada. Dans cette édition, le Répertoire présente une sélection des études et des actions entreprises, et en cours, entre janvier 1989 et juin 1990. Il se divise en cinq chapitres correspondant aux cinq grands axes de R et D en transports auxquels le CDT s'intéresse, soit maritime, aérien, routier, ferroviaire et accessibilité des transports. Pour chacun des projets décrits sont donnés la raison d'être, les objectifs fixés et les moyens mis en oeuvre ainsi qu'un bref aperçu de l'état des travaux. Suivent le nom des contractants, le calendrier prévu, la provenance des fonds et d'autres détails. Une liste des récentes publications du CDT figure à la fin de l'ouvrage.

Ce que femme veut : guide d'action personnelle et politique

par P. Kome. Ottawa : Conseil consultatif canadien sur la situation de la femme, 1989. 76 p. Bibliogr. L'éd. anglaise (Every voice counts...) : 91-02364/1. ISBN 0-662-95297-9
MICROLOG 91-03391 1 fiche

À l'aube des années 90, riches d'importants progrès fraîchement réalisés, les Canadiennes revendiquent un juste accès au pouvoir et leur juste place dans la prise des décisions. Or en dépit de tous ces acquis, il leur reste encore beaucoup de pain sur la planche. Ce guide d'action personnelle et politique a pour but d'aider les Canadiennes à entrer dans l'action et de tirer pleinement profit de chaque geste. Elles y apprennent à cerner les questions qui les préoccupent et à fixer des objectifs en conséquence, à mettre sur pied

une cellule, à se rallier l'appui de la population, à profiter au mieux des médias et à faire valoir leur position auprès du public et des autorités. Bref, ce guide fournit les moyens pour forcer les changements qui s'imposent.

Celgar Expansion Review Panel : final report

Celgar Expansion Review Panel. Vancouver, B.C. : The Panel, 1991. xii, 98 p. : ill., maps. Bibliogr.
MICROLOG 91-03871 2 fiche

Celgar Pulp Co. is proposing to expand its bleached kraft pulp mill on the Columbia River at Castlegar, B.C., using the best available environmental control technology to reduce discharges of most of the harmful substances into the air and water from current levels, on an absolute basis. The review panel was appointed in June 1990 to conduct an independent public review of the environmental and associated social effects of the proposed expansion, including any effects that are external to Canadian territory. This final report covers the process up to the production of this report, as well as the main issues involved in the expansion. These include wood chip supply, transportation, pulp mill process, water quality and aquatic resources, air quality, and economic, social and community issues. Comments on the review process are also included.

Celgar Expansion Review Panel : interim report

to the federal Minister of the Environment, the federal Minister of Fisheries and Oceans and the British Columbia Minister of Environment. Victoria : The Panel, 1990. 13 p. MICROLOG 91-01691 1 fiche

Celgar Pulp Co. is proposing to expand and modernize its bleached kraft pulp mill on the Columbia River, at Castlegar, B.C. The proposal is for a doubling in production, using the best available environmental control technology to reduce discharges of most of the harmful substances into the air and water from current levels, on an absolute basis. All of the wood fibre requirements could be met through purchase of surplus wood chips from sawmills and from pulp logs not now used in the area. This interim report is to inform ministers and the public of the review process to date, and to present the Panel's conclusions on the overall acceptability of the project. The report gives a description of the process and the hearings; a summary of representations on air and water quality, availability of wood chip supply and transportation; and the Panel's conclusions on these 3 aspects of the proposal. • BC CA EV FO PR SC

Cement pore water natural analogue : preliminary report

by R. Dayal and K.E. Eagleson. Toronto : Ontario Hydro, Research Division, 1990. ii, 54 p. Bibliogr. (Report ; no. 90-208-K) MICROLOG 91-03184 1 fiche

The hyperalkaline water of the Maqarin Area, Jordan, exhibits a unique geochemistry, closely representing a cement pore water environment. The purpose of this report is to present the preliminary results of a geochemical modelling exercise performed to test the predictions of trace element speciation and solubilities in the hyperalkaline environment of the Maqarin Area. Specific topics include: the Contadora Peace Initiative, the Arias Peace Plan, and parliamentary action. A chronology and bibliography complete the paper. CA CI EX

by M. Rossignol. Ottawa : Library of Parliament, Research Branch, 1990. 22 p. Bibliogr. (Current issue review ; 88-10E) French ed. (Amérique centrale : le processus...) on the same fiche. Revised September 26 1990. ISBN 0-660-13894-8 MICROLOG 91-04804 1 fiche

Because of the human suffering, economic problems and international tensions resulting from conflicts in Central America, the people of that region, together with their neighbours and friends, have been striving for years to bring about a lasting peace. Years of conflict have left the social and economic infrastructures damaged, and the difficult task of reconciling the antagonists has been compounded by the involvement of the great powers in this regional conflict. This paper gives an overview of the work done so far to bring peace to Central America and indicates the Canadian contribution to this process. CA CI EX

Centralized and decentralized stochastic models in telecommunication networks

by B. Sanso, F. Soumis and M. Gendreau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 23 p. Bibliogr. (Publication ; no. 731) MICROLOG 91-00965 1 fiche

This paper presents and compares two routing models characterized by two different routing policies for circuit-switched telecommunications networks. The first model is for a centralized optimization routing policy while the second model obeys a decentralized type of routing. Both models are formulated so that the stochastic character of the demand is taken into account. The two models are solved by the same type of algorithm, a convex simplex implementation, adapted differently according to the model. Comparative results between the two policies are discussed. Challenge paper

Ontario Round Table on Environment and Economy. Toronto : The Round Table, 1990. 37 p. Bibliogr.
MICROLOG 91-01090 1 fiche

The purpose of this document is to provide a foundation for implementing sustainable development in Ontario. Part I describes the mission of the Ontario Round Table and its six guiding principles. It also outlines a process for developing multisectoral involvement. Part II illustrates the application of the six principles to six topic areas: water, forests, food and agriculture, waste, the atmosphere, and cities and towns. Each topic area outlines directions for change, examples of what individuals and organizations are already doing, and suggested milestones or targets to evaluate future progress.

Challenges of labour adjustment : the case of immigrant women in the clothing industry -- Rev.

by S.B. Seward. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1990. xi, 39 p. Bibliogr. (Discussion paper ; 90.B.1) Revised and expanded version of a paper originally presented at the National Symposium on Demography of Immigrant Racial and Ethnic Groups in Canada. CSI 99545.213.
MICROLOG 91-04983 1 fiche

The clothing industry is a classic example of a sector that faces severe import competition.

This paper describes past and current adjustment programs aimed at the textile and clothing sector. It focuses on a description and evaluation of the labour adjustment component of these programs, and on a description of the demographic characteristics of the labour force in the clothing industry, based on 1986 Census data. The emphasis is on a description of the characteristics of immigrant women workers. It also examines the relationship between demographic characteristics of workers and their capacity to adjust. Finally it discusses the need for more effective labour adjustment policies and programs which are designed to meet the needs of the labour force of the clothing industry, including those of immigrant women.

Les Changements dans la consommation d'alcool au Québec : principales données

Québec : Gouvernement du Québec, Ministère de la santé et des services sociaux, Direction générale de la planification et de l'évaluation, 1990. xvi, 45 p. : ill. Bibliogr. (Collection données statistiques et indicateurs ; 6)

CSI 66130.209. ISBN 2-550-20997-4 MICROLOG 91-05580 1 fiche

Après avoir tracé un portrait récent de la consommation d'alcool au Québec à partir des données de l'enquête Santé Québec, ce document fournit des statistiques pour les principaux groupes d'âge de la population masculine et féminine, sur le type de buveur, sur les quantités d'alcool consommées, sur la fréquence de consommation, et sur l'abus de l'alcool. Il fait également ressortir les principaux changements dans la consommation d'alcool survenus principalement au cours de la dernière décennie. Les statistiques sur le volume des ventes montrent quelle a été l'évolution de la consommation d'alcool per capita. Les statistiques des enquêtes Santé Canada (1978-1979), Promotion de la santé (1985) et Santé Québec (1987) révèlent pour leur part quelles ont été les modifications dans les habitudes de boire des hommes et des femmes, des jeunes et des adultes, et des buveurs excessifs. Finalement, le document présente quelques données permettant de situer le niveau de consommation d'alcool des Québécois par rapport à celui des populations des autres provinces canadiennes, et plus particulièrement par rapport à celui des Ontariens. Changes in Eastern Europe : implications for developing countries

by S. Griffith-Jones. Ottawa : International Development Research Centre, 1990. 41 p. Bibliogr. (Manuscript report ; 276e) MICROLOG 91-01857 1 fiche (Available on fiche only)

This paper looks at the size of East European economies, and their links with the international economy. It examines briefly the nature of economic and political changes in eastern Europe, and makes some comments about possible likely trends. It also looks at the implications of these changes for less developed countries (LDCs), focusing mainly on effects on trade and financial flows. Finally it draws out the main conclusions and defines areas of further economic research potentially relevant to LDC policy makers. CA CO EX

La Charte des droits : libertés fondamentales et liberté de circulation et d'établissement -- Rév.

par M. Dunsmuir. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 35 p. Bibliogr. (Bulletin d'actualité ; 84-16F) L'éd. anglaise (Charter of Rights and Freedoms...) sur la même fiche. ISBN 0-660-93024-2
MICROLOG 91-02019 1 fiche

La Charte canadienne des droits et libertés est entrée en vigueur le 17 avril 1982. Cette analyse porte sur deux de ses dispositions qui traitent de sujets d'une importance vitale pour les Canadiens. Sous la rubrique 'Libertés fondamentales', l'article 2 de la Charte énonce que chacun a les libertés fondamentales suivantes: la liberté de conscience et de religion, la liberté de pensée, de croyance, d'opinion et d'expression, y compris la liberté de la presse et des autres moyens de communication. La liberté de réunion pacifique et d'association est aussi garantie sous la même rubrique. De plus, l'analyse aborde également l'article 6, qui pour sa part, reconnaît à tout citoyen canadien le droit d'entrer au Canada, d'y demeurer ou d'en sortir.
CA JU

Charte des droits et libertés : droits démocratiques

par M. Dunsmuir. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 20 p. Bibliogr. (Bulletin d'actualité ; 90-5F) L'éd. anglaise (Charter of Rights and...) sur la même fiche. ISBN 0-660-93275-X
MICROLOG 91-06064 1 fiche

Les articles 3 à 5 de la Charte garantissent les droits démocratiques fondamentaux, soit le droit de vote, le droit de présenter sa candidature à une élection, les sessions régulières des organes législatifs fédéral et provinciaux, et la tenue obligatoire d'élections tous les cinq ans, sauf en période de guerre ou d'insurrection. Ce document se penche sur les droits démocratiques de la Charte des droits et libertés et examine particulièrement les points ci-haut mentionnés.
CA JU

La Charte des droits et libertés : garanties juridiques -- Rév.

par C. Morris. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 42 p. Bibliogr. (Bulletin d'actualité ; 83-15F) L'éd. anglaise (The Charter of Rights and...) sur la même fiche.

sur la même fiche. ISBN 0-660-93023-4
MICROLOG 91-02010 1 fiche

Cette analyse a pour but de déterminer comment les 'garanties juridiques' prévues dans certains articles de la Charte canadienne des droits et libertés ont influé sur l'ensemble du droit criminel depuis le 17 avril 1982. Le document se limite donc à des questions de droit criminel, puisqu'il s'agit de l'objet principal des articles de la Charte. Il passe en revue les points suivants: le droit à la vie, à la liberté et à la sécurité; la protection contre les fouilles; les perquisitions et les saisies abusives; les droits des personnes mises en état d'arrestation; les exigences relatives à certaines affaires criminelles et pénales; et, la protection contre les traitements ou peines cruels et inusités.

MICROLOG 91-04867 1 fiche

The Charter came into force on April 17, 1982. The purpose of this analysis is to determine the effect that certain sections of the Charter dealing with 'legal rights' have had on existing criminal law since then. The relevant sections of the Charter are 7 to 14 inclusive. They deal with such matters as the right to life, liberty and security; the right to be secure against unreasonable search and seizure; the rights of an accused upon arrest; the right of an accused to certain proceedings in criminal and penal matters; and the right not to be subject to cruel and unusual punishment.

Charter of Rights and Freedoms : mobility rights

by K. Douglas and M. Dunsmuir. Ottawa : Library of Parliament, Research Branch, 1990. 11 p. Bibliogr. (Current issue review : 90-4E) French ed. (*La Charte des droits...*) on the same fiche. ISBN 0-660-13924-3
MICROLOG 91-06065 1 fiche

The Canadian Charter of Rights and Freedoms came into force on 17 April 1982. This analysis concentrates on section 6 of the Charter which gives every citizen the right to enter, remain in, and leave Canada. It also gives both citizens and permanent residents the right to move into any province and pursue economic gain. However, these latter rights can be reduced by certain categories of provincial laws, as well as affirmative action programs. This report also discusses these restrictions.

Chemical composition and mutagenicity of Clover Bar landfill leachates

by B.L. Baker, K.R. Parker and E. Peake. Edmonton : Alberta Environment, Research Management Division, 1981. viii, 43 p. : ill. Bibliogr. (RMD report : 81/5)
MICROLOG 91-02978 1 fiche

The Clover Bar landfill site is located just east of the city of Edmonton and accepts mainly

municipal wastes with some industrial and hazardous wastes. It is these hazardous wastes which present particular problems in the composition of the leachate. This study was conducted to determine a partial list of organic compounds leached from the site; a range in mutagenic activity of leachate and effluent waters from the site, and to recommend a methodology for the assessment of specific organic compounds and mutagens (potential carcinogens) in a leachate. Analysis was conducted on 7 samples for total organic carbons, chemical oxygen demand, suspended solids, tannins and lignins, carbohydrates, alkane hydrocarbons, sulphur compounds, polycyclic aromatic hydrocarbons, polar compounds, organic acids, and polychlorinated biphenyls.

Children first : report

Ontario. Advisory Committee on Children's Services. Toronto : The Committee, 1990. 148 p. : ill. Bibliogr. ISBN 0-7729-7853-0
MICROLOG 91-03527 2 fiche

This document presents the new realities and challenges that are facing families and the service systems that endeavour to provide supports to families. It develops the concept of children's entitlements which provides the philosophical basis for the Committee's work, and examines the current service system and its capacity to meet the changing needs of children and their families. It also presents new goals for a responsive system of supports and services. In addition, it examines the organization of supports and services, economic measures, and legislation, and considers reorganization of the systems that govern the delivery of services, both within the community and at the provincial level of government. Finally, it presents recommendations for change.

Citizenship and the adult education movement in Canada

by G. Selman. Vancouver, B.C. : University of
British Columbia, Centre for Continuing
Education ; International Council for Adult
Education, 1991. x, 168 p. Bibliogr.
(Monographs on comparative and area studies
in adult education) ISBN 0-88843-190-2
MICROLOG 91-04204 2 fiche

This article outlines the history and background
of adult education in the area of citizenship in
Canada. The political theories underlying some
of the concepts of adult education are
discussed in terms of liberal individualism, the
welfare state, mass democracy, and
participatory democracy. Citizenship education
is seen in its historical context, and the role of
various organizations such as Frontier College,
the Antigonish Movement, etc. in citizenship
education are outlined. In contrast to the
United States, the impact of programs in adult
citizenship education have had a strong impact
on Canada and Canadians.

Clayoquot Sound Sustainable Development Task Force : report

to the Minister of Environment, and Minister of
Regional and Economic Development.
Victoria : The Task Force, 1991. ii, 96 p.
ISBN 0-7726-1232-3
MICROLOG 91-04207 2 fiche

Long standing disputes over development vs
environmental protection prompted the creation
of the Clayoquot Sound Sustainable Development
Task Force in August 1989. The terms of
reference include the identification of areas
where timber harvesting could occur in the
short term to minimize disruption to the logging
industry, and, until its recommendations were
made to government, the normal forestry
planning processes in the area would be
suspended, and to prepare a sustainable

development strategy for Clayoquot Sound, ensuring that all aspects of development are addressed, including social concerns, aesthetics, and economic development opportunities and requirements of all the resource sectors. This report describes the recommended process, including the composition and selection of a new steering committee, and a detailed outline for undertaking the strategy and what is required for administrative support and consultation with the interests involved at different stages in the process.

Le Climat du Grand Toronto

par H. Auld...et al. Ottawa : Service de l'environnement atmosphérique, 1990. xii, 77 p. : ill., cartes géogr. Bibliogr. (Etudes climatologiques ; no 41) (Le Climat des villes canadiennes ; no 5) L'éd. anglaise (The Climate of...) : 91-01112/1. ISBN 0-660-92941-4
MICROLOG 91-01113 1 fiche

Cette publication décrit les caractéristiques et d'autres aspects du climat de Toronto. Dans l'introduction, on examine les quatre saisons distinctes qu'on retrouve dans la région. La partie I décrit brièvement les influences géographiques et topographiques qui façonnent le climat. La partie II donne des détails sur plusieurs éléments climatiques, y compris la température, les précipitations, le vent, les nuages et l'ensoleillement, de même que les phénomènes météorologiques désagréables et violents. La partie III examine l'influence du climat sur les activités humaines à Toronto. Dans la partie IV, on examine le climat de l'avenir, de même que sont influence éventuelle sur les Torontois. Dans la partie V, on compare le climat de Toronto à celui d'autres villes du Canada et du monde entier. A la fin de la partie V, vous trouverez un glossaire qui définit certains termes techniques; ces termes sont en caractères gras dans le texte la première fois qu'ils apparaissent. On a inclu des annexes pour donner des renseignements supplémentaires sur les valeurs climatiques moyennes ou sur les événements météorologiques du passé qui sont

dignes d'attention.

Le Climat syndical au Canada

Ottawa : Travail Canada, 1987. 40, 40 p. : ill. Bibliogr. Bilingue (The Canadian labour climate). CSI 21114.202. ISBN 0-662-55039-0
MICROLOG 91-02438 1 fiche

Les relations du travail suscitent un grand intérêt parmi les hommes politiques canadiens et leurs divers partenaires économiques et sociaux, un intérêt que partage la communauté internationale, notamment les investisseurs éventuels. Cette brochure résume concrètement en quelque sorte les réalisations effectuées en matière de relations du travail, l'environnement dans lequel elles se situent et la compétitivité du Canada à l'échelle internationale. La première partie présente des indicateurs en matière de relations du travail, tels que le niveau des règlements salariaux, les arrêts de travail et les communications entre employeurs et salariés. La deuxième partie décrit l'état actuel de la négociation collective, tandis que la troisième traite des facteurs dont dépendent la productivité et la compétitivité du Canada. Quant à la quatrième partie, elle expose les questions qui intéressent actuellement les syndicats, les chefs d'entreprise et les pouvoirs publics.

Climate warming? Exploring the answers

by J. Lilley and C. Webb. Edmonton : Environment Council of Alberta, 1990. 73 p. : ill. Bibliogr.
MICROLOG 91-01482 1 fiche

Report presenting the essential elements of the climate change issue, including the dynamics of greenhouse warming, a description of the greenhouse gases (CO₂, methane, nitrous oxide, ozone and chlorofluorocarbons), and the consequences and causes of ozone depletion; the effects of climate change on temperature, precipitation, forests, agriculture, and biological diversity; climate models; and the response to climate change. Measures which could be taken to reduce this change are identified, including reducing fossil fuel use and greenhouse gases; mitigative and adaptive strategies; and such economic instruments as a carbon tax, subsidies and tradable permits.

The Climates of Canada

author: David Phillips ; editors: David Francis, Don Guillett, Ed Truhlar. Ottawa : Environment Canada, 1990. 176 p. : ill., maps. Bibliogr. ISBN 0-660-13459-5
MICROLOG 91-00887 2 fiche

The book is divided into four sections: 1) factors that shape and control Canada's climates; 2) elements of weather -- temperature, rain and snow, ice, storms, floods, and other components of our weather; 3) climates of each of the provinces and territories; and 4) climate change. These are followed by a glossary, a list of references, and a selection of tables detailing averages and extremes for 17 representative weather stations in Canada. The book is intended for anyone seeking a general description of the diversity of Canada's climates and explanations why such diversity exists.

A Climatology of low-level air trajectories in the Alberta Oil Sands area

by P.J. Denison. Edmonton : Alberta Oil Sands Environmental Research Program, Meteorology and Air Quality Committee, 1977. xiv, 117 p. : maps. Bibliogr. (AOSERP report ; 15)
MICROLOG 91-03418 2 fiche

This study was designed to provide a climatology of air trajectories in the Alberta Oil Sands Environmental Research Program study area. The study developed a climatology of air parcel movements (trajectories) over 72-hour periods for parcels moving in and out of the study area, using the four times daily surface and twice daily 850 mb AES weather maps on microfilm for 1968 and 1973/74/75. The trajectories were required at 1000 mb (surface), and for conditions of nil, light, moderate and heavy precipitation.

Closed waste site evaluation : Emsdale Landfill : report

Toronto : Environment Ontario, Waste Management Branch, Waste Site Evaluation Unit, 1989. ii, 125 p. : ill., maps. ISBN 0-7729-6173-5
MICROLOG 91-03061 2 fiche

As part of the Ministry of the Environment closed waste site evaluation program, a hydrogeologic study was completed at the Emsdale Landfill to document the physical setting, evaluate the impact of the site on local water resources, and study the movement of landfill gases at the site. The site is located in Perry Township, about 28 km north of Huntsville, Ontario and was in operation before 1972, closing during the mid-70s. Only a small part was used for waste disposal, including wastes from a train derailment at Novar. This report presents the results of a baseline study to identify site stratigraphy, aquifers and the relationship between the disposal site and its physical environment; to document local groundwater and surface water uses; to characterize leachate quality; to evaluate the effect of the site on local water resources; and to characterize the effect of landfill gases on the physical environment.

Clôtures de fils pour la conduite du bétail

par D.A. Quinton. Ottawa : Agriculture Canada,

1990. 58 p. : ill. *L'éd anglaise (Wire fences for...)* : 91-00203/1. ISBN 0-662-93005-X
MICROLOG 91-00202 1 fiche

Les clôtures constituent un élément primordial des installations d'élevage et de culture fourragère. Bien qu'elles servent principalement à contenir différents types d'animaux de diverses tailles à l'intérieur ou à l'extérieur d'une enceinte, elles ont également un effet important sur les déplacements et le comportement des animaux. Sans de bonnes clôtures, il n'y aurait pas de protection des cultures, ni de contrôle sur l'accouplement, sur l'alimentation et sur la sécurité du bétail, ni de limites bien précises entre les grands pâturages. Ce document fournit d'importants renseignements sur cette question.

CO2 induced climate change in Ontario : interdependencies and resource strategies : summary report

by the DPA Group Inc. ; in association with Concord Scientific Corporation. Ottawa : Environment Canada, Atmospheric Environment Service, 1988. 12, 14 p. (Climate change digest : CCD 88-09) *Bilingual (Changement climatique...)*. ISSN 0835-3980 ISBN 0-662-56285-2
MICROLOG 91-01712 1 fiche

This publication presents the results of phases 3 and 4 of a pilot project initiated in 1984 to investigate the potential impacts of climate change in Ontario. The first and second phases of the project had examined the effect of CO2-induced climate change on specific components of the air-water-land biota systems and resource uses. The third and fourth phases of the study examine the interdependency of these impact sectors and possible resource and socioeconomic strategies. The study is part of a series on the potential impact of climate change on various sectors of the Canadian economy.

Coal geology : Geoscience Information System pilot study

by R.J.H. Richardson, D.K. Chao and R.M. Krzanowski. Edmonton : Alberta Research Council, Alberta Geological Survey, Coal Geology, 1989. iii, 56 p. : ill., fold. ill., maps. (Open file report ; no. 1989-03A)
MICROLOG 91-02742 1 fiche

As part of the GeoScience Information System

(GSIS) pilot project a demo for coal-related information was developed. This report provides an introduction to the pilot demo as well as support documentation for the project and the demo. The system is designed on 4 levels of detail which involve 1:1,000,000 scale maps which include general coal information for the province; 1:250,000 scale maps which include general information plus selected information on coal disposition, mine permits and oil and gas well locations; selected subareas which identify names of oil wells and mine permits and the 400 m buffer zone for oil wells; and 1:50,000 scale mine or township maps which include detailed information concerning coal seam thickness, coal quality, overburden and stratigraphy for the areas. The demo illustrates how the GIS technology can serve as an exploration, research and information platform for the 1990s.

Coal Geology Database, appendix 1 : glossary

by R.J.H. Richardson, G.B. Mandryk and D.W. Fietz. Edmonton : Alberta Research Council, Geological Survey Dept., Coal Geology, 1989. 74 p. (Open file report ; no. 1989-02B)
MICROLOG 91-02462 1 fiche

During the early part of 1988, the Coal Group of the Alberta Geological Survey began development of the coal database, which was established in a VAX/VMS environment and used INGRES as the relational database management system. The coal database was designed to accommodate virtually any type of locational, structural, lithological, geological or sample/analytical data relating to coal and associated strata in Alberta. The information was then grouped into many electronic tables, each containing a number of attributes. To properly add, delete, revise and extract data, the user must know the specific data types stored within the database. The glossary listed here provides that necessary information, compiled alphabetically based on the assigned abbreviation of an attribute.

Coal-oil slurry separation by continuous screen-bowl centrifuge : final report

Saskatchewan Research Council. Engineering Division. Saskatoon, Sask. : The Council, 1982. vii, 72 p. : ill. (SRC publication ; no. E-727-7-C-82) CANMET contract: OSQ87-00001.
MICROLOG 91-04794 1 fiche

This report analyses the possible degradation of coal slurries in crude oil when transported in a pipeline to eastern Canada, and the amount of separation of the slurry into its components achieved by continuous centrifuging. Slurries in light crude oil of two thermal coals at 45 percent solids and one metallurgical coal at 50 percent solids were prepared and circulated in an apparatus for simulation of long distance slurry pipeline transportation. The slurries were centrifuged using feed rates from 0.1 kg/min to 10 kg/min, with speeds giving multiples of gravitational acceleration of 750, 1000 and 1500. Some tests with recycling of middlings were also conducted. Samples of the products from all the centrifuge runs were analyzed for solids content, particle size distribution down to 0.3 um and for moisture content. Larger scale centrifugings of the coal slurries, providing 20-50 L samples of liquid product and solid product, were then evaluated, with the liquids sent to an oil company laboratory for evaluation as a crude oil. Sample runs were then analyzed of the large scale centrifugings.

Collection and analysis of data on oxidative coupling of methane

by Y. Amenomiya. Ottawa : Catam Research Inc., 1990. 34 p. : ill. Bibliogr. CANMET contract: 79057-01-GS. MICROLOG 91-00722 1 fiche

The utilization of Canada's abundant natural gas is of great importance for self-sufficiency in the future. Among the processes under investigation, the direct conversion of methane into higher hydrocarbons without going through syngas is particularly attractive, although there are difficulties mainly due to the high stability of the methane molecule and the thermodynamic disadvantages. This report analyzes published reports on the catalytic oxidative condensation of methane, including the results of oxidative coupling with oxygen and other oxidants supplying oxygen, such as nitrous oxide, and those of other oxidative condensation reactions. Excluded from the review are those papers dealing with the partial oxidation of methane which produce mainly oxygenated compounds. The report covers a total of 110 papers and patents including most of those published in 1988. Surveyed but not cited in the report are papers presented at conferences without a full report in the preprint or proceedings. Recommendations are included.

College student outcomes report, 1990

B.C. Research. Victoria : Ministry of Advanced Education, Training and Technology, Universities, Colleges and Institutes Division, 1991. iii, 51 p. : ill. CSI 37121.003. MICROLOG 91-06948 1 fiche

This report documents the continued successes of college graduates in obtaining training-related employment and transferring on into more advanced studies. It also documents other successful program outcomes which continue to occur. For occupational programs, it discusses the types of skills graduates report most often using, and their perceptions of their adequacy of preparedness for their jobs in those skill areas. For academic programs, it discusses

the factors most impacting the outcomes reported.

Colleges and the changing economy : Study Team 2 final report

Ontario Council of Regents for Colleges of Applied Arts and Technology. Vision 2000. Toronto : The Council, 1989. 40 p. MICROLOG 91-00137 1 fiche

Vision 2000 is a review of the mandate of Ontario's Colleges of Applied Arts and Technology. The goal of this report is to assist the Steering Committee to produce a report which the Council of Regents will be able to forward to the Minister of Colleges and Universities. It presents the following information: the challenges facing Ontario society; strategic choices which address the potential role of Ontario's colleges; specific policy recommendations pertaining to the colleges; a summary of the results of the Team's research and consultations; and recommendations which go beyond the termination of Vision 2000.

Colleges and the communities : more than an open door : access and equity in Ontario's Community Colleges : Study Team 3 final report

Ontario Council of Regents for Colleges of Applied Arts and Technology. Vision 2000. Toronto : The Council, 1990. xiv, 64 p. MICROLOG 91-00158 1 fiche

Vision 2000 is a review of the mandate of Ontario's Colleges of Applied Arts and Technology. Study Team 3 focused on the issue of equitable access. The team then identified four areas of strategic focus for implementation of the principle of equitable access: education equity for diverse groups; lifelong learning; adequate support; and a system-wide approach to research for planning and evaluation. This document presents the findings and recommendations from the Study Team.

Colleges and the educational spectrum : Study Team 5 final report

Ontario Council of Regents for Colleges of Applied Arts and Technology. Vision 2000. Toronto : The Council, 1990. ii, 65 p. Bibliogr.
MICROLOG 91-00135 1 fiche

Vision 2000 is a review of the mandate of Ontario's Colleges of Applied Arts and Technology. The primary task for Study Team 5 was to examine the nature of the relationships between the three main institutional components of Ontario's education spectrum--schools, colleges, and universities--and suggest ways in which the links between these institutional components might be improved. Given the context of Vision 2000's review of the mandate of the Colleges of Applied Arts and Technology, the team has made an effort to focus on the challenges and solutions most relevant to the colleges. This document contains the Study Team's findings.

Colloque national sur le développement durable et l'aménagement forestier : compte rendu

Colloque national sur le développement durable et l'aménagement forestier (1990 : Halifax, N.-E.). Ottawa : Conseil canadien des ministres des forêts, 1990. ii, 55, ii, 50 p. Bibliogr. Bilingue (National Forestry Forum on...)
MICROLOG 91-00177 2 fiche

Les ministres fédéral, provinciaux et territoriaux des forêts se sont réunis en 1985 pour former le Conseil canadien des ministres des Forêts (CCMF). L'objectif du CCMF est de favoriser l'élaboration de politiques et programmes dans le but de renforcer le secteur de la foresterie, y compris les ressources forestières et leur utilisation. Ce document renferme des déclarations et des exposés portant sur les points suivants: les incidences, sur le secteur forestier, de l'approvisionnement futur en fibres, des pratiques forestières et de la recherche dans le domaine des forêts; les types de changements qui s'imposeront dans les structures ou processus décisionnels des

gouvernements, de l'industrie et des propriétaires fonciers; et, les mesures à prendre, à quel moment et par qui, pour parvenir au développement durable en aménagement forestier.

Column flotation of sylvinite

by R. May. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1990. ii, 22 p. Bibliogr. (Open file report ; 90-14) ISSN 0712-4562
MICROLOG 91-03574 1 fiche

Column flotation is a recent concept in mineral processing which made its start in copper-molybdenum operations and has since expanded to include all sulphide minerals and coals. This project determined whether column flotation is a viable option to improve the recovery of fine potash and whether it can increase the grade of slimes concentrate. The project included a literature review, testwork to become familiar with the cell operation, a review of previous work using the cell, and in-plant testwork at Denison-Potacan Potash Corp. and PCA.

Column flotation research : final report

Hudson Bay Mining and Smelting Company. Ruttan Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. iii, 32 p. : ill. CANMET contract: 69012-01-SQ.
MICROLOG 91-04718 1 fiche

Although column flotation in copper and molybdenum cleaning circuits was firmly established in 1986, no published information could be found on a column operating successfully in a zinc cleaning circuit. This project involved the installation of a 36 inch diameter by 43 foot high column complete with level, bias, and air control loops to initially treat zinc rougher concentrate from Ruttan mine. The research work consisted of testing the effects of column level, wash water, air flow, bias control, feed flow rate, and frother on column concentrate grade and recovery. The test work was then repeated using other zinc cleaner products as feed to the column. This report presents the results from the project.

Commercial Atlantic salmon catch for west Newfoundland and south Labrador, Gulf Region : annual summaries, 1974-88 and weekly catches, 1987-88

by R.R. Claytor, C.C. Mullins and R.A. Jones. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1991. vii, 80 p. (Canadian data report of fisheries and aquatic sciences ; no. 838) CSI 21105.225. ISSN 0706-6465

MICROLOG 91-04046 1 fiche

This report summarizes Gulf Region commercial Atlantic salmon catch data for 1987 and 1988. Information on catch-timing and mean weight of salmon caught in the commercial fishery is used to adjust season opening and closing dates to increase spawning escapement. Information compiled included commercial loadings, local sales, the community nearest the fisherman's berth, and weights and sizes of salmon caught. License data includes number of fishermen and net length in fathoms. Monthly sales summaries are presented as the percentage of total weights (regardless of size) sold locally in each statistical unit.

The Commercial wildlife viewing product : a discussion of market and development potential

prepared by Ethos Consulting...et al. Victoria : Ministry of Tourism, 1991. 96 p. Bibliogr. ISBN 0-7718-8971-2
MICROLOG 91-04209 2 fiche

Wildlife viewing is a major leisure activity today, which can be done either non-commercially or commercially. Commercial wildlife viewing is considered to be an important component of BC's growing adventure tourism sector. This study analyzes existing data sources to determine the value, markets and potential of the BC wildlife viewing product; collects data from operators on the interests and activities of viewing client groups; identifies the market characteristics of the various commercial recreation activities associated with wildlife viewing; and develops strategies and initiatives to assist private sector operators with the marketing of their viewing product. Information was gathered through interviews with relevant provincial and federal government agencies, relevant tourism agencies and sector associations.

Commercial/industrial waste plastic feedstock procurement and sensitivity analysis for a mixed plastics recycling facility

by Sagres Metal and Plastics Ltd. ; [and] the Proctor and Redfern Group ; for Industrial Program Unit, Waste Management Branch, Ministry of the Environment. Toronto : Environment Ontario, Waste Management Branch, Industrial Program Unit, 1990. 44 p. ISBN 0-7729-7771-2
MICROLOG 91-02535 1 fiche

A supply survey was conducted to establish the quantities of plastic waste which are currently not being recycled by commercial or industrial sources. This is material which is generally unattractive to the plastic regrind industry because it consists of mixtures of resins or is contaminated. This report describes the methodology of the survey, the establishment and operation of a mixed plastics recycling facility, and the operating costs. Data is given on the amount and type of material available and methods of collection.

Commission des rivières du patrimoine canadien : Rapport annuel 1989-90

Ottawa : la Commission, 1990. 22, 22 p. : ill.
Bilingue. Le Point (4 p.) inclus.
CSI 22360.001. ISBN 0-662-57762-0
MICROLOG 91-00277 1 fiche

Le Réseau de rivières du patrimoine canadien est un programme conjoint du gouvernement du Canada et, jusqu'à maintenant, de huit provinces (Terre-Neuve, Ile-du-Prince-Edouard, Nouvelle-Ecosse, Nouveau-Brunswick, Québec, Ontario, Manitoba et Saskatchewan) et des deux territoires (Territoires du Nord-Ouest et du Yukon). Les objectifs du RRPC sont de faire connaître, à l'échelle du pays, les rivières importantes du Canada et de veiller à ce qu'elles soient, à longue échéance, gérées de façon à conserver leur valeur naturelle, historique et récréative, pour le plaisir des générations actuelles et futures. Le document se penche particulièrement sur les points suivants: la situation du RRPC; les rivières du réseau; les rivières mises en candidature; les rivières désignées; les études et les plans; la surveillance des rivières désignées; et la campagne d'information sur le RRPC.

Common ground : recommendations for policy reform to integrate wildlife habitat, environmental and agricultural objectives on the farm

by J. Girt. Ottawa : Environment Canada, Wildlife Habitat Canada ; Agriculture Canada, 1990. v. 56 p.
MICROLOG 91-02061 1 fiche

Wildlife Habitat Canada was established on February 24, 1985 as a non-profit foundation to promote and financially support innovative habitat programs across Canada. It has also provided independent reviews and recommendations to minimize the wide variety of human impacts on wildlife habitat. This report provides background information and recommendations to stimulate discussion on the important issue of the major impacts of agricultural programs and policies on the quantity and quality of the remaining wildlife habitat on the agricultural landscape. The report covers agriculture and the land base, the political economy of current agricultural policy and the environment, a tentative framework for evaluating existing Canadian farm

programs, current incentives for agriculture to habitat farmland conversions in the Prairies, and the implications of forecasts for commodity sales, farm incomes and international trading arrangement.

Comparative quantification of pyridine-type compounds in New Brunswick and Colorado shale oils

Three-D Geoconsultants Limited. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1990. vi, 27 p. : ill. Bibliogr. (Open file report ; 90-16) ISSN 0712-4562
MICROLOG 91-02738 1 fiche

In the U.S., sectors of the oil shale industry have recognized the market potential for shale oils in asphalt production. Interested parties in N.B., where reserves of oil shale have been identified, have seen potential in the utilization of shale oil for this purpose. This report presents the findings of a study which undertook the acquisition of samples of N.B. and Green River Formation (from the State of Colorado) shale oil and the analysis of those samples. The Green River shale oil is the basis for the relevant shale oil asphalt studies completed in the U.S. Analysis and comparison of the N.B. shale oil and Green River shale oil were the first steps in determining the potential of the former as feedstock for the production of asphalt exhibiting enhanced durability.

A Comparative study of coho salmon populations of S.E. Vancouver Island, British Columbia : juvenile outmigration, coded-wire tagging and recovery, escapement enumeration, and stock composition at Black Creek, Trent River and French Creek, 1984-88

by M. Labelle. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1990. vi,

148 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1722) ISSN 0706-6457
MICROLOG 91-01510 2 fiche

An investigation was initiated on Vancouver Island in 1984 to determine the degree of similarity in biological and exploitation patterns between populations of coho salmon. This report describes the various field investigations, estimation procedures and results obtained at Black Creek, Trent River and French Creek from 1984-88. Juvenile trapping operations were conducted at each site from 1985-87, with actual counts and estimates of total smolt output from each stream given, as well as information on outmigration pattern, age structure, demographic traits, fry survival and the degree of similarity between populations. Adult enumeration was conducted at each location and mark-recapture programs were conducted in all streams to estimate total escapement. Abundance estimates were generated from a sequential Bayesian algorithm developed for closed populations, and from an open population model described in this report. Estimates from both models are compared. Coded wire tag recovery was conducted at each location to determine the stream of origin, and estimate exploitation rates. The current productivity status of each stock is discussed.

Comparison of forage digestion by cattle and horses : final report

by N.F. Cymbaluk. Regina : Saskatchewan Agriculture Development Fund, 1990. 23 p. Bibliogr. ISSN 0829-9455
MICROLOG 91-01884 1 fiche

Comparison of the nutrient utilization and voluntary dry matter intake (VDMI) of Saskatchewan grown forages by steers and horses and an evaluation of the usefulness of in vitro techniques and prediction equations for predicting feed utilization by cattle and horses. In the first trial, 6 days were fed to 6 ponies and 6 steers. The second trial used the same horses and steers to evaluate the VDMI and nutrient digestibility of alfalfa hay and dehydrated alfalfa pellets. Feed and feces were analyzed for dry matter, gross energy, crude protein, acid detergent fiber, neutral detergent fiber, calcium and phosphorus by 1985 ADAC methods. In vitro organic matter digestibilities were determined by the modified Tilley and Terry method. Data were analyzed within and across species. The Lucas test, or the regression of digestible nutrient upon feed nutrient content, was used to predict endogenous nutrient excretion and true nutrient digestibility.

A Comparison of the gonadal maturation of a sea urchin *Strongylocentrotus intermedius*, from Soya and Rebus Island in northern Hokkaido

by K. Tajima...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1991. 12 p. : ill. Bibliogr. (Canadian translation of

fisheries and aquatic sciences ; no. 5525) Originally published in Japanese, in Japan. ISSN 0704-3716
MICROLOG 91-04122 1 fiche

The spawning period of sea urchins in the various areas of Hokkaido have until now been explained through seasonal changes in gonadal weight as well as through histological observations of the formation stages of the reproductive cells. However, there is little information about their spawning in the Hokkaido region. This paper presents the results of a survey of the appearance times of early floating larvae in Soya and at Horodomari, Rebus Island, city of Wakkanai.

A Comparison of the taxonomic characteristics and duration of the laboratory reared larvae of the snow crabs *Chionoecetes opilio* (O. Fabricius) and toad crabs *Hysa* sp. from Atlantic Canada

by K.G. Davidson and E.A. Chin. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Fisheries Centre, 1991. vi, 21 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1762) ISSN 0706-6457
MICROLOG 91-01750 1 fiche

The snow crab is a large spidercrab which inhabits deep, cold waters in the Sea of Japan, north Pacific and northwest Atlantic Oceans. In Atlantic Canada, commercially viable concentrations of snow crabs occur in the Gulf of St. Lawrence, off the west and east coasts of Cape Breton and off the coasts of Labrador and Newfoundland. Toad crabs occur on the coasts of the north Atlantic from temperate to sub-polar regions. The zoal forms of the snow crab and the toad crab are similar and the laboratory rearing of the larvae of these specimens was undertaken to achieve a better method for distinguishing between the two types of zoal present in plankton samples from the Gulf of St. Lawrence and the Scotian Shelf, to provide an estimate of the larval duration of these species and to explain the possibility of surface current-mediated larval exchange between snow crab populations and stocks.

Comparison of WALLDRY predictions with Atlantic Canada Moisture Test Hut Data : report

G.K. Yuill and Associates. Ottawa : Canada Mortgage and Housing Corporation, 1990. 102 p. : ill. Bibliogr.
MICROLOG 91-04482 3 fiche

This final report consists of two phases - a detailed analysis of the corrected Atlantic Canada moisture test hut data carried out to establish a correlation between the time a panel takes to dry to 19 percent and the configuration of the various panels; and phase II provides a comparison of the WALLDRY predictions with the corrected moisture data analyzed in phase I. WALLDRY was used to simulate the drying/wetting of the Atlantic Canada test hut walls by using hourly airport weather data. The simulation results were compared with the test hut measured data to assess the validity of the WALLDRY computer program.

Compendium de variétés homologuées : pommes de terre

Ottawa : Agriculture Canada, 1984. 64 p. : ill. Bilingue (Compendium of licensed varieties...). ISSN 0823-194X ISBN 0-660-52303-5
MICROLOG 91-01089 1 fiche

Le compendium de variétés homologuées est publié par section au fur et à mesure que de nouvelles variétés sont homologuées ou d'autres révisées, ou encore lorsque leurs homologations sont révoquées. Il comprend quatre parties: pommes de terre, cultures céréalières, cultures fourragères et cultures oléagineuses. Chaque partie se compose d'ensembles de feuillets d'information, soit un feuillet pour chaque variété, donnant une description détaillée des caractéristiques botaniques et agronomiques et des réactions aux maladies. Toutes les descriptions sont basées sur la description originale de l'améliorateur.

Compendium of government submissions and technical specialist reports in response to the Panel information requirements document

Hull, Que. : Federal Environmental Assessment Review Office, Northern Diseased Bison Environmental Assessment Panel, 1989. 294 p. Bibliogr.
MICROLOG 91-06257 4 fiche

The introduction of plains bison into Wood Buffalo National Park in the 1920s resulted in a general hybridization of the bison as well as introduction of bovine tuberculosis and probably brucellosis. Since in recent years mixed agriculture has moved closer to the park, there is a danger that one or both of the diseases, which have been eradicated in domestic animals, will be transmitted to them. This document contains submissions from the federal, Alberta and NWT governments, as well as technical submissions on ecological issues, native perspectives, bison genetics, predator-prey interactions, and agricultural issues.

A Competition index methodology for northwestern Ontario

by W.D. Towill and D.A. Archibald. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1991. 12 p. : ill. Bibliogr. (Technical notes : TN-10) ISSN 0846-6106
MICROLOG 91-07048 1 fiche

The reduction of competition vegetation in regenerating conifer plantations is an important silvicultural and wildlife management issue. Competition from non-crop vegetation for available light, soil water, nutrients, and physical growing space can severely limit the survival and growth of young conifers. The purpose of this paper is to describe a procedure for competition assessment which can be used in northwestern Ontario.

Compiler listing for chemical speciation program MACS80.VERS.4.1 for Microsoft Fortran version 5 for MS-DOS

by R. Wagemann, G. Regehr and R. Lypka. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1990. x, 190 p. (Canadian data report of fisheries and aquatic sciences ; no. 818) This is the 53rd data report from the Central and Arctic Region. ISSN 0706-6465
MICROLOG 91-02558 3 fiche

The MACS80 program calculates the concentration of 356 different chemical species resulting from the interaction of 14 metals with 15 anions and their various hydrogen ion-associated forms. The program has the unique feature of not requiring estimated starting values, generating its own appropriate starting values by performing initially a calculation for the hydroxy-metal complexes only, having obtained the activity of the hydroxide ion from the given pH. The program can also calculate the concentration of species in equilibrium with any of 62 different solids, the concentration of chemical species under 'open' and 'closed' conditions for atmospheric CO₂ transport in and out of the system, and take into account the interaction between dissolved organic matter and copper and cadmium, calculating the concentration of the corresponding organo-metal complexes. This report provides a listing of the chemical speciation program for fresh water.

Complementary scientific review of the Alberta-Pacific Pulp Mill Project environmental impact assessment : main report

by J. Poyry Oy. Edmonton : Alberta Research Council, 1990. 171 p. : ill., maps. Bibliogr. (ARC contribution series ; 1855) (ARC contribution series ; 1857) Executive summary (6 p.) laid in.
MICROLOG 91-02361 2 fiche

This review of the proposed Alberta-Pacific pulp mill project (ALPAC) was carried out to study the earlier environmental impact assessment (EIA) and to find complementary scientific data to better assess the potential and probable effects of the proposed development. Unlike the earlier EIA, the team also reviewed the effluent releases and water pollution control measures for the entire Athabasca and Peace River watershed. The review covered all of the available data on the effects of chlorinated organic compounds and the biological oxygen demand that would be discharged in the pulp mill effluents. Air pollution, solid waste and other environmental issues were discussed only in relation to specific questions that were not completely addressed in the previous review in 1989. This main report details pollution control guidelines in Canada and internationally; the ALPAC proposal; present pollution loadings and estimated future emissions; future environmental impacts; and environmental monitoring. A summary of the chemical composition of bleached plant effluents is also included.

The Completion of a computer system for measuring the shape, angularity and size of cattle : final report

Regina : Saskatchewan Agriculture Development Fund, 1991. 26 p. : ill. ISSN 0829-9455
MICROLOG 91-05714 1 fiche

In recent years, commercial beef breeders have expressed concern that so many replacement bulls are rejected for 'feet and legs'. This project was conducted to learn more about conformation and to develop a method by which it may be accurately measured. A system was developed to measure the shape, angularity and size of cattle through information transferred from a photograph to the computer using a digitizing tablet. The system is called the conformation determination system (CDS). Tests were carried out in both the laboratory and on living animals. This report describes the development of the CDS system and its results when used to measure animals.

Component 2 : landfill site search, landfill selection process : landfill (revised approach) -- Draft.

M.M. Dillon Ltd.. Toronto : Metropolitan Toronto, Dept. of Works, Solid Waste Management Division, 1990. 52 p. (Discussion paper ; no. 2.2) MICROLOG 91-00476 1 fiche

Metropolitan Toronto (Metro) began preparing a solid waste environmental assessment plan in 1987 to develop a comprehensive long-term system to deal with all aspects of its domestic, commercial and non-hazardous industrial solid waste, plus any other wastes for which it is responsible under agreements. A site selection process is required for siting those facilities that will be part of the selected waste management system. This report describes the process which will be used to site a landfill facility, including the general premises guiding the siting, an overview of the 3-phase approach, site size and landfill design assumptions, identifying candidate areas and sites, and methods of public participation. A glossary of terms is included. EV MU ON SC

Component 3 : technology evaluation, extension of process to identify candidate sites (step 2) and the development of comparative evaluation process for step 3 of the site selection process for a materials recovery facility, compost facility and energy from waste facility

Proctor & Redfern Limited. Toronto : Metropolitan Toronto, Dept. of Works, Solid Waste Management Division, 1991. 81 p. (Discussion paper ; no. 3.5A-B-C) MICROLOG 91-02310 1 fiche

The facility design assumptions for a materials recovery facility, a compost facility and an energy from waste facility were intended to result in a facility with minimal impact on the natural environment. The criteria described in discussion paper 3.5A were based on this assumption. This addendum describes the additional criteria identified for use in Step 2 of the site selection process, the revised criteria to be used in Step 3 and the method that will be used to apply the revised Step 3 criteria. Step 2 addresses the type of technology used to minimize adverse effects on the natural environment. Step 3 addresses the selection of short-listed sites from a longer list and the methods used. EV MU ON SC

Component 3 : technology evaluation, site selection process : composting

Composting : a literature study, 1989

prepared by M.M. Dillon Limited and Cal Recovery Systems Incorporated. Toronto : Environment Ontario, 1990. iv, 145 p. Bibliogr. ISBN 0-7729-7125-0 MICROLOG 91-00046 2 fiche

The Ontario Ministry of the Environment is in the process of developing guidelines and standards for large scale compost production, quality control, end use applications and facility siting. These guidelines will help to ensure that compost can be produced and used without adversely affecting human and animal health, food production and the natural environment. To develop guidelines, an up-to-date overview on state-of-the-art composting is required. This study outlines existing government and industry regulations and standards relating directly or indirectly to composting in Ontario and other jurisdictions, as well as documenting existing and emerging composting technologies worldwide. A Comprehensive approach to public policy evaluation : the implementation-outcome connection

by E.U. Morah. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1990. 50 p. Bibliogr. (Discussion paper ; no. 21) ISSN 0828-2439 MICROLOG 91-00621 1 fiche (Available on fiche only)

This is a practical guide to program evaluation as a core method of analysis in the field of public policy. The methods incorporate a variety of approaches using social science techniques to undertake the analysis. The paper emphasizes only two of these approaches -- outcome evaluation focusing on quasi-experimental designs, and process evaluation focusing on implementation. BC PA PR

Comprehensive basin management strategy for the Rouge River watershed, January 12, 1990

Downsview, Ont. : Metropolitan Toronto and Region Conservation Authority, 1990. 2 v. : maps. Bibliogr. Contents: Vol. 1 : Main report -- vol. 2 : Appendices. Fold. maps not filmed. MICROLOG 91-03617 4 fiche

This strategy is the first application of the Metropolitan Toronto and Region Conservation Authority (MTRCA)'s watershed management strategy to a particular watershed, that of the Rouge River in the east central part of the Metro Region. This report summarizes the conclusions of the Rouge River urban drainage

study, and sets out the policies, technical standards, operational criteria and implementation actions of the management strategy that provincial agencies, municipalities, and all bodies with special interests in the planning of the watershed are able to endorse and implement. The report describes the beginning of the strategy and its vision; public health aspects; public safety, such as flood control and erosion control; fisheries; riparian habitat; terrestrial habitat; and aesthetics. EV MU ON SC

Compressive strength test procedures for testing high strength concrete : final report

by B. Chojnacki and P. Read. Brampton, Ont. : Trow Inc., 1990. 30 p. : ill. Bibliogr. CANMET contract: 99171-01-SQ. MICROLOG 91-01018 1 fiche

While standard methods for the testing of the compressive strength of concrete have been established for many years, they are based on experience with lower strength concretes than those now used in some areas. This investigation, conducted from January to August 1990, determined the relative performance of sulphur capping, grinding, grinding and capping, sawing and capping, and inbonded caps in aluminum restraining rings using cylinders with ground and untreated ends of 70 and 90 MPa class concrete; the effect of standard capacity (2000 kN) and high capacity (4,500 kN) compression machines on the compressive strength of 100 mm and 150 mm diameter cylinders; the effect of cylinder size on the measured strength and test variability using 100 mm and 150 mm diameter cylinders of 50, 70 and 90 MPa class concrete; and the effect of the rate of loading of 100 mm and 150 mm diameter cylinders on their strength using 70 and 90 MPa class of concrete. Three rates of loadings, all complying with current standards, were tested.

MICROLOG 91-01057 19 fiche

Ce rapport annuel est présenté en trois volumes. Le Volume 1 présente: un aperçu financier et un sommaire sur dix exercices des opérations financières du gouvernement; les états financiers du Canada au sujet desquels le vérificateur général a exprimé une opinion, c'est-à-dire, les états des opérations, du déficit accumulé, des recettes et dépenses, de l'actif et du passif du Canada, et de l'évolution de la situation financière, accompagnés de notes connexes; les analyses des recettes et des dépenses budgétaires, et des comptes d'actif et de passif; et, divers autres états. Le Volume 2 se penche sur: le détail des opérations financières du gouvernement pour chaque ministère, et des renseignements et des analyses supplémentaires. Le Volume 3 contient un rapport annuel global des activités de toutes les sociétés d'Etat et des autres sociétés en coparticipation du Canada. Les états financiers vérifiés présentés dans le Volume 1 sont pour l'exercice clos le 31 mars 1990.

Computer simulation of photocurrents in p-n junctions using RADSPICE

by G.T. Pepper and R.E. Stone. Ottawa : Defence Research Establishment Ottawa, 1990. xi, 32 p. : ill. Bibliogr. (Report ; no. 1063)

MICROLOG 91-03508 1 fiche

Computer-Aided Engineering (CAE) tools such as SPICE (Simulation Program with Integrated Circuit Emphasis) have been successfully used for almost three decades to simulate the electrical performance of electronic devices and circuits. One such simulation program, RADSPICE, has the added feature of being able to simulate a useful range of radiation effects in electronics. This report investigates the simulation techniques used in RADSPICE for modelling photocurrents produced by the interaction of ionizing radiation in p-n junctions. Using photocurrent modelling techniques, a method for creating and simulating a radiation hardened (for space radiation effects) Complementary Metal Oxide Semiconductor (CMOS) Static Random Access Memory (SRAM) is illustrated. Sample simulations are provided for each of the photocurrent models and the simulation results are compared with theoretical values. The limitations of the models and range of applicability are discussed.

A Computer software package for instream flow analysis by the flow duration method

by D. Caissie. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, Fish Habitat and Enhancement Division, 1991. vi, 21 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1812) ISSN 0706-6457

MICROLOG 91-06096 1 fiche

Proposed water abstraction projects require fisheries biologists, hydrologists and engineers to predict the level of impact on aquatic resources and to specify the amount of water which must be left in the stream. Many instream flow methods are used and some of them require an analysis of daily streamflow for many years of record. This report presents a computer software package for a microcomputer to perform this analysis by the flow duration method. The program can analyze up to 100 years of daily discharge, presenting results in both tabular and graphic format. The source codes of the main program and subroutines are given and the program is illustrated using a numerical application on the Renous River, NB.

A Computer-assisted X-ray screening system

by T. Feather...et al. Ottawa : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1990. xvi, 73 p. : ill. Bibliogr.

MICROLOG 91-03940 1 fiche

Transport Canada is responsible for ensuring that potentially dangerous items such as guns and bombs are not carried on board airplanes departing from Canadian airports. Various screening devices are used to X-ray baggage, but their interpretation is often difficult and they require a high degree of concentration to be effective. This project developed a prototype real-time computer-assisted X-ray screening system (CAXSS) to assist operators of airport X-ray screening machines by offering new inspection tools such as zooming and image enhancement, and by detecting and highlighting suspicious objects at some reasonably consistent performance level. This report describes the system definitions, system design, threat recognition algorithms, and results obtained in threat detection, processing speed, user interface and developed software.

Concern for road safety : a national survey of drivers

Ottawa : Transport Canada, Road Safety, 1987. 204 p. Bibliogr.

MICROLOG 91-02938 3 fiche

The national concern for road safety survey was conducted to provide information about Canadians' concern for traffic safety, perceptions of the danger involved in various driving situations, perceptions of the effectiveness of alternative countermeasures, willingness to pay for optional vehicle safety features, and attitudes toward automatic restraint systems and daytime running lights. A total of 2207 randomly selected Canadians of legal driving age were interviewed in March, 1986 concerning these issues. This report presents the results for each item in the survey, in most cases tabulated by province, sex, age group, and level of education of respondent.

Connaissance de l'écriture et droit de savoir : atelier

Atelier 'Connaissance de l'écriture et droit de savoir' (1989, Hamilton, Ont.). Hamilton, Ont. : Centre canadien d'hygiène et de sécurité au travail, 1989. 32 p. ISBN 0-660-92682-2
MICROLOG 91-01640 1 fiche

Les stratégies actuelles en matière d'hygiène et de sécurité au travail se fondent de plus en plus sur le droit de savoir. Mais qu'arrive-t-il si l'analphabétisme ou d'autres difficultés linguistiques empêchent un travailleur d'assimiler l'information sur les dangers reliés au travail? C'est sur cette question et sur d'autres sujets connexes que s'est penché cet atelier tenu par le CCHST à Hamilton, Ontario, les 18 et 19 avril 1989. Le document examine le sujet sous plusieurs aspects: l'étendue du problème en milieu de travail; l'influence de la législation sur le droit de savoir; le rôle de la formation et de l'évaluation concernant le droit de savoir; et, les diverses façons de compenser un manque de connaissances linguistiques.

Les Connaissances des autochtones appliquées aux études d'impact environnemental : les Inuit, les eiders et le pétrole de la baie d'Hudson

par D.J. Nakashima. Hull, Québec : Conseil canadien de la recherche sur l'évaluation environnementale, 1990. vii, 31, vii, 29 p. : cartes géogr. Bibliogr. Bilingue (*Application of Native...*). ISBN 0-662-57901-1
MICROLOG 91-01303 1 fiche

Ce rapport expose les résultats d'une étude financée dans le cadre du Programme de recherche des étudiants de 2e et 3e cycle. Le Conseil a établi ce programme dans le but d'aider les étudiants de niveau supérieur qui mènent des recherches sur l'évaluation environnementale dans les universités canadiennes. Il examine particulièrement les données environnementales fournies par trois communautés inuit du sud-est de la baie d'Hudson: celle de Sanikiluaq dans les Territoires du Nord-Ouest et celles d'Inukjuak et de Kuujuaik dans le nord du Québec.

La Conservation des sols agricoles : politique fédérale -- Rév.

par S. Dakers. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 15 p. Bibliogr. (Bulletin d'actualité ; 87-8F) L'édition anglaise (Agricultural soil conservation...) sur la même fiche. ISBN 0-660-93053-6

MICROLOG 91-02135 1 fiche

La conservation des sols suscite un intérêt croissant chez un grand nombre de Canadiens. Cet intérêt découle non seulement du sentiment que la conservation des sols est une question fondamentale, mais aussi, et surtout, de la constatation que la dégradation des sols coûte très cher. Ce document examine l'héritage du passé et la sensibilisation récente du public.

Conserving our resource : Fisheries Program strategic plan, 1991-95

Victoria : BC Environment, 1991. v. 22 p. (British Columbia's environment, planning for the future) ISBN 1183-5931

0-7726-1342-7

MICROLOG 91-04903 1 fiche

This report discusses how the Fisheries Program will address fisheries management issues over the next 5 years, describing the direction of the Fisheries Program and providing a framework within which to coordinate program activities. The report begins by stating the goal, management principles and strategic objectives of the Program, then outlines the major strategies that need to be employed to meet those challenges. Strategic objectives are identified as the conservation of fish stocks, the protection and management of fish habitat, serving the public interest, and practising strong corporate management.

Considérations de sécurité et vérification d'un régime de contrôle des armements en Amérique centrale

par H.P. Klepak. Ottawa : Affaires extérieures et commerce extérieur Canada, Direction du contrôle des armements et du désarmement, 1990. x, 82 p. : ill., cartes géogr. Bibliogr. (Études ponctuelles sur la vérification du contrôle des armements ; no 5) L'édition anglaise (Security considerations and verification...) : 91-02371/1. ISSN 0840-7983

ISBN 0-662-96241-09

MICROLOG 91-02372 1 fiche

Ce document traite des antécédents, des contextes possibles et surtout des difficultés que pourrait présenter la vérification d'un régime de contrôle des armements en Amérique centrale. Le document commence par une brève analyse de la situation politique, militaire et diplomatique entourant la crise régionale, afin de préparer

le lecteur à la partie suivante. Les chapitres subséquents offrent une analyse des perceptions de menace relatives des Etats d'Amérique centrale, pris individuellement, de la possibilité de modifier ces perceptions de menace en se basant sur diverses considérations incluant le terrain, la combinaison d'armes offensives et défensives et enfin les facteurs politiques. Un régime de contrôle des armements pour la région est alors proposé, suivi d'une discussion plus approfondie de ce qui devrait, en fait, être vérifié sous un tel régime, comment cette vérification pourrait être conduite, de même que le meilleur moyen pour y arriver.

Consumption and saving patterns of the foreign-born in Canada

by W.L. Marr. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1987. 9 p. Bibliogr. (Discussion paper ; 87.A.9)
MICROLOG 91-01501 1 fiche

Although Canada has experienced substantial immigration since the end of World War II, economists are still uncertain what the overall effects of these flows have been on the Canadian economy. Most of the research that has been done focused on labour market effects; and much of the public discussion has been on its effect on labour supply either in total or for specific labour markets. Also of interest are the ways in which immigration and a change in the proportion of the population that is foreign-born have affected the level of aggregate demand, the demand for labour and the economy; but these have received much less attention. This paper addresses this overlooked area of immigration and consumer demand. It also discusses some literature which addresses the consumption and saving patterns of the foreign-born. Finally, it suggests a research agenda.

Contamination of vegetation by lead and other elements in the vicinity of Toronto Refiners and Smelters Ltd., 28 Bathurst Street, Toronto, 1986-87

by R. Rinne and D. Day. Toronto : Ministry of the Environment, Air Resources Branch, 1990. 16 p. : maps. (Report ; ARB-105-88-Phyto) ISSN 0824-880X ISBN 0-7729-6281-2

MICROLOG 91-04049 1 fiche

Surveys of vegetation and/or soil contamination have been conducted near Toronto Refiners and Smelters annually since 1972. In September 1986 and 1987, samples of Ailanthus foliage were collected from 11 or 13 stations in the vicinity of the plant from sides of trees facing the company. Control samples were also collected in September of each year from 10 stations in the Gerrard Street Control Area in downtown Toronto. In addition to vegetation sampling, soil sampling at each station was carried out in 1986. Distance and direction of sampling stations were calculated with reference to the main baghouse. Samples were analyzed for lead, arsenic, cadmium and antimony. This report compares tree foliage results with those of earlier years and with upper limits of normal guidelines. Comparisons are also made with other air quality monitoring results.

Contribution to the automatic extraction of linear structures from satellite imagery : thesis

by Moncef Daoud ; translated by Alain Michelet. Saskatoon, Sask. : Saskatchewan Research Council, 1991. 52 p. : ill. Bibliogr. (SRC technical report ; no. 232) (SRC publication ; no. I-4900-14-B-91)

MICROLOG 91-07195 1 fiche

The diversity and the quality of the images provided by satellite imagery is of great interest to remote sensing centres and users in crop management, geology, mineral or oil prospecting, hydrology, oceanography, and mapping. However, data gathering and updating for geography and mapping is one of the most difficult tasks. This study provides a semi-automatic and an automatic extraction of linear structures from satellite imagery. It presents the results of mathematical morphology processing of satellite imagery and of the standard deviation method improved by the use of mathematical morphology functions, with their limitations; a method based on graph theory which is used to detect linear structures, along with the theoretical aspect of the theory; and the results of an automated process suitable

for the detection of linear structures from satellite imagery.

Control of chalkbrood and other fungal problems in leafcutting bees : final report

Saskatchewan Alfalfa Seed Producers' Association. Regina : Saskatchewan Agriculture Development Fund, 1990. 35 p. ISSN 0829-9455

MICROLOG 91-01868 1 fiche

A major factor affecting alfalfa leafcutting bee populations is chalkbrood disease, a fungal disease which is currently the most serious limiting factor to leafcutting populations and alfalfa seed production in the northwestern U.S. As a result of this disease, the U.S. has become the major market for Saskatchewan leafcutting bee cocoons. A major outbreak of the disease would make maintenance of bee populations difficult and would jeopardize the province's high quality reputation. This report presents results from the continuation of a survey of chalkbrood disease by soliciting bee samples from alfalfa seed producers and by nest-trapping bees at sites throughout the province. Levels of other fungal species including foliar moulds and native *Ascosphaera* species which may adversely affect the viability of bee populations were monitored; the presence of foliar moulds in bee populations which are potentially harmful to the health of alfalfa seed producers were identified; new methods of fungal control for use in decontaminating bee nest material were developed; and other possible causes of mortality were investigated.

The Control of chalkbrood and other fungal problems of leafcutter bees

Saskatchewan Alfalfa Seed Producers' Association. Regina : Saskatchewan Agriculture, Agriculture Development Fund, 1987. 25 p. ISSN 0829-9455

MICROLOG 91-01763 1 fiche

The alfalfa leafcutter bee is a dependable pollinator of alfalfa, used by alfalfa seed producers in Saskatchewan for over 20 years. Alfalfa seed producers market both alfalfa seed and leafcutter bee cocoons, the major market being the U.S., due to prevalence of the fungal disease known as chalkbrood in U.S. leafcutters. Chalkbrood has also been found in Manitoba, southern Alberta and at low levels in one population in Saskatchewan. In addition to chalkbrood, a number of other fungi commonly occur in leafcutter populations. This research project continued and broadened the annual chalkbrood survey begun in 1982; identified and monitored other fungi present and determined their effect on viability; developed a valid procedure to determine the efficacy of fungal control methods; examined the efficacy and economics of existing methods used for fungi control in leafcutter nesting material; and evaluated new methods of fungal control (i.e. microwave and microwave treatment, fumigation treatment) which are not presently in common use.

Control of corrosive wear in grinding balls during wet grinding of hematite ore

by A.W. Lui, V. Sastri and J. McGoey. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1990. 1, 7 p. Bibliogr. (Report ; MTL 90-16(TR))

MICROLOG 91-00379 1 fiche

In ore-grinding operations, there is a considerable amount of wear loss from the steel balls and with the present trend towards lower-grade ore requiring finer grinds, the grinding ball consumption per ton of

concentrate recovered is very expensive. Earlier work showed that the ball wear can be reduced by the use of a single-component corrosion inhibitor system, without any adverse effect on the grinding rate. This report presents the result of work to develop a system of corrosion inhibitors so that their synergistic inhibition effect further reduces ball wear. During grinding, 15 marked balls were used to represent the charge of 155 balls. The average wear loss during 30 min. grinding was obtained by weighing the marked balls before and after the grinding experiment. The concentration of dissolved oxygen in the slurry was measured by an oxygen meter and the grinding efficiency of ore was determined by wet sieve analysis of ground ore and the increase in the amount of 0.074 mm particle size ore was used as a measure of grinding efficiency.

Coordinates as determined by side-scan sonar : theory and applications

by J.M. Preston. Victoria : Defence Research Establishment Pacific, 1988. ii, 43 p. : ill. (DREP technical memorandum ; 88-02) MICROLOG 91-00147 1 fiche

A central issue in minehunting is the accuracy with which the coordinates of a mine-like object can be determined. This survey process is

done in stages, first locating the ship, then locating the object with respect to the sonar, then determining the vector between the ship and the towfish if side-scan sonar is used. This report derives the equations which determine the chart coordinates of a bottom object from the 14 variables describing the side-scan sonar deployment which imaged that object. Improvements in the accuracy of the coordinates which could be achieved by improving the accuracy with which any variable is measured are then predicted. Coordinate data acquired during MINEX 87 is used to calculate the unmeasured angular variables which characterized that deployment.

Copper and selenium requirements of feedlot cattle where water is high in sulphates : final report

Regina : Saskatchewan Agriculture Development Fund, 1990. 9 p. ISSN 0829-9455 MICROLOG 91-01878 1 fiche

As livestock producers strive for improved rates of gain in feedlot cattle, copper and selenium deficiencies have shown up in areas where water supplies are high in sulphates, leading to slower weight gain. This seems to be especially true in fast growing exotic-cross cattle. This project compared the growth rate of animals which were given selenium, copper (Coprim), copper and selenium, and neither, as a check. All steers were purchased at a green tag sale and weighed into the feedlot on December 14th. As the steers were being processed to go on feed, each animal was given one of the treatments. This report provides the results of the project, including the costs of each treatment.

MICROLOG 91-06296 1 fiche

This document discusses the housing need in Canada, and corporate philanthropy in Canada. It provides a comparison of the role of corporate donations in Canada to that in other countries, and addresses the issues of public-private housing partnerships. It also presents a view of corporations and housing assistance in Canada.

Les Corps gras au Canada : Revue annuelle, 1987

Canada. Direction générale des céréales et des oléagineux. Ottawa : la Direction, 1987. iv, 94 p. Bilingue (Fats and oils in Canada...).

CSI 21100.010
MICROLOG 91-06021 2 fiche

Cette publication sur les corps gras au Canada est un recueil de données statistiques provenant de plusieurs sources, notamment Statistique Canada, la Commission canadienne du grain, et le Département de l'Agriculture des Etats-Unis. Les tableaux renferment des données sur la production et le commerce des graines oléagineuses, des huiles et de la semoule. On y examine particulièrement les points suivants: la production mondiale de graines oléagineuses, de farines protéiques et de corps gras; la production canadienne de graines oléagineuses, la transformation et le commerce; la situation du canola, du soja, des graines de lin, du tournesol et de la moutarde au Canada; les corps gras spécifiés et désodorisés; les huiles et les farines de poisson et d'origine marine; et, les autres corps gras et huiles non comestibles.

Corrosion product transport studies at Bruce-B NGS

by T.W. Ng. Toronto : Ontario Hydro, Research Division, 1990. iv, 130 p. : ill. (Report ; no. 90-072-K)
MICROLOG 91-00787 2 fiche

Corrosion products are carried by feedwater into the steam generators and eventually deposit on heat transfer surfaces, where they act as concentrating cells and promote underdeposit corrosion. Bruce B management requested a corrosion product transport survey for Bruce 7 during shutdown and startup in April 1988 and June 1988. During sampling, the suspended solids (filterables) and the non-filterables were both collected. Samples were generally taken at 12 hour intervals, although more frequently during startup. The weight of the suspended solids and the elements Fe, Ni, Ti, Mn, and Cr in these samples were obtained from analysis.

A Cost analysis of egg production in Alberta, 1989

by K. MacDonald-Date. Edmonton : Alberta Agriculture, Production Economics Branch, 1990. iv, 27 p. CSI 34101.024.
MICROLOG 91-03365 1 fiche

Alberta Agriculture, along with the Alberta Egg Marketing Board, initiated a provincial cost study in 1983 to monitor the relationship between the national cost and the provincial cost. This report is the summary of the latest year of that study. It provides an account of the costs and economic conditions encountered in the production of commercial eggs, analyzes the present price efficiency; provides the participating producers with a personal economic analysis for management purposes; and provides data for Alberta Agriculture staff to use in extension education. This report was prepared from farm records of a selected number of Alberta egg producers who voluntarily participated in this project.

A Cost analysis of the combined bulk lift-area base plant system

by A.M. Wiensczyk. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1990. viii, 100 p. : ill. Bibliogr. (Technical report ; no. 62)
MICROLOG 91-07061 2 fiche

Bulk lifting of nursery seedlings and area base planting are two systems that complement one another. In Ontario, these systems have not received wide use and have not been integrated operationally. This report describes an evaluation of the economics and practicality of a combined bulk lift and area base planting system. Two bulk lifts were conducted at the Thunder Bay forest nursery using a mechanical seedling belt harvester during the 1990 spring and fall seedling lift. Levels of seedling cull per box were assessed to determine the percent of substandard seedlings being shipped to the planting site.

Cost-effectiveness of alternative transportation fuels in urban bus operations

Sypher, Mueller International. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. vii, 101 p. : ill. Bibliogr. CANMET contract: 015SQ.23216-8-9112. ISBN 0-662-17403-8
MICROLOG 91-01212 2 fiche

Study to determine the incremental costs and environmental benefits associated with implementing alternative fuels in urban bus fleets in major Canadian cities. Transit fleet operations were examined to convert from the use of regular diesel fuel to low-sulphur diesel with an exhaust particulate trap, methanol, natural gas, or gasoline during normal fleet replacement. The study identified the incremental costs associated with the conversion to, and operation on, an alternative fuel, compared the cost-effectiveness of the alternative fuels in reducing regulated emissions during vehicle operation; compared the cost-effectiveness of a fleet's operation on an alternative fuel with stationary emissions controls; estimated the emissions released during fuel production; and determined carbon dioxide emissions during vehicle operation and fuel production.

Coverage studies for spaced-based radar

by S.Y. Maskell and B.C. Eatock. Ottawa : Defence Research Establishment Ottawa, 1990. v. 28 p. : ill. Bibliogr. (Technical note ; no. 90-18) MICROLOG 91-01785 1 fiche

Description of the opportunities for detection of aircraft by generic constellations of space-based radar (SBR) satellites. The field of view of an SBR satellite was modelled as an annulus moving over the earth's surface, with the outer limit of the annulus defined by the horizon and an inner limit defined by a grazing angle of 50 degrees. Constellation parameters (number of satellites, altitude of satellites, orbital inclination, and phasing of satellites in their orbits) were varied. Targets were placed at various latitudes to provide coverage data as a function of latitude. The data were presented as the percentage of time that a target was visible to at least one SBR satellite, and the length of time the target could not be observed by any satellite.

Les Criminels de guerre : la Commission Deschênes -- Rév.

par G. Purves. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 16 p. Bibliogr. (Bulletin d'actualité ; 87-03F) L'éd. anglaise (War criminals : the...) sur la même fiche. ISBN 0-660-93051-X
MICROLOG 91-01205 1 fiche

Au cours des dernières années, la présence au Canada d'individus qui, en tant que Nazis ou collaborateurs, auraient commis des crimes de guerre en Europe il y a 40 ou 45 ans a soulevé plusieurs questions: combien de ces individus résident actuellement au Canada; comment se sont-ils retrouvés ici; doivent-ils faire l'objet d'une enquête et, éventuellement, de poursuites; et, dans ce cas, de quelle façon faut-il procéder pour les traduire en justice? Comme il n'existait aucune étude officielle sur cette question, on a constitué la Commission Deschênes en 1985 pour qu'elle enquête sur ce sujet et en fasse rapport.
CA EX JU

par G. Purves. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 16 p. Bibliogr. (Bulletin d'actualité ; 87-3F) L'éd. anglaise (War criminals : the Deschênes...) sur la même fiche. Révisé le 16 octobre 1990. ISBN 0-660-93178-8
MICROLOG 91-04821 1 fiche

Le 7 février 1985, le ministre de la Justice a annoncé que le juge Jules Deschênes, de la Cour d'appel du Québec, allait diriger une commission d'enquête indépendante chargée d'instruire l'accusation selon laquelle un nombre considérable de criminels de guerre nazis auraient trouvé refuge au Canada grâce à des moyens illégaux ou frauduleux. Ce document se penche sur cette question en examinant les procès des criminels de guerre; l'avènement de la guerre froide et la décision de mettre un terme aux procès des criminels de guerre; les cas d'exclusion prévus dans la politique canadienne de l'immigration; la constitution de la Commission Deschênes; le rapport de la Commission Deschênes; le droit pénal; l'extradition et les traités d'extradition; la dénaturalisation et l'expulsion; la réaction du gouvernement; et, les mesures parlementaires.

Critères de sélection et évaluation en laboratoire de sorbants pour déversements de pétrole -- 4e éd.

par S.L. Ross Environmental Research Ltd. ; pour la Division de l'ingénierie d'urgence, Environnement Canada. Ottawa : Environnement Canada, Service de la protection de l'environnement, 1991. x, 73 p. : ill. Bibliogr. (Rapport ; SPE 3/SP/3) L'éd. anglaise (Selection criteria and laboratory...) : 91-05857/1. ISBN 0-662-96920-0
MICROLOG 91-06641 1 fiche

On a mis à l'essai, avec trois produits pétroliers et deux solvants hydrocarbonés, seize sorbants organiques et synthétiques disponibles dans le commerce et pouvant être utilisés pour le nettoyage des déversements de

pétrole. On avait laissé vieillir certains des liquides d'essai pendant des périodes de un jour et de sept jours. Les sorbants ont été évalués d'après leur capacité initiale et leur capacité maximale de sorption, la quantité d'eau qu'ils ont accumulée, et leur potentiel de réutilisation. Ce document présente la quatrième mise à jour des critères de sélection et d'évaluation en laboratoire de sorbants pour déversements de pétrole.

Criteria for the air leakage characteristics of building envelopes : final report

Trow Incorporated Consulting Engineers. Ottawa : Canada Mortgage and Housing Corporation, 1989. 78 p.
MICROLOG 91-05745 1 fiche

Report on the development of a set of criteria for the air leakage characteristics required of exterior envelopes of buildings to avoid problems from concealed condensation. The project developed an analytical model based on published information. This was used to construct logic trees applicable to low- and high-rise housing. These were then refined through the application of the Delphi technique, and criteria were established with a procedure for further development. This final report applies the results of the Delphi rounds and the computer program to provide a set of criteria for airtightness requirements for low- and high-rise residential buildings based on limiting the moisture content reached by the materials involved. Suggestions are made as to possible simplification and to refinement of the procedure, methods for determination of suitable coefficients, and the application of the procedure to the development of construction details and design principles.

Criteria for the testing of wall sheathing for load-bearing steel studs

by D.L. Tarlton ; in collaboration with R.M. Schuster and A.S. Zakrzewski. Ottawa : Canada Mortgage and Housing Corporation, External Research Program, 1990. 24 p. : ill. Bibliogr.
MICROLOG 91-04484 1 fiche

Current design standards for axial load-bearing steel studs in Canada and the U.S. permit the carrying capacity of the studs to be influenced by the type of sheathing used. This project developed criteria for the testing of wall sheathing for load-bearing steel studs; developed standardized testing criteria; and justified a reduction in the number of required tests in a given set from the recommended five to three on the basis that proposed criteria would result in less scatter of test results. A series of simple tests were conducted on both wet and dry gypsum board fastened to a steel stud by one screw.

Critical parameters influencing microbial corrosion : final report

by F.G. Ferris. Calgary, Alta. : Nova Husky Research Corporation, 1991. x, 77 p. : ill. Bibliogr. CANMET contract: 99275-01-SQ. MICROLOG 91-04691 1 fiche

Adherent microbial biofilms cause extensive fouling and corrosion of internal pipe surfaces in oil field water injection systems. Little is known about the effects of various treatment protocols or injection water chemistry on attached bacterial populations and corrosion rates in the field. This report presents an evaluation of the impact of biocide dose on biofilm growth, microbial population density, corrosion deposits, and corrosion rates, using Husky Oil's Wainwright oil field water injection system near Lloydminster, Alberta. Two separate experimental runs were conducted. During the first 4 weeks, untreated water was allowed to run through the 5 separate test lines and this colonization period was used to monitor biofilm growth and develop attached populations of microorganisms on the removable sample coupon surfaces. Chemical treatment started at week four of each experiment, and continued uninterrupted for an additional 8 weeks.

CRSHEx : a computer program for crushing circuit simulation : user's guide

by M. Bilodeau and D. Laguiton. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1988. ii, 21 p. : ill. Bibliogr. (Report ; MSL 89-30(TR)). MICROLOG 91-00380 1 fiche

The simulation of mineral processing circuits, which consists of evaluating liquid and solid distributions on all streams of a flowsheet, is applied to investigate flowsheet modifications, to perform off-line optimization and to design new plants. The CRSHEx program was developed for the simulation of crushing plants involving jaw crushers, standard and short head cone crushers and screens. In the present version, the CRSHEx program includes the facilities of SIMBAL and SPLITX, already available. The data editor features graphic flowsheet generation and full screen data editing. The material flowrate calculation features the modular approach and convergence acceleration by the Aitkins Delta Squared method. The unit models feature realistic models based on manufacturer specifications. This manual describes the program structure and operation, and program capabilities. A sample run is included, as well as information on maintenance and updates.

Current meter and pressure data between Hamilton Bank and OWS Bravo, July 1987-August 1988

by D.G. Wright, J.R.N. Lazier and M.J. Graça. Dartmouth, N.S. : Bedford Institute of Oceanography ; Dept. of Fisheries and Oceans, Scotia-Fundy Region, Physical and Chemical Sciences Branch, 1991. vii, 101 p. : ill. (Canadian data report of hydrography and ocean sciences ; no. 96) ISSN 0711-6721
MICROLOG 91-06356 2 fiche

From July 1987 to August 1988, an array of four pressure gauges and 19 current meters was moored along a line extending across Hamilton Bank and out to the centre of the Labrador Sea. Temperature and salinity observations were collected along this section during deployment and recovery cruises. This field program was conducted to provide the data required to estimate the mean value and temporal variations of the transport through this section. This report presents the data as sections of temperature, salinity, and density; tidal constituents for pressure and currents;

spectra of pressure and current variations; progressive vector diagrams and 'stick plots' of low-pass filtered currents; and time series plots of low-pass filtered pressure, temperature, salinity, density, and current components. Residual currents are presented in east-west/north-south, as well as major/minor axis; coordinate systems and basic statistics are briefly summarized for each.

A Custom designed EMI filter for compumotor stepping motors

by D.W. Donnelly. Toronto : Ontario Hydro, Research Division, 1991. 10 p. : ill. (Report ; no. 90-277-K)
MICROLOG 91-07170 1 fiche

The Nondestructive Evaluation Unit built several automated scanning rigs driven by high resolution stepping motors manufactured by Parker-Compumotor. For several years, the Unit has been trying to solve the problem of Compumotor-generated electrical noise invading the inspection instrumentation attached to these rigs and interfering with data collection. This report describes a motor filter that was designed and constructed by an external company which effectively eliminates the noise problem in most practical inspection situations.

Cytogenetic measurements of the relative biological effectiveness of tritium

by C. Chopra and J.A. Heddle. Ottawa : Atomic Energy Control Board, 1988. xvii, 202 p. : ill. Bibliogr. (Research report ; INFO-0287)
MICROLOG 91-03301 3 fiche

Workers in a nuclear reactor facility are exposed to a variety of radiations, including beta radiation from tritiated water. This is important in Canada because deuterium oxide in a CANDU reactor generates tritium. This study was designed to evaluate the biological effectiveness of tritium vs. X-rays to provide information for a cytogenetic estimate of radiation doses received by atomic energy workers and for estimates of genetic hazard to these workers. Measurements were made using CBA/H mice of cytogenetic damage in somatic cells as seen by the induction of chromosomal aberrations in first division metaphases in peripheral blood lymphocytes (the same cells used for biological dosimetry in atomic radiation workers or radiation accidents); and of heritable genetic damage in germ cells as seen by the induction of translocations in primary spermatocytes.

Dairy operation fly control : final report

Regina : Saskatchewan Agriculture Development Fund, 1989. 20 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-01747 1 fiche

High density livestock confinement production systems or intensive livestock operations produce major problems associated in the disposal of manure and the nuisance caused by manure flies. An evaluation was made of fly densities and populations, breeding areas and areas of congregation. Electrostatic sprayer treatments were conducted inside the barn (permethrin), outside the barn (dimethoate) and along the east side of the road hedgerow. Evaluations of treatments were determined by the percentage reduction of the 4 main fly species populations. Monitoring of the number and location of the flies was done through sticky traps, both before and after treatment, located at 10 sites in the barn, 10 sites around the outside of the barn, 5 sites along the hedgerow that runs parallel to the grid

road, and at several sites at the neighbour's home located about 350 metres from the barn.

Darlington NGS preoperational aquatic studies gill net summary, 1984-88

by R.W. Sheehan. Toronto : Ontario Hydro, Research Division, 1991. v, 52 p. : ill. Bibliogr. (Report ; no. 90-54-K)
MICROLOG 91-07166 1 fiche

Netting studies were conducted as part of the Darlington Nuclear Generating Station pre-operational environmental monitoring program to monitor the relative abundance and species composition of fish within the vicinity of Darlington, particularly cold water species. This report provides the results of the 1984-88 gill net studies in which juvenile and adult fish sampling was conducted in four locations at the site for the entire period, and four more in 1984 only. Bottom and surface nets were used and the water temperatures were recorded at the inshore and offshore ends of the net at setting and retrieval. Sampling was conducted twice in May, July, October and November and once in December each year. All fish collected were identified as to species and enumerated. Fork length and weight, scales and maturity data were collected from salmonids and coregonids whenever possible and all external marks such as tags, marks, and parasites were recorded.

Data association algorithms for multiple target tracking

by J.C. McMillan and S.S. Lim. Ottawa : Defence Research Establishment Ottawa, 1990. vii, 32 p. : ill. Bibliogr. (Report ; no. 1040)
MICROLOG 91-02791 1 fiche

Multi-target tracking (MTT) has many applications. One key aspect of this problem, especially in a dense target environment, is the 'scan-to-scan correlation' or 'tracking data association' problem of assigning measurements to tracks. This report presents the nearest-neighbour standard filter (NNSF) algorithm, the multiple hypothesis test method (MHT), and the joint probabilistic data association (JPDA) algorithm. The basic tracking equations and data association algorithms are presented, using a consistent notation, so that the different methods can be directly compared. The apparent advantages and disadvantages of each are briefly explored, and suggestions made for further analysis.

Data on the anadromous Arctic charr *Salvelinus alpinus* of Nauyuk Lake, Northwest Territories, 1974-88

by E.C. Gyselman and K.E. Broughton.
Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1991. v, 125 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 815) This is the 50th data report from the Central and Arctic Region, Winnipeg. ISSN 0706-6465
MICROLOG 91-02555 2 fiche

Arctic charr is an extremely important resource to the native people of northern Canada, feeding both humans and dogs, sold commercially, and the target of sport fisheries. Little is known about the dynamics of the species, making its conservation and management difficult. Consequently, a research program was begun in 1974 on the Nauyuk Lake system, running to 1980. Some parts of the program were conducted again in 1984 and 1988. This report summarizes the biological data collected, including monitoring of annual migrations of adult, juvenile, pre- and post-spawning charr; length, weight, age and sex data; numbers of fish migrating; time spent at sea; and time spent in freshwater.

Data record of juvenile sockeye salmon and other fish species captured by purse seine in Alberni Inlet and Barkley Sound in April, May, and June, 1987 and 1988

by K. Cooke and C. Groot. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. iii, 179 p. : maps. (Canadian data report of fisheries and aquatic sciences ; no. 813) ISSN 0706-6465
MICROLOG 91-04116 2 fiche

This data collection forms part of a multidisciplinary study on marine survival of salmon, a project which focuses on the relationship between oceanographic events and the dispersal and survival of young salmon during their first summer in the ocean. This report summarizes catch information on the distribution and abundance of juvenile sockeye salmon and some other fish species captured by purse seine in the surface waters of Alberni Inlet and Barkley Sound during the spring and summer of 1987 and 1988. Catches were sorted on board and the number of fish per species counted, or estimated when they were abundant. Sockeye smolts were collected and preserved for age, diet and parasite tag analysis. Weather data, consisting of time, location, surface temperature, sun, moon, stars, clouds, visibility, wind force and direction, wave height and direction, rain type and observed tide, were also recorded.

A Decision support system for physical distribution planning

by A. Langevin and Y. Saint-Mieux. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. ii, 16 p. : ill

Bibliogr. (Publication : no. 764)
MICROLOG 91-04085 1 fiche

A manager planning a distribution network faces a multiple-vehicle routing problem. The first step is to assign customers to vehicles and one way to do this is to partition a given territory into zones assigned to each vehicle. This paper presents a decision support system that enables the distribution manager to interactively design the zones at the screen using his own judgement as well as suggestions made by the system. System suggestions are based on analytic formulae that determine the optimal shape of a zone, taking into account the speed of the vehicle, the density of the demand, the location of the zone, and a maximal duration or a maximum number of stops in a route, as well as his own knowledge of the territory.

Décortiqueurs francophones : une étude du dépistage des décortiqueurs probables au sein des écoles secondaires françaises de l'Ontario

par P. Quirouette, O. Saint-Denis et N. Huot.

Toronto : Ministère de l'éducation, 1989.
37 p. : ill. (Recherche en bref) (Maintien
des élèves à l'école et leur transition)
CSI 55108.205. ISBN 0-7729-6097-6
MICROLOG 91-06904 1 fiche

Ce mémoire de recherche est un résumé des
activités, des différentes composantes, et des
résultats du projet intitulé 'Décocheurs
francophones: une étude du dépistage des
décocheurs probables au sein des écoles
secondaire françaises de l'Ontario'. Ses
objectifs globaux sont de présenter de
l'information valide visant à aider à dépister,
dès le début du secondaire, les élèves
susceptibles d'abandonner leurs études. Le
document présente donc les résultats globaux,
les résultats par niveau de difficulté et par
dimension, les résultats par dimension, et les
stratégies d'intervention.

Deepwater turbot survey : northeast coast of Newfoundland, July-August, 1990

by L. Yetman and D. Staubitzer. St. John's :
Dept. of Fisheries and Oceans, Fisheries and
Habitat Management, Fisheries Development
Division, 1990. v, 25 p. : ill. (Project report ;
FDD 1990-148)
MICROLOG 91-03279 1 fiche

There has been a growing interest recently by
the fishing industry and governments in the
commercial potential of Greenland halibut,
commonly known as turbot, in the deep waters
off the northeast coast of Newfoundland and
along the Labrador coast. From July 27-
August 11, 1990, two 65' commercial fishing
vessels were chartered for 16 days and
directed to fish for turbot in deepwater off the
northeast coast of Newfoundland, using 3 sizes
of gillnets. This report provides descriptions of
the vessels, fishing gear, method of operation,
fishing effort and catch results.

Deer and elk habitats in coastal forests of southern British Columbia

J.B. Nyberg and D.W. Janz, technical editors.
Victoria : Ministry of Forests ; Ministry of
Environment, 1990. xiv, 310 p. : ill. Bibliogr.
(Special report series ; no. 5) (Technical
monograph ; no. 2) ISSN 0843-6452 ISBN
0-7718-8949-6
MICROLOG 91-03041 4 fiche

In the last 20 years, land managers and the
public in B.C. have become increasingly
concerned about the effects of timber
management programs on non-timber resources
such as wildlife. This handbook summarizes
and interprets information on the relations
between deer, elk, and timber on all areas
south of Cape Caution that are clearly under
the influence of the coastal climate. An
overview of the timber-wildlife conflict; the
resources of deer, elk and timber; the
management of both; and the themes discussed
is first given, with more detailed information
following. A procedure for systematically
assessing habitat condition and for choosing
appropriate management actions is also
included.

Defence Research Board camps in northern Ellesmere Island : report on historical resources

by L. Dick. Ottawa : Environment Canada,
Canadian Parks Service, 1991. 36 p. : ill.
Bibliogr. (Research bulletin ; no. 292) ISSN
1184-7182
MICROLOG 91-06482 1 fiche

Between 1953 and the mid-1970s, the Defence
Research Board (DRB) of the Canadian Dept.
of National Defence played a leading role in
organizing and carrying out a broad range of
interdisciplinary scientific studies in northern
Ellesmere Island. This report describes a site
investigation of three former DRB base camps
in northern Ellesmere Island, at Lake Hazen at
the head of Tanquary Fjord, and on Ward
Island off the northern coast. Field work was
carried out to assess cultural resources at
abandoned research camps in the Ellesmere
Island National Park Reserve.

Define the most cost-effective cladding system in Canada : results of a survey

Suter Keller Inc. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1990. vii, 74 p. : ill. Bibliogr.
MICROLOG 91-04485 1 fiche

Many different cladding systems have been used on residential buildings and various opinions exist regarding which system is the most cost-effective. The initial construction costs as well as the long-term maintenance and repair costs vary from system to system. Some believe that a cladding which costs less to construct is the most cost-effective even with higher repair costs. This survey examines initial construction costs, cladding durability and related repair costs, as well as other factors which affect the overall life-cycle costs of the various cladding systems.

Deformed glacial deposits of Passamaquoddy Bay area, New Brunswick : products of seismic shaking?

by S. Kumarapeli. Ottawa : Atomic Energy

Control Board, 1990. ii, 63 p. : ill., maps. Bibliogr. (Research report ; INFO-0373)
MICROLOG 91-06288 1 fiche

The NB-Maine border area, centred around Passamaquoddy Bay, is characterized by a distinctly higher level of seismic activity compared with the very low level background activity of the region. In this same general area, post-glacial deformation, including faulting, has been observed in glaciofluvial and ice contact deposits and the possibility that these structures may in some way relate to neotectonic movements in the area has been suggested. A study was undertaken to document these structures and to investigate their origins.

Degradation of sludges from heavy crudes in contained reactors : fate of hydrocarbons absorbed to Oclansorb

by Mike McD. Francis...et al. ; for Canada Centre for Mineral and Energy Technology, Coal Research Laboratories. Calgary, Alta. : Nova Husky Research Corporation, 1990. 20 p. : ill. Bibliogr. CANMET contract: 23440-8-9263-01-SQ.
MICROLOG 91-06123 1 fiche

Oclansorb, an oil absorbent heat-treated peat product, is an effective material for absorbing spilled and waste oil, but there is no data currently available on its effectiveness at retaining highly volatile materials. This study assessed the ability of Oclansorb to retain volatile hydrocarbons. Aliquots (1-2 microlitres) of volatile hydrocarbons (toluene, dichloromethane, octane and isobutyl alcohol) were absorbed onto varying amounts of Oclansorb, commercially available garden peat, Hazorb and activated charcoal in stoppered serum vials. After equilibration for 60 minutes at 25°C, the headspace gas was analyzed for the presence of the particular hydrocarbon. The ratio of the headspace gas content of the hydrocarbon in presence of the Oclansorb or other absorbent to its content in the absence of absorbent was used as an index of retention of the particular hydrocarbon.

Degradation of sludges from heavy crudes in contained reactors : Lloydminster bioreactor for sludge degradation : initial operation

by Mike McD. Francis, and L.G. Stehmer ; for Canada Centre for Mineral and Energy Technology, Coal Research Laboratories. Calgary, Alta. : Nova Husky Research Corporation, 1990. vi, 157 p. : ill. Bibliogr. CANMET contract: 23440-8-9263-01-SQ.
MICROLOG 91-06125 2 fiche

A bioreactor for oil degradation, containing API separator sludge and oil-contaminated diatomaceous earth which had been used as a filter press aid to break emulsions, was installed in a heated shed at Husky Oil's Lloydminster refinery in the fall of 1989 and began running in January 1990. The leachate water was analyzed for polycyclic aromatic hydrocarbons, and samples of the Oclansorb-sludge or Oclansorb and oil-saturated diatomaceous earth matrices were removed from the reactor for oil extraction and analysis. Oil extraction was performed for six hours using hot toluene, which was then rotary evaporated to remove the toluene and weighed. This report presents the results of the tests.

Degradation of sludges from heavy crudes in contained reactors : maintenance and monitoring of laboratory reactors

by Mike McD. Francis ; for Canada Centre for Mineral and Energy Technology, Coal Research Laboratories. Calgary, Alta. : Nova

Husky Research Corporation, 1990. iv, 33 p. : ill. Bibliogr. CANMET contract: 23440-8-9263-01-SQ. MICROLOG 91-06124 1 fiche

Following initial success with a field reactor to degrade oil sludge from conventional oil refining, three bench scale reactors were constructed to study degradation of heavy oil sludge and to compare it with degradation of sludge from conventional oil refining. Problems were encountered in obtaining accurate, reliable and quantifiable oil recovery from the reactors due to variations in refluxing times for oil extraction and probably sampling variability. It was therefore decided to allow the reactors to run over for 14 months and to monitor over that period with particular attention to standardization of the oil extraction procedure. The leachate oil was analyzed for the presence of polyaromatic hydrocarbons and samples of Oclansorb and oil matrix were removed from the reactors for oil extraction and analysis. This report presents the results of the testing. • CA CM NR PS SC

Degradation of sludges from heavy crudes in contained reactors : Prince George bioreactor for oily sludges degradation

by Mike McD. Francis : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories. Calgary, Alta. : Nova Husky Research Corporation, 1990. iv, 37 p. : ill. Bibliogr. CANMET contract: 23440-8-9263-01-SQ. MICROLOG 91-06126 1 fiche

This study was conducted to monitor oil degradation in the contained bioreactor equipped with leachate recycle. A field bioreactor containing tank bottom sludges absorbed to Oclansorb heat-treated peat was installed in Husky Oil's Prince George refinery in the fall of 1988. The reactor was in operation over the winter months and self-heated until the extreme temperatures froze it. Before freezing, microbial numbers increased and significant levels of oil were degraded. During the spring and summer of 1989, the reactor was recharged with fertilizer and allowed to run for the rest of the year. During this interval oil and microbial levels were monitored. This report presents the results from the monitoring. • CA CM NR PS SC

Degree-granting institutions in Ontario

The Delivery man problem and cumulative matroids

by M. Fischetti, G. Laporte and S. Martello. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. ii, 39 p. Bibliogr. (Publication ; no. 741) MICROLOG 91-02551 1 fiche

Given a completed directed graph, the Delivery Man Problem (DMP) consists of determining a Hamiltonian circuit minimizing the sum of distances from a given vertex. There exists a number of applications of the DMP in the fields of distribution and of machine scheduling. This paper develops new theoretical results and an exact algorithm for the problem. New integer linear programming formulations are provided, and results on the matroidal structure of a class of combinatorial problems are developed. These are used to derive lower bounds for the DMP and are embedded into an enumerative algorithm. PR PS QU SC TR

Delta evolution in the Eureka Sound Group, western Axel Heiberg Island : the transition from wave-dominated to fluvial-dominated deltas

by B.D. Ricketts. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1991. 72 p. : ill., maps. Bibliogr. (Bulletin ; 402) Fold. map not filmed. ISBN 0-660-13844-1 MICROLOG 91-05681 1 fiche

The Eureka Sound Group in the Canadian Arctic Archipelago is significant because it provides the record of sedimentation and basin evolution during a major tectonic event, the Eureka Orogeny. This report deals with Eureka rocks on the west side of Axel Heiberg Island, ranging in age from possibly middle Campanian to Middle Eocene. Emphasis is placed on the changes in patterns of sedimentation that took place during this period. Significant resources of coal occur in Tertiary rocks throughout the Arctic, estimates of which are presented. Details of coal seams from specific sections are provided in an appendix. Demographic change and the Canadian economy : an overview

by S.B. Seward. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1987. 43 p. Bibliogr. (Discussion paper ; 87.A.0) CSI 99545.203. MICROLOG 91-01526 1 fiche

Demographic considerations play a key role in the broader Canadian socio-economic context. This paper is organized into seven parts. Part one briefly describes some of the current and future challenges facing the Canadian economy and the importance of demographic change in this context. Part two reviews, at the aggregate level, the major demographic trends since World War II, with particular emphasis on emerging developments over the past decade. Part three examines the changing composition of the population and the labour force, in terms of broad, macro-level trends that influence the overall economy, as well as more detailed elements, including the demographic profiles of the labour force engaged in different occupations. Part four assesses the behavioural aspects of one particularly dramatic demographic change-- increased female labour force participation-- and relates this not only to fertility and social change but also to economic developments over the past decade. Part five provides projections of the population and labour force from 1986 to 2036, focusing on the major expected trends to the end of the century. Part six assesses the implications of recent and projected demographic changes for the economy in the late 1980s and the 1990s. And part seven describes the major gaps in our understanding of demographic-economic interrelations and suggests areas for further research. CA CO SA ST

Demographic outlook for British Columbia : a Ministry of Health perspective

by J. Rana. Victoria : Ministry of Health, 1990. iii, 46 p. : ill., maps. CSI 37108.202. MICROLOG 91-03768 1 fiche

This paper focuses on demographic shifts and structural changes in B.C.'s population over the next five to ten years and identifies areas of the province that are expected to experience significant fluctuations in size and age/sex composition of the population. In many instances, it quantifies the impacts of these demographic fluctuations on various Ministry programs. BC HE PR SA ST

Demonstration of growth and form of young coastal conifers in the CWHb1 variant

by B.G. Dunsforth. Victoria : Forest Resource Development Agreement, 1990. ii, 8 p. : ill. (FRDA report ; 120) ISSN 0835-0752 ISBN 0-662-17940-4 MICROLOG 91-00336 1 fiche

Quantitative comparisons of recommended species are essential to validation and improvement of species allocation on the coast.

The current species allocation guide for coastal B.C. is based primarily on ecological principles and presence or absence of species in old-growth forest ecosystems. This provides a reasonable basis for hypothetical species selection but needs to be tested. Requirements for developing a quantitative database for species comparisons in plantations are long-term installations, species established in large blocks, and uniform and definable site types. Measurements should be started prior to canopy closure and carried through to mid-rotation. This report gives the results of a demonstration of similar species, at 11 years of age, on a high productivity site in the CWHb1, near Port Alberni, B.C.

Denticles as a criterion of species in Urceolariids

by W. Guhl. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1990. 19 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5509) Originally published in German at the VEB Gustav Fischer Verlag, Jena. ISSN 0704-3716
 MICROLOG 91-00994 1 fiche

An important criterion of Urceolariid species is the structure of the adhesive disc, which represents the bottom surface of the organisms, where it attaches to the substrate. This paper considers, in the light of published material, whether the description of only one morphological detail suffices to characterize a species.

A Description of fisheries in the vicinity of significant oil discovery areas off Newfoundland

by D.W. Kulka. St. John's : Dept. of Fisheries and Oceans, Newfoundland Region, Science Branch, 1991. iv, 126 p. : ill, maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1787) ISSN 0706-6457
 MICROLOG 91-04663 2 fiche

Fish has been an important commodity from the Grand Banks for over 400 years, but by 1979 the discovery of significant amounts of oil added another important resource to the area. Because of proximity, there is a likelihood of interaction or interference in the utilization of the two resources. This study defines all offshore fisheries, foreign and domestic, in the vicinity of the significant discovery areas (SDAs) and assesses areal interactions and impacts of

oil exploration/production on the offshore fishing industry. The study focuses on fisheries currently of significant commercial value. It is assumed that fishing would be curtailed in the current SDAs, but that these areas would expand as more exploration was conducted. Therefore the study provides information over a wider area surrounding the SDAs which might be affected by more extensive events such as spills or marine traffic related to oil activities.

Description of the Alberta garden suite pilot project

Lovatt Planning Consultants. Edmonton : Alberta Municipal Affairs, 1990. iii, 179 p. : ill. ISBN 0-88654-276-6

MICROLOG 91-00618 2 fiche

This report documents the Alberta garden suite pilot project from its origin to the stage of unit occupancy. The report focuses on the key decisions and actions which occurred during this implementation phase. Garden suites are self-contained residential units located on the property of a host family to accommodate and facilitate the provision of support services for one or two elderly parents or grandparents. The project is attempting to ascertain if the social benefits derived from garden suites warrant legislative changes and implementation guidelines to permit province-wide application of the concept.

Design and construction of a computer controlled two-dimensional acoustic array for image defects in offshore structure weldments, phases 1 and 2

Fleet Technology Limited. Kanata, Ont. : The Corporation, 1990. iii, 177 p. : ill. Bibliogr. CANMET contract: OSQ85-00304.

MICROLOG 91-00720 2 fiche

Non-destructive testing of materials using ultrasonic energy has been used successfully but has limitations in its flexibility and ease of use. This project designed and built a two dimensional acoustic array which, combined with the appropriate software, permits reconstruction of 3D images of the interior of steel weldments. In the first phase of the project, a 10 x 10 array of acoustic transducers was designed to operate in steel at an operating frequency of 5 MHz. The array was manufactured by cementing 100 wires in a tungsten loaded epoxy backing, gluing a sheet of PZT into a matrix of transducers. The electronics for using 20 elements as transmitters and 80 as receivers were designed and built, along with an interface for an IBM PC compatible computer. Phase II covers an improved array manufacturing process, the image reconstruction procedure, and the software development. Hardware problems prevented acquisition of useful test data, therefore no test results are presented.

The Design and testing of programmable logic control systems for electric cable shovels : final report

by C.L. Vatter. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1990. 29 p. : ill., fold. ill. CANMET contract: 23440-8-9267-01-SQ.

MICROLOG 91-01581 1 fiche

At the Bullmoose Mine in Tumbler Ridge, B.C., a truck/shovel system is the major mode of overburden removal. For the shovels to operate effectively, proper lubrication must be maintained at all times. This project designed and field tested programmable logic controller (PLC) based systems for two of the electrical cable shovels used at the mine. The system monitors and controls the lubrication system, monitors the condition of electrical motors and shipper shaft busings, and provides a display of data and conditions (lack of grease, unlubricated area, abnormal temperature) in the shovel operator's cab on a plasma display. The system was field tested for 6 months with one shovel and for 4 months with the other, during both summer and winter conditions and the data was evaluated to determine the effectiveness and reliability of the PLC systems. This report describes the installation of the PLC, results from the field testing, cost benefits and future expansion.

Designing collection routes through bank branches -- Rev.

by V. Lambert, G. Laporte and F.V. Louveaux. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 17 p. Bibliogr. (Publication ; no. 703)

MICROLOG 91-02145 1 fiche

Most banks must send out vehicles on a regular basis to their branches to collect cash and negotiables left by depositors. The problem is modeled as a vehicle routing problem with constraints and objective terms specific to the particular banking context, such as penalties for lost interest. The problem is studied through a deterministic case, and

through a stochastic case in which travel times are random. These two versions are modeled as integer mathematical programs, and are solved by means of a heuristic procedure. Problems derived from a real situation (a Belgian bank network) are solved under different scenarios.

Detection of genetic polymorphism on plasma proteins in cattle by immunoblotting : final report

by H. Tabel and G. Kraay. Regina : Saskatchewan Agriculture Development Fund, 1990. 16 p. Bibliogr. ISSN 0829-9455
MICROLOG 91-01874 1 fiche

The bovine complement system is a natural defence mechanism against infectious diseases. The system consists of 6 plasma proteins (complement component C3, factor B, factor D, properdin, factor H and factor I) which can act on microorganisms without the presence of antibodies. This study investigated whether genetic polymorphism could be determined in 3 plasma proteins (factor H, factor B and complement C3). Genetic polymorphism was determined in factor H by the combined techniques of SDS-polyacrylamide electrophoresis of bovine plasma and immunoblotting. Three phenotypes (S,S,F,F) were identified in a sample population of 149 cattle.

Determination of annual limit on intake for long-lived radioactive dust

by S.H. Ching and F.J. Horvath. Ottawa : Atomic Energy Control Board, 1989. ii, 13 p. Bibliogr. (Paper : INFO-0369) MICROLOG 91-03302 1 fiche

In certain sectors of the nuclear fuel cycle, workers are exposed to mixtures of radionuclides in co-existence with their respective decay daughter products at different degrees of secular equilibrium. Since long-lived radioactive dust (LLRD) contains mixtures of radionuclides which are in different proportions and are attached to airborne particulates of different sizes, the calculations of annual limit of intakes (ALI) for LLRD is not a straightforward matter. In addition, ALIs for some radionuclides are derived from the stochastic dose limit, while others are derived from the non-stochastic dose limit, depending upon which limit is more restrictive. This guide provides licensees with a method which is acceptable to the Atomic Energy Control Board for calculation of ALIs for LLRD; it does not provide guidelines for specific operations. To assist in explaining the method, a sample calculation for the ALI of fresh yellowcake is provided.

Determination of calcium-41 and nickel-63 in NPD GS concrete core samples

by S.P. Sood. Toronto : Ontario Hydro, Research Division, 1990. 10 p. Bibliogr. (Report : no. 90-244-K) MICROLOG 91-04642 1 fiche

Decommissioned Nuclear Power Demonstration (NPD) Generating Station at Chalk River, Ontario has become an important source of naturally aged components after 25 years of operation. As part of a program of nuclear plant aging studies, concrete cores were removed from many locations. One of the investigations consisted of the characterization of the long lived radionuclides present in some of the core samples using gamma spectroscopy. Since the long lived pure beta emitters or radionuclides decaying with only electron capture process cannot easily be determined without prior separation from all other activities (natural and artificially produced), a method was developed for the isolation of calcium and nickel from the matrix and for the determination of calcium-41 and nickel-63. This report summarizes the analyses of 4 core samples and the method used.

Determination of diarrhetic shellfish poison by measuring 50 per cent acid phosphatase activity inhibitory concentration (APIC50)

by K. Shiraki...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1990. 13 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5495) Originally published in Japanese. ISSN 0704-3716 MICROLOG 91-01003 1 fiche

Basic tests indicated that the growth of tetrahymenae is specifically inhibited by diarrhetic shellfish poison, that the 50 per cent growth inhibitory concentration corresponds roughly to 0.5 mouse unit/10 mL of medium, and that it is therefore possible to avoid defects inherent in the mouse method by using tetrahymenae to determine diarrhetic shellfish poison. However, using the test tube still culture method requires 3 days and is cumbersome. This paper describes a simplified method using the measurement of acid phosphatase activity produced by the tetrahymenae. Results indicated the method could be used in practical daily examinations.

The Determination of gold by X-ray fluorescence analysis : radioisotope excitation and K-line measurement (cost-shared) : final report

by I.V. Mitchell. London, Ont. : University of Western Ontario, Dept. of Physics, 1990. 22 p. : ill. Bibliogr. CANMET contract: 99112-01-SQ. MICROLOG 91-00744 1 fiche

X-ray fluorescence (XRF) techniques were applied extensively to impurity analysis in bulk materials, including minerals. The variant on this method, which is to use radioisotope sources to provide the incident photon flux, is much less well developed. This study determined whether the use of 133Ba showed promise for Au. A simple X-ray fluorescence system allowing for flexibility in source-sample-detector geometry was constructed and a spectrometer was adopted which is relatively transparent to high energy photons. Reference powdered ore samples containing known amounts of gold were used and a detection limit was extracted.

Determination of minimum data base requirements for performance testing with CSA F417-1985

Institute of Man and Resources. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. 61 p. : ill. Bibliogr. CANMET contract: 62SS.23283-7-6606. ISBN 0-662-18274-X MICROLOG 91-02411 1 fiche

The development of wind turbine technology over the past 20 years has been paralleled by an increased interest in the development of standards for safety, design, installation, performance and other aspects. These standards have been, or are being, developed on a national level by most countries and internationally. Canada has participated in standards development at both levels, particularly in performance testing. A preliminary standard was produced in 1986, with the recommendation that prior to approval of the standard, the procedures described be evaluated by carrying out a series of field trials. During the fall and winter of 1986 three machines were tested, with inconclusive results due to operational problems with the test machines and the observance of very high standard deviations of the output power measurements. Because of this, two machines

were further tested. This report describes the results of that testing.

Determination of radon flux rates in a uranium mine, Cluff Lake, Saskatchewan

SENE Consultants Limited. Ottawa : Atomic Energy Control Board, 1989. 172 p. : ill. Bibliogr. (Report : INFO-0347) MICROLOG 91-03310 2 fiche

In 1986, the Atomic Energy Control Board completed a project in which a computer model (VENTRAD) was developed to model underground mine ventilation systems. The accuracy of the radon/radon daughter concentration predictions by the computer model depend on the input parameters describing the radon source term. At present, there is a lack of reliable data on radon sources in general and in uranium mines in particular. This study determined the flux of radon emitted per unit surface area in selected locations of Amok Ltd.'s underground Cluff Lake uranium mine; measured parameters that can have an influence on radon flux; tested the VENTRAD computer program using the input parameters measured in the mine; and determined the total flux of radon per unit surface area from the total amount of radon exhausted from the mine and the total surface area of the mine openings.

Determination of trace metals in estuarine sediment pore waters containing high concentrations of iron

by J.A.J. Thompson and D.W. Paton. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1991. iii, 10 p. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 133) ISSN 0711-6774 MICROLOG 91-06793 1 fiche

The analysis of marine sediment interstitial water exemplifies a specific matrix condition not normally encountered in seawater investigations, often containing higher burdens of dissolved solids, including trace metals, wide ranges of redox conditions, higher organic carbon, and often free sulfide ion. Dissolved iron in pore waters can attain concentrations which, upon addition of carbodithioate ligands, can result in the formation of insoluble precipitates of iron complexes. This report describes the adaptation of Freon TF and the ligand mixture of ammonium pyrrolidine carbodithioate and diethylammonium carbodithioate in a double extraction schema for the preconcentration of trace metals in estuarine sediment pore waters containing high concentrations of iron. The analysis of the final aqueous acid extract for cadmium, cobalt, copper, lead, and zinc, and examples of field data, are also included.

Determining reuse options for closed school sites -- Rev.

Regina : Regina Urban Planning Department, 1989. 50 p. : ill., maps.
MICROLOG 91-02814 1 fiche

The purpose of this report is twofold: to propose policies and guidelines which will assist in the determination of appropriate reuse and redevelopment options for the sites of closed schools; to propose a decision-making process on such issues that allows neighbourhood residents and others to provide input. This policy paper does not deal with the decisions to close schools, which come under the jurisdiction of local school boards, but considers the reuse and redevelopment of schools already closed in the inner city and mature suburbs of Regina.

Developing countries and the new biotechnology : market entry and industrial policy

by F.C. Sercovich and M. Leopold. Ottawa : International Development Research Centre, 1991. 109 p. Bibliogr. (Manuscript report ; 279e)
MICROLOG 91-01898 2 fiche (Available on fiche only)

This document is focused on the economic significance of biotechnology. It reviews the evidence as to what is the actual state of diffusion of biotechnologies across a broad range of applications and the perspectives ahead in this regard. It also examines the most important factors that affect the timing of introduction and rate of diffusion of biotechnologies. In addition, it focuses on less developed countries' strategies for entering the field and related industrial policy issues. Finally, it provides some directions for further research.

Development and application of energy recovery and wastewater treatment systems for selected waste streams generated during the production of fuel alcohol

CH2M Hill Engineering Ltd. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. x, 82 p. : ill. Bibliogr. CANMET contract: 051SZ.23283-7-6165. ISBN 0-662-17567-0
MICROLOG 91-01231 1 fiche

Project to characterize and assess selected waste streams generated during the processing of sugars derived from lignocellulosic feedstocks to produce fuel-grade alcohol and to conduct a comprehensive treatability program to develop process standards for waste treatment, emphasizing energy recovery and utilization. Based on the finds of an extensive literature review and identification and characterization of waste streams generated during the production of fuel alcohol, two waste streams were selected for treatability or toxicity analysis. A steam explosion pretreatment condensate waste stream was treated anaerobically using a bench-scale upflow sludge blanket and fixed film anaerobic reactors. Batch anaerobic toxicity assay analysis was then performed. Based on the results of the treatability testing, process standards and design criteria were developed for the full-scale implementation of waste treatment technologies.

Development and evaluation of high-speed electronic injection systems for the delivery of natural gas to the intake ports of a heavy-duty engine

by British Columbia Research Corporation and Ortech International. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. v, 65 p. : ill. Bibliogr. CANMET contract: 23216-8-9111-01-SQ. ISBN 0-662-18127-1
MICROLOG 91-04545 1 fiche

Current heavy duty natural gas engines rely on elementary fuel metering systems. To improve the efficiency and reduce emissions of these engines, a more sophisticated fuel delivery system is required. One approach is the use of a gas valve for injection of natural gas into the intake ports. This project evaluated an existing solenoid valve and three prototype valves. The valves tested were a production solenoid operated valve manufactured by Servojet Products Inc., a prototype solenoid operated valve developed by Ortech International, a prototype continuous flow valve sized for one cylinder developed by B.C. Research, and a prototype continuous flow valve sized for an entire engine developed by B.C. Research, to be used with a fuel delivery manifold, or 'spider'. The results are graphed and discussed.

Development of a calibration strategy for suspended sediment samplers, phase I

by P. Engel and P. Zrymiak. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. ii, 23 p. : ill. Bibliogr. (NWRI contribution ; 89-121)
MICROLOG 91-01686 1 fiche

The collection, computation and publication of fluvial sediment and related data are a national program managed by the Water Survey of Canada (WSC) to evaluate the effects of

sedimentation on the life and economics of projects related to water supply, pollution, navigation, flood control and recreation. The fine fractions of the suspended sediment load are known to be carriers of toxic substances and therefore suspended-sediment concentrations are an important indicator of water quality in rivers. WSC is currently in the process of developing a quality control system for its data gathering activities and wishes to re-define its sampler calibration program. This report represents the first phase of the development of this strategy. Using dimensional analysis, basic equations were developed and then applied to review the calibration method used prior to 1972.

Development of a thoria flowsheet : progress report no. 1

by G.M. Ritcey and E.W. Wong. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, Energy Research Program, 1983. 17 p. : ill. Bibliogr. (Report : ERP/MSL 83-4(CR)) MICROLOG 91-04928 1 fiche

CANMET and AECL have recently begun a joint program to establish a domestic source for nuclear purity ThO₂ for future fuelling of the breeder reactor. CANMET had previously treated Elliot Lake solutions for the removal and recovery of thorium. This background initiated the present work, using ion exchange barren solutions from the uranium mills in Elliot Lake as the feed solution. This report describes the production of a high purity thoria material through a two storage extraction system. Bench-scale tests were performed in separatory funnels to determine the various parameters of extraction, scrubbing, stripping and re-extraction into a separate system. Primene JMT was used as a reagent, pre-equilibrated with 5% H₂SO₄ prior to contact with the leach liquor. Following the bench tests, continuous testing was conducted on a small Bell Engineering countercurrent mixer settler apparatus.

Development of a vaccination technique against somatostatin to improve growth : technical/final report

Regina : Saskatchewan Agriculture, Agriculture Development Fund, 1990. 12 p. Bibliogr. ISSN 0829-9455 MICROLOG 91-02589 1 fiche

Somatostatin is a peptide hormone secreted from the hypothalamus and has been shown to strongly inhibit growth hormone secretion from the pituitary gland. The objective of this research was to develop a method to neutralize somatostatin by immunizing the animal against its own circulating somatostatin.

AG MS PR SC

The Development of adsorption simulation software (UP-W6-011) : final report

by J. Greydanus and H. Rasmussen. London, Ont. : University of Western Ontario, 1988. ii, 59 p. : ill. Bibliogr. CANMET contract: 79162-01-SS. MICROLOG 91-00733 1 fiche

Research is currently being undertaken to investigate the possibility of removing unwanted heteroatomic compounds from the feedstock during the early stages of fuel production via an adsorption process using zeolites. Since nitrogenous compounds in particular make the hydrotreating process very expensive, the realization of this possibility could significantly reduce refining costs. Currently the research to determine appropriate adsorbent design is done primarily through the use of comparative column adsorption experiments which are costly and time consuming to perform. This report describes the development of computer simulation software for both batch and column adsorption processes that can be used to significantly reduce the experimental effort required.

Development of an antibody-based staining method for diagnosis of influenza A virus in pigs : final report

by D. Haines and E. Clark. Regina : Saskatchewan Agriculture Development Fund, 1990. 9 p. ISSN 0829-9455
MICROLOG 91-02588 1 fiche

Influenza A virus infection is known to be an important respiratory pathogen in pigs; however, its precise role is unknown since this micro-organism is extremely difficult to demonstrate by routine diagnostic techniques. The purpose of this research was to develop and verify the sensitivity and specificity of an antibody-based staining method for the detection of influenza A virus in routinely formalin-fixed paraffin-embedded tissue sections.
AG-MS PR SC

Development of an effective quality assurance program for exposed residential concrete flatwork

by P.M. Gifford and M.A. Ward. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1990. v, 34 p. : ill. ISBN 0-88654-297-9
MICROLOG 91-02797 1 fiche

Flatwork includes concrete used in driveways, garage floors and aprons, sidewalks and patios. It is exposed to freezing and thawing in a moist environment, often in the presence of deicing chemicals. While the Alberta Building Code provides specifications for the use of concrete in construction of buildings, the requirements are seldom enforced in residential flatwork application. This project was undertaken to identify present trade practices which could lead to poor performance or failure of residential flatwork. A preliminary study was undertaken in the summer of 1988 in Calgary and a field testing program the following summer at all sites investigated earlier. The field testing program monitored fresh concrete air content and slump; compressive strength; substandard handling, placing and finishing; and site preparation. A total of 123 sites were visited during placing and finishing activities.

Development of an environmental corrosion index for Ontario

by K.S. Yoshiki-Gravelsins, M. Niewiadomski and H. Leung. Toronto : Ontario Hydro, Research Division, 1990. i, 27 p. : ill., maps. Bibliogr. (Report ; no. 90-157-K)
MICROLOG 91-00788 1 fiche

In support of Ontario Hydro's transmission line refurbishment program, studies are being conducted to identify pollutants responsible for atmospheric corrosion of ACSR transmission line conductors and to investigate means to predict the remaining life of these conductors. This study developed an environmental corrosion index which considers key atmospheric pollutants and corresponding threshold levels; assigned index values to sites in Ontario; and determined the relationship between degree of corrosion and the environmental corrosion index, such that useful conductor life can be predicted.

The Development of an in-mine geophysical borehole logging system for the Science Branch, Science and

Professional Services Directorate, Supply and Services Canada ; by K. Howells...et al. Dartmouth, N.S. : Nova Scotia Research Foundation Corporation, 1990. iv, 173 p. : ill. Bibliogr. Fold. ill. not filmed. CANMET contract: 23440-99197-01-SQ
MICROLOG 91-06130 2 fiche

This report describes a conceptual design for an in-mine geophysical borehole logging system for use in underground coal mine exploration and pre-mine development, particularly in multi-seaming operations where surface access is difficult or expensive. The system is modular and each module (or its individual parts) will be explosion proof, intrinsically safe or certified for special protection, or employ a combination of the regulatory requirements for safe operation in the coal mining environment. The report describes the need for such a system in the Cape Breton coalfields, defines the problem, describes the conceptual design, presents a marketing study, addresses the question of patents, and includes a cost analysis and schedule for development.

Development of an optimal sol-gel immobilization process for uranium adsorbing biomass : a final report

by V.I. Lakshmanan and P.D. Tackaberry. Mississauga, Ont. : ORTECH International, 1990. 51 p. : ill. Bibliogr. CANMET contract: 99015-01-SQ
MICROLOG 91-04717 1 fiche

The purpose of this study was to test and optimize a new sol-gel formulation to be used in conjunction with the unproven industrial waste-grown uranium adsorbing fungus *Rhizopus arrhizus*. Testwork was undertaken on a bench scale in an attempt to simulate an ion exchange process on an industrial scale. Sol-gel formulation was optimized with respect to fungal form used, the addition of fines, and the effect of preconditioning. Uranium loading and elution optimization included particle sizing, and the effect of flow rates.

Development of analytical methods for monitoring thermal EOR producing wells : technical report for the period May 15, 1989-April 30, 1990

by B. Verkoczy and M. Jimale. Regina : Saskatchewan Research Council, 1990. vi, 50 p. : ill. Bibliogr. (SRC publication ; no. P-110-146-C-89) CANMET contract: 89255-01-SQ
MICROLOG 91-00740 1 fiche

The petroleum industry's need for more detailed and accurate chemical composition data of produced oil has significantly increased in recent years because of changing exploration, production and refining environments. A significant regional variation in the composition of the heavy oil obtained from different Saskatchewan reservoirs is expected for saturates, aromatics, resins and asphaltenes. The Syncrude analytical technique is one of the methods widely accepted by the petroleum industry, but it is not reproducible, requires a considerable amount of time, and needs large volumes of solvents for SARA determination. This report describes the development of analytical methods for monitoring thermal enhanced oil recovery (EOR) producing wells, including background information, the objectives of the investigation, and a summary of previous work.

Development of artificial sill pillar design, Lupin Mine, Northwest Territories, part 2 : pre-mining ground stress determinations

by B. Arjang. Ottawa : Canada Centre for Mineral and Energy Technology, Mining

Research Laboratories, 1990. ii, 23 p. : ill. Bibliogr. (Report ; MRL 90-137(TR))
MICROLOG 91-02416 1 fiche

The Echo Bay Mines Ltd. Lupin operation produces ore from a steeply dipping orebody by a sub-level longhole open stope mining method, leaving sill pillars in the ore. To increase ore recovery, a research project was established to design and develop guidelines for artificial sill pillars. The project investigated rock mechanics to determine in situ stresses and physical properties of various rock types, instrumentation to monitor ground movements around the proposed test site excavations, and, based on rock mechanics data, modified a numerical model of the mine and developed design guidelines for artificial sill pillars. As part of the project, pre-mining ground stresses were determined on the 410 and 890 levels. Overcoming strain relief measurements were conducted in the hanging wall, footwall and orebody in the west zone of the mine. Rock properties were tested on core specimens obtained from the stress determination sites.

The Development of bacterial biofilms for the selective removal of metals from mining effluents : final report

Microbios Ltd. Calgary, Alta. : The Corporation, 1991. 17 p. : ill. CANMET contract: 99304-01-SQ
MICROLOG 91-04692 1 fiche

Microbiologists have noted the avid tendency of bacterial cells and their exopolymers to trap heavy metal ions. Falconbridge Ltd. has experienced environmental problems because effluents from some of its remote sites have been found to contain large amounts of nickel. This report tested biofilms formed by a large number of pure aquatic microbial isolates for their ability to trap Ni, Co, Cu and precious metals (Ag, Au, Pt) from a standard mixture of metals; tested the ability of biofilms of the most successful isolates, which trap Ni or Co but not Fe, to trap these metals out of mine effluents supplied by Falconbridge; examined a mine effluent system chosen by Falconbridge to determine whether the best trapping strains are naturally present in the effluent ecosystem, and to devise environmental parameters to encourage their predominance in natural biofilms; and developed a microbial metal trapping system that will remove valuable metals, selectively, from Falconbridge effluents and will facilitate the commercial recovery of these metals.

Development of equipment to determine the size and distribution of air bubbles in fresh concrete

by K.W. Nasser. Saskatoon, Sask. : University of Saskatchewan, 1990. iv, 27 p. : ill. CANMET contract: 89212-01-SS
MICROLOG 91-00375 1 fiche

Durability of concrete exposed to freezing and thawing and to de-icing salts is dependent upon the strength of the concrete and the volume of entrained air therein. Generally the air content of the concrete is measured by either the pressure or the volumetric methods as recommended by the Canadian Standards Association. While these methods are satisfactory in most respects, they do not give any indication of the size and distribution of the air bubbles in the fresh or hardened concrete. This report describes the development of a method to measure the volume, size, and distribution of air bubbles in fresh concrete using polaroid photographs and analyzing them with both an image processor and a computer.

Development of photovoltaic-diesel hybrid system design incorporating advanced control algorithm

by Westinghouse Electric Corporation ; and Integrated Power Corporation. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. xiii, 102 p. : ill. CANMET contract: 23283-8-6181. ISBN 0-662-18162-X MICROLOG 91-01224 2 fiche

Photovoltaic-diesel hybrid systems offer an attractive alternative to other technologies for supply of high quality power to remote areas. This report presents an evaluation of hybrid system design and operation, emphasizing battery behaviour and battery-system interactions. The analysis is done using a framework of life cycle cost calculations to evaluate the effect of proposed designs on end user cost of energy. The goals are to develop a battery model which can be used both in design analysis and in actual system control. The hybrid system analysis was done

using a proprietary model of the Integrated Power Corporation which looks at the hybrid system both as a whole system and as individual components. A simplified form of this model suitable for first level analysis is presented in the study.

• CA CM EN PS SC

Development of photovoltaic-diesel hybrid system design incorporating advanced control algorithm : final report

prepared by Westinghouse Electric Corporation and Integrated Power Corporation ; for Renewable Energy Branch, Energy, Mines and Resources Canada. Hamilton, Ont. : Westinghouse Electric Corporation ; Rockville, MD : Integrated Power Corporation, 1990. xi, 102 p. : ill. CANMET contract: 23283-8-6181. MICROLOG 91-02398 2 fiche

Photovoltaic-diesel hybrid systems have become an increasingly common option for supply of high quality power in remote areas. This study looks at the process of designing a hybrid system, at the major variables involved, such as relative size of components, and finally at the battery, the core of the system. The key to the battery analysis is a mathematical model of the discharge and recharge characteristics that can be used both as an analysis tool, and in the controller of the system itself. A framework of life cycle costing is used to provide an economic framework for decisions on system configuration. The results of the study are a recommended system configuration and a recommended battery management algorithm to be incorporated into the system controller.

Development of pollution control criteria for integrated iron and steel production, vol. 1 : summary report

by W.A. Lemmon. Victoria : British Columbia Steel Task Force, 1990. vii, 53 p. : ill. ISBN 0-7726-1244-7 MICROLOG 91-03869 1 fiche

Proposed pollution control criteria and a compliance monitoring regime were developed for an integrated iron and steel plant, based on the most commercially advanced production and pollution control technology. This volume summarizes pollution control criteria for a 3-million-tonne capacity plant, expressed in concentration units. In the case of wastewater discharge of pollutants to the environment, process weight units are also used, normalized to kg per tonne of crude steel. In those cases where the pollution source creates fugitive-type pollutant discharges, pollution control measures are proposed that would reduce them to the lowest level feasible.

BC EV NR PR SC

Development of pollution control criteria for integrated iron and steel production, vol. 2 : background report

by W.A. Lemmon. Victoria : British Columbia Steel Task Force, 1990. xxii, 523 p. : ill. Bibliogr. ISBN 0-7726-1244-7 MICROLOG 91-03862 6 fiche

BC is being considered as a site for an integrated iron and steel project, but does not have relevant pollution control criteria. This project was therefore commissioned to develop such criteria based on the most advanced production processes and technology that would meet the majority of concerns for such a plant and identify pollution problems that would still exist. Information was gathered from federal and provincial governments in Canada and the US, Canadian steel companies, iron and steel associations, suppliers to the steel industry, and technical and trade journals. Plant visits were also made to Stelco at Nanticoke, and Dofasco at Hamilton, and discussions were held with the

Ontario Ministry of the Environment. BC EV NR PR SC

Development of process control software, phase II : final report

Atlantis Scientific Systems Group Inc. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1991. i, 9 p. CANMET contract: 23440-9-9111-01-SQ. MICROLOG 91-07105 1 fiche

This report describes the further development of a process monitoring and control software package consisting of a remote communications capability that allows the system to be monitored and controlled from a remote location; an enhanced schematic editor to allow cut and paste; cascaded control loops, to provide more sophisticated heater control; and software changes, made in several stages, with each stage concluded by an on-site test. This document describes each of these developments and includes a revision of the original user manual. An extract from the original report describes off-the-shelf software and evaluation of communication libraries for PASCAL and issues relating to incorporation of remote communications into PC Control.

Development of subunit vaccines for control of bovine herpesvirus-1 (BHV-1) induced respiratory disease : technical/final report

Regina : Saskatchewan Agriculture, Agriculture Development Fund, 1989. 52 p. : ill. Bibliogr. ISSN 0829-9455 MICROLOG 91-05715 1 fiche

Bovine herpesvirus-1 (BHV-1) causes a number of diseases in cattle, including respiratory disease, abortion and neonatal deaths. This project was conducted to develop a subunit vaccine that, in contrast to the commonly used live attenuated vaccines, is safe and efficient. Previous studies had shown that three of the 30 proteins in the virus are responsible for the induction of protective immunity. This study demonstrated the abundant expression of

glycoprotein gIV in recombinant baculovirus infected cells. In addition to baculovirus, the study explored alternative systems for the expression of the BHV-1 glycoproteins, using microcarrier beads rather than infected cells. AG MS PR SC

The Development of test procedures and methods to evaluate air barrier membranes for masonry walls : final report

by G. Hildebrand. Ottawa : Canada Mortgage and Housing Corporation, Project Implementation Division, 1990. 50 p. : ill. MICROLOG 91-06245 1 fiche

Investigation of 15 'as installed' air barrier systems for initial air leakage, membrane adhesion under gust wind load and sustained wind load, membrane performance under stack effect (creep) load, membrane uniformity, and prescriptive data. The project was carried out in two phases, with phase I evaluating nine air barrier membranes (23 block wall substrates) and phase II evaluating six air barrier membranes (15 block wall substrates) and a blank block wall (no membrane). Toronto (Ont.). Planning and Development Dept. Toronto : The Dept., 1990. xvi, 138 p. : maps. CSI 89201.009. MICROLOG 91-00500 2 fiche

This report lists current projects (from application date to construction) in the central core of the City of Toronto that have six or more dwelling units and/or 1,000 square metres or more of non-residential floor area. Includes data for each project on site area, residential and non-residential area, proposed number of residential units, density, parking spaces, height, and loading docks. Projects are listed by street address and proposed use. MU ON PL

Development towards more efficient operation of an alfalfa dehy processing system : alfalfa dryer feed delivery automation

by B. Hill. Regina : Saskatchewan Agriculture Development Fund, 1988. 23 p. : ill. ISSN 0829-9455. MICROLOG 91-01726 1 fiche

Results of a study to improve dry chop moisture content uniformity and optimize drying efficiency through better control of the wet copy mass flow. The feeding system was re-designed in 1986 and installed and tested at Carlea Alfalfa Processors. Further tests in 1987 led to further re-design due to operational problems. Consequently, two feeder designs were built and compared to the conventional feeder for uniformity of feed delivery and functional feasibility. Both designs utilized the concept of a smooth belt surface which would presumably discharge the hay evenly to the dryer. AG MS PR SC

Di-methyl ether as an ignition assistance source for a heavy-duty methanol engine

prepared for Efficiency and Alternative Energy Technology Branch, Energy, Mines and Resources; by Sypher/Mueller International Inc. Ottawa: Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. vi, 70 p. : ill. CANMET contract: 23216-8-9112-1. ISBN 0-662-18487-4
MICROLOG 91-02407 2 fiche

Report on a project to configure and instrument a test engine to accept methanol fuel; build an experimental metering system to introduce bottled di-methyl ether (DME) into the inlet air stream of the engine to simulate the action of a catalytic reactor device; test the performance of the engine when running with the DME metering system; and analyze the test program results. The test engine was a 2-cylinder Cummins 4-stroke diesel, derived from the 10 litre L10 6-cylinder truck and bus engine. Only one cylinder was operational, the second being retained for balancing. The engine was fitted with a glow plug to provide ignition of the methanol fuel, which was injected through the fuel injector as for the normal diesel configuration. The test program included a comparison of engine performance when operating using the glow plug for ignition, and when using DME. The glow plug case was regarded as baseline. Emissions tests were carried out according to the U.S. test procedure.

Dietary energy and protein requirements of cattle that differ in mature body size: technical/final report

by J. McKinnon and R.D.H. Cohen. Regina: Saskatchewan Agriculture Development Fund, 1990. 54 p. : ill. ISSN 0829-9455
MICROLOG 91-01790 1 fiche

While it is recognized that cattle breeds differ in frame size and growth when calculating nutrient requirements for growing and finishing, there is confusion over the adequacy of current crude protein recommendations for large frame cattle. This study was designed to evaluate feedlot performance and carcass characteristics of medium and large frame steers fed finishing rations which varied in energy and protein content. Two hundred eighty-eight medium and large frame steer calves were fed six experimental rations consisting of 1 of 2 energy levels (73.5% or 78.5%) and 1 of 3 crude protein levels (11%, 13%, 15%). Biweekly weight average daily gain, skeletal size, days to market, feed consumption and feed efficiency were monitored during feeding. Carcass data included warm weight, fat cover, ribeye area, marbling score, dressing percentage and cutability. Carcass composition was estimated from dissection of randomly selected calves at the start of the experiment and at slaughter from 8 bone rib samples. Ration digestibility and nitrogen balance were determined concurrently in a separate feeding trial for 8 steers.

Dietary enzyme supplementation as a method of improving the nutritional value of cereal grains: technical/final report

Regina: Saskatchewan Agriculture Development Fund, 1990. 28 p. ISSN 0829-9455
MICROLOG 91-01888 1 fiche

Barley and oats are not considered good feed for poultry because the relatively high level of crude fibre is not digested by the chicken and the carbohydrate constituents, which are very viscous in water, cause a reduction in the digestion and absorption of nutrients. Research has demonstrated that dietary enzymes can break down the deleterious carbohydrate. This report presents the results of a study on the practical use of dietary enzymes for improving the nutritional value of barley; and the use of dietary enzyme supplementation in broiler chicken, laying hen and turkey diets.

Dietary sulphate, copper induced thiamine deficiency in livestock: final report

by D.A. Christensen. Regina: Saskatchewan Agriculture Development Fund, 1990. 181 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-01787 2 fiche

Some Saskatchewan water supplies are high in sulphate content, affecting copper status and copper utilization by cattle. This report presents highlights of the findings of the past several years on a problem involving low copper intake, high sulfate intake and a thiamine deficiency first observed in a cow-calf farm operation in southeastern Saskatchewan. Polioencephalomalacia (PEM) was identified and a possible relationship between PEM and high levels of sulfur intake was established.

Diffusion and biological oxidation as component processes regulating the deposition of tritiated hydrogen to soils

by T.G. Dunstall and G.L. Ogram. Toronto: Ontario Hydro, Research Division, 1991. iv, 43 p. : ill. Bibliogr. (Report; no. 90-235-K)
MICROLOG 91-07171 1 fiche

Elemental tritium (HT) undergoes rapid biological oxidation to tritiated water (HTO) in surface soils, the main sink for atmospheric hydrogen and its isotopes. Deposition of HT to soils via conversion to HTO is therefore a significant pathway for the contamination of plants and water by anthropogenic HT sources. Accurate modelling of the deposition of HT to soils is therefore essential to predict reliably the dose resulting from chronic or acute atmospheric HT releases. This study established the relative importance of gaseous diffusion of HT into soil and the subsequent biological conversion of HT to HTO as component processes of deposition velocity, and determined how each process was influenced by environmental factors such as soil moisture content, particle composition and organic content. Deposition profiles for HTO were determined for 11 soil types under conditions of varying soil water content. Comprehensive measurements were taken to evaluate whether the theoretical expression HT deposition velocity accurately modelled HT deposition.

Dignité humaine et patrimoine génétique

par B.M. Knoppers. Ottawa: Commission de réforme du droit du Canada, 1991. 103, 93 p. Bibliogr. (Série protection de la vie: document d'étude) *Bilingue (Human dignity and...)*. ISBN 0-662-58055-9
MICROLOG 91-03247 3 fiche

A l'approche de l'an 2000, l'avenir est porteur de promesses prodigieuses pour la génétique humaine. Mais comme la découverte de l'atome et, plus récemment, la mise au point de la fécondation in vitro, le progrès de cette science recèle la possibilité du bien comme celle du mal. C'est l'essence même du genre humain qui est en jeu. Ce document examine les points suivants: l'apercu génétique; le génome et le pool génique; la dignité humaine et génétique dans son contexte international et selon la Charte canadienne des droits et libertés; et la justice génétique.

Dimethyl sulfoxide as solubilization agent in the radioimmunoassay for the detection of polychlorinated dibenzo-p-dioxins

by J.P. Sherry...et al. Burlington, Ont.: Canada Centre for Inland Waters, National Water Research Institute, 1989. ii, 16 p. : ill. Bibliogr. (NWRI contribution; 89-130)
MICROLOG 91-05666 1 fiche

This study was undertaken as part of a larger effort to develop screening tests for the detection of trace organic contaminants such as dioxins. Since the polychlorinated dibenzo-p-dioxins (PCDDs) are very time consuming and expensive to analyze, they are suitable candidates for detection using such screening assays as RIA and EIA techniques. This report compares several alternative dioxin solubilization procedures, and their effect on assay performance at low levels; considers some ways in which assay efficiency can be improved without adversely affecting performance; and describes hapten associated problems and potential solutions.

Dioxin and furan levels in sediments, fish and invertebrates from fishery closure areas of coastal British Columbia

by L.E. Harding and W.M. Pomeroy. North Vancouver, B.C. : Environment Canada, Conservation and Protection, Environmental Protection, Pacific and Yukon Region, 1990. vii, 76 p. : maps. Bibliogr. (Regional data report ; DR 90-09)
MICROLOG 91-05705 1 fiche

In November 1988, partial results of a continuing national dioxin survey were released, showing unacceptably high levels of dioxins and furans in crab, shrimp and prawn fisheries in Howe Sound and near Prince Rupert. Three pulp mills operating at these locations were required to undertake further sampling and analysis, resulting in further closures in May 1989. In November 1989, further results of the survey were released, indicating the presence of dioxins and furans in 7 new locations. Companies in the areas were required to do further sampling and analysis. Although no sources of the toxins could be found at Kitimat, the companies there undertook voluntary, limited sampling. This report presents the results of the company sampling programs in all areas.

Dioxin Workshop : proceedings

Dioxin Workshop (1987 : Quebec, Que.). Ottawa : Canadian Council of Resource and Environment Ministers, 1987. v, 151 p. : ill. French ed. (*Colloque sur les dioxines...*) : 91-01568/3. ISBN 0-919074-46-4
MICROLOG 91-01557 2 fiche

Report of the workshop, which began with a plenary session consisting of short presentations that reviewed the dioxin problem from the perspectives of history, the need for reliable analytical data, current knowledge about dioxin levels in humans and the ambient environment, current combustion sources, dioxin hazards in pesticides, industrial and municipal effluents as dioxin sources, the toxicological effects of exposure to dioxins and the establishment of environmental standards. Following these presentations, the participants separated into working groups on control technology, regional issues, public exposure and standards. Each working group was asked to discuss priorities for action in communications, regional, regulatory, scientific and economic areas. The participants then met again to summarize their conclusions. Abstracts are included of papers given.

Dioxins and furans in bottom sediments near the 47 Canadian pulp and paper mills using chlorine bleaching

by L. Trudel. Ottawa : Environment Canada, Inland Waters Directorate, Water Quality

Branch, 1991. viii, 286 p. : ill., maps. Bibliogr. MICROLOG 91-05739 4 fiche

In 1988, concerns about dioxin and furans near chlorine-bleached pulp mills led to the establishment of a national dioxin sampling program. Part of this program included a sampling survey and report on dioxins and furans in river and ocean bottom mud or sediments. The sampling was carried out in cooperation with provincial environment agencies. This report describes the contamination of sediments near pulp mills by dioxins and furans as a result of the national survey. A total of 165 sediment samples were collected near the 47 chlorine-bleached pulp mills across Canada, 12 of which were in a coastal environment, and 35 of which were inland on river systems. Four other mills were sampled to act as a control. Samples were analyzed by both government and private laboratories for dioxins, furans, organic carbon, and the size of particles. Contaminated samples from each site were evaluated by a contamination classification system based on toxicity equivalents of the most toxic member of the dioxin family.

Director's annual statement : world order and double standards : peace and security, 1990-91

by B. Wood. Ottawa : Canadian Institute for International Peace and Security, 1991. 37 p. Bibliogr. French ed. (Déclaration annuelle...) on the same fiche. CSI 22305.004. ISSN 0846-8028 MICROLOG 91-03251 2 fiche

As a result of recent and dramatic changes in the world's political system, this paper takes stock of the state of thinking and action at this historic crossroads of peace, war, law and order. It attempts to outline an agenda of issues that will have to be confronted in winding down the Cold War, in dealing seriously with conflict and arms races outside the East-West arena, and in seeking a more coherent definition and ideal of international and world order. Chapters include: East-West relations after the Cold War; from East-West to North-South confrontation; recent trouble in the Middle East; international order, world order and human order; the machinery of war and the machinery of order; and Canada and world order.

Discharge allocation for hydro-electric generating stations

by E.M. Klein. Toronto : Ontario Hydro, Research Division, 1990. i, 55 p. Bibliogr. (Report ; no. 90-170-K)

MICROLOG 91-04558 1 fiche

The power produced by an individual hydro-electric generating unit is a function of the head and the discharge of water through the unit or units. If the discharge is not properly allocated among the generating units, the potential electrical energy may not be fully achieved. This report represents a continuation of a preliminary study performed by Sim (1987). A hybrid separable programming-heuristic algorithm was developed called HYDOPT. It was written in C and implemented on an IBM-compatible personal computer. This program has the flexibility for adaptation to any hydro-electric generating station configuration. The report presents the model formulation, results and conclusions.

Disciplines convergentes : la gestion de l'information consignée dans les pays en voie de développement

révision par Atsuko Cooke. Ottawa : Centre de recherches pour le développement international, 1990. v, 63 p. : ill. Bibliogr. (Rapport manuscrit ; 2341) Communications présentées lors d'une table ronde. L'éd. anglaise (Converging disciplines...) : 91-01416/1.

MICROLOG 91-01417 1 fiche (Available on fiche only)

En mai 1989, les Archives nationales du Canada accueilleraient à Ottawa le Colloque sur les archives courantes du Conseil international des archives. Intitulé 'Les disciplines convergentes dans la gestion de l'information

consignée', le colloque offrait à près de 400 participants l'occasion d'analyser l'impact de la nouvelle technologie sur la gestion de l'information et de poser des questions fondamentales sur la validité des frontières traditionnelles entre les disciplines de la gestion de l'information. Le colloque a été suivi d'une table ronde d'une journée, organisée conjointement par la Direction des documents gouvernementaux des Archives nationales du Canada et la Division des sciences de l'information du Centre de recherches pour le développement international. L'objectif de la table ronde était d'explorer plus en profondeur les problèmes propres aux pays en développement dans le contexte de la convergence des disciplines et des techniques en gestion de l'information consignée. Plus précisément, les discussions ont été axées sur des préoccupations communes comme la formation et le perfectionnement professionnel, la gestion des archives traditionnelles et non traditionnelles, l'utilisation et les utilisateurs des archives, et le recours à la nouvelle technologie.

Discussion paper on sterilization of minors and mentally incompetent adults

Winnipeg : Manitoba Law Reform Commission, 1990. ii, 40 p. Bibliogr. Executive summary (4 p.) laid in. MICROLOG 91-02297 1 fiche

This paper summarizes the law in the area, outlines the legal issues surrounding the topic, and poses the questions of the need for a legislative response to the Eve case, who should be the decision-maker, the need for procedural safeguards, the basis for the sterilization decision, and the factors to be considered before making the decision. The issues raised affect a narrowly-defined section of society, those who are legally incompetent to consent to medical treatment. Such legal incompetence stems from minority (being under 18 years of age) or from a certain level of mental disability in adults (including mental retardation and mental illness). A draft Alberta statute is also included.

Dispersion and behaviour of gold in stream sediments

by W.K. Fletcher. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1990. iv, 28 p. : ill., maps. Bibliogr. (Open file ; 1990-28) ISSN 0835-3530 ISBN 0-7718-8954-2

MICROLOG 91-01153 1 fiche

Stream sediment geochemistry and heavy mineral surveys are routinely used in the early stages of gold exploration in the Cordillera, although the results of such surveys are often extremely erratic and difficult to reproduce or confirm. Since little has been published on the sedimentological behaviour of gold particles in streams, a study was begun in 1985, as part of a broader study of heavy minerals in streams, on the distribution and transport of free gold in streams in southern B.C. This report summarizes the findings, emphasizing the practical implications for use of stream sediment surveys in gold exploration. The report covers size distribution of gold in sediments, distribution among bedforms and along the longitudinal profile, and seasonal variations in gold concentrations.

Distribution and zoogeography of the Bivalvia of the eastern Pacific Ocean

by F.R. Bernard, S.M. McKinnell and G.S. Jameson. Ottawa : Dept. of Fisheries and Oceans, 1991. iv, 60 p. : ill., maps. Bibliogr. (Canadian special publication of fisheries and aquatic sciences ; 112) ISSN 0706-6481

ISBN 0-660-13428-4 MICROLOG 91-03535 1 fiche

Review of the distribution of the marine bivalve fauna of the eastern Pacific Ocean from Bering Strait, Alaska to south of Cape Horn, Chile, based on the catalogue of Bernard (1983) and reworking of some new records of the Galapagos and Hawaiian Islands fauna. The review formulates and examines hypotheses concerning long and short term factors influencing the coast-wide distribution of the bivalve fauna and gives consideration to global effects of plate tectonics, continental displacement and environmental factors. Ordination and clustering techniques are used to examine the size and distribution of zoogeographic provinces and the characteristics of these provinces are described. Finally, the bivalve fauna of the Eastern Pacific islands are examined and discussed.

Distribution annuelle et caractérisation préliminaire des habitats du béluga du Saint-Laurent

par R. Michaud...et al. Québec : Ministère des pêches et des océans, Direction de la gestion des pêches et de l'habitat, Division de l'habitat du poisson, 1990. vii, 30 p. : cartes géogr. Bibliogr. (Rapport technique canadien des sciences halieutiques et aquatiques ; no 1757) ISSN 0706-6570

MICROLOG 91-01506 1 fiche

Cette étude dresse un bilan des informations historiques et contemporaines sur la distribution des bélugas dans l'estuaire du Saint-Laurent et le fjord du Saguenay. Les références utilisées sont les publications scientifiques existantes de même que les données inédites obtenues auprès des principaux chercheurs et des observateurs privilégiés. Des patrons de distributions saisonnières faisant ressortir les principales modifications survenues au cours du siècle dernier, sont proposés. L'analyse des données d'observation et des données océanographiques disponibles permet de procéder à la délimitation et à une caractérisation préliminaire des principaux habitats fréquentés par le béluga. La vocation de l'habitat, de même que les conditions physico-chimiques qui y prévalent, sont mises en lumière.

Distribution of biomass and nutrients in some New Brunswick forest stands : possible implications of whole-tree harvesting

by S.M. Malondo, M.K. Mahendrapa and G.D. Van Raalte. Fredericton : Forestry Canada - Maritimes Region, 1990. v, 40 p. Bibliogr. (Information report ; M-X-170E/F) Bilingual (La Distribution de la biomasse...). ISSN 0834-406X ISBN 0-662-16414-8

MICROLOG 91-00180 1 fiche

Whole-tree harvesting (the removal of all above-stump tree components from the logging site, also referred to as intensive harvesting) is an increasingly common practice in the Maritimes, but there is little quantitative information on its effects on long-term site productivity. This study reports on biomass and nutrient content in both above-ground components and forest floors of 25 forest stands in N.B. These stands comprise 8 commercially important tree species growing naturally in different parts of the province. As the effects of tree harvesting on site productivity may be site specific, stands of each species were sampled on different site qualities as estimated in the field. The data

reported constitute part of a larger study.

Distribution of demersal fishes in Hecate Strait, British Columbia, based on systematic trawl surveys conducted from 1984-87

by J. Fargo, A.V. Tyler and R.P. Foucher. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1990. iv, 115 p. : maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1745) ISSN 0706-6457 MICROLOG 91-01508 2 fiche

Report on seasonal and annual trends in abundance and bathymetric distributions for 14 major species in the Hecate Strait region using survey catch rate data. Three systematic trawl surveys of Hecate Strait were conducted between 1984 and 1987. The surveys were conducted with standardized gear and the entire catch was sorted and measured for length by species. The major species caught on the surveys were examined for distributional characteristics using a computer resident, two-dimensional interpolation function applied to relative catch per unit effort (kg/hr) data for each species. Five ranges of proportions were contoured and shaded to produce a density map for each species using a VAX/781 mainframe computer. Relative abundance indices for each major species in each assemblage were also computed by weight and size composition for each survey depth interval.

Diverse racial and cultural groups' access to the social service system

by G. DeSantis. Hamilton, Ont. : Social Planning and Research Council of Hamilton and District, 1990. xi, 204 p. : ill. Bibliogr. MICROLOG 91-01187 3 fiche (Available on fiche only)

The Regional Government asked the Social Planning and Research Council of Hamilton and District during the spring of 1989 to undertake a study of the accessibility of the social service system in Hamilton-Wentworth for the diverse cultural and racial population. Accessibility refers to the securing of needed services by a consumer. Access to services is affected by the following types of barriers: lack of information, cultural differences, the service is too expensive, or the client has to travel too far to get to the service. Client access refers to the extent to which clients are able to get needed services whereas organizational access is the extent to which clients are represented and participate in the planning and implementation of services as volunteers or staff people. This report discusses both these

types of access.

Diversity performance in frequency-hopped 8-ary signals-implementation and measurements

by P. Tardif and E.B. Felstead. Ottawa : Dept. of Communications, Communications Research Centre, 1990. vii, 44 p. : ill. Bibliogr. (CRC report ; no. 1432) MICROLOG 91-00882 1 fiche

A micro-processor based signal processor was built and tested. It was capable of performing the diversity combining needed to reduce the error rate of 8-ary non-coherent FSK signals demodulated onboard a satellite. Two combining techniques were implemented and tested: hard decision majority vote (HDMV) and normalized envelope detection (NED). Measurements of bit error rate performance of these two techniques in the presence of system noise plus either partial-band noise (PBN) or multiple tone (MT) jamming were made for levels of diversity, L, from 1 to 32.

Division des archives gouvernementales

guide compilé par Cynthia Lovering ; introduction de Terry Cook. Ottawa : Archives nationales du Canada, 1991. vii, 164, vii, 154 p. : ill. (Collection de guides généraux) Bilingue (Government Archives Division). ISBN 0-662-58186-5 MICROLOG 91-05095 4 fiche

La Division des archives gouvernementales évalue, sélectionne, conserve et préserve des archives du gouvernement du Canada, en plus d'offrir un service spécialisé de consultation. Les deux premières parties de ce document décrivent les activités et l'organisation de la division, les principes qui sont servent à classer les documents originaux, ainsi que les services et les outils de référence disponibles. La troisième partie explique la nature des notices et la façon d'utiliser le guide pour préparer des recherches dans les fonds de la division. Le corps du texte se compose de notices pour chaque groupe d'archives, qui comprennent un bref historique du ministère ou de l'organisme, un court paragraphe expliquant les fonctions, et une description sommaire des documents.

Division of Canada Pension Plan credits in Alberta

Edmonton : Alberta Law Reform Institute, 1990. ii, 59 p. (Report ; no. 58) ISSN 0317-1604 ISBN 0-8886-4165-6 MICROLOG 91-02265 1 fiche

Describes the legislation and the way that it operates, and the problems that have arisen in its operation. It considers the relationship between the credit-splitting provisions and provincial matrimonial property law. It also contains a number of items of background information that helped the Institute to reach its

conclusions. Finally, it outlines the choices for action that were considered, and the reasoning that led to the conclusions.

Docece River counting fence, 1990 operations

by I. Winther...et al. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1991. iv, 14 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 843) ISSN 0706-6465
MICROLOG 91-06196 1 fiche

The Docece River is located in the central coast district of BC and is less than 1 km long, draining Long Lake into Wyclees Lagoon, which then drains into Smith Inlet. The Docece River counting fence has been in operation since 1972, monitoring sockeye escapements into Long Lake to provide in-season estimates of the Smith Inlet sockeye fishery. The counting fence operates from late June or early July to mid-August. This report presents the results from the 1990 season, recorded by length, age and sex.

Document de travail sur la réglementation reliée à l'abordabilité, au choix, à la qualité et à l'innovation du logement

Energy Pathways Inc. Ottawa : Société canadienne d'hypothèques et de logement, 1989. vii, 125, vi, 102 p. Bibliogr. *En tête du titre*: ACT, Abordabilité et Choix Toujours. *Bilingue* (Discussion paper on regulations...).
MICROLOG 91-05999 3 fiche

Le programme Abordabilité et choix toujours (ACT) est une initiative du Groupe tripartite national. Ce programme a été conçu pour susciter des actions de réforme réglementaire dans le domaine de la construction domiciliaire, et il a pour objet de promouvoir le choix, l'accessibilité, la qualité et l'innovation en matière de logement. Ce document présente un résumé des renseignements recueillis au terme d'une analyse de la documentation qui existe sur les réformes réglementaires relatives à l'industrie du logement. Des entretiens ont également eu lieu avec des personnes désignées par le Groupe tripartite national, des représentants d'associations non gouvernementales, de l'industrie, et des gouvernements provinciaux et municipaux. Enfin, des réunions de plusieurs groupes et comités ont aussi été organisées.

The Domestic beluga *Delphinapterus leucas* fishery in the Mackenzie River Estuary, Northwest Territories, 1981-86

by J.T. Strong. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1990. iv, 52 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 800) This is the 47th data report from the Central and Arctic Region, Winnipeg. ISSN 0706-6465 MICROLOG 91-01182 1 fiche

The belugas summering in the Canadian Beaufort Sea are considered to be part of a population which is distributed through the Bering, Beaufort, Chukchi and Eastern Siberian seas, and Amundsen Gulf. There are apparently no records of the western Arctic domestic beluga harvest prior to 1954. This study was initiated to gather data on the harvest rate and to collect morphological data from landed specimens to be used in comparisons with other stocks at some later time. Harvest information was collected annually by both observation and hunter interviews and various standard measurements were collected from each specimen. Estimates of hunting losses from 1981-86 are based on information provided by the contract observers. • CA CF FI NO SC

Dommages causés aux fruits et aux légumes en entreposage commercial sous atmosphère contrôlée

rédateurs, P.D. Lidster, G.D. Blanpied, R.K. Prange. Ottawa : Agriculture Canada, 1990. 61 p. : ill. Bibliogr. L'éd. anglaise (Controlled-atmosphere disorders...) : 91-02964/1. ISBN 0-662-96326-1 MICROLOG 91-02963 1 fiche

Don River dry weather outfall survey

Canviro Consultants Ltd. Toronto : Toronto Area Watershed Management Strategy Steering Committee, 1987. viii, 246 p. : ill., maps. Bibliogr. (Technical report ; no. 11) MICROLOG 91-03275 3 fiche

During the late summer and fall of 1984, a dry weather survey was conducted on all outfalls discharging to the Don River and its tributaries as part of the ongoing Toronto area watershed management strategy study. This study is conducted to inventory and document all existing outfalls on the Don River and its tributaries; to assess the loadings and concentrations of selected contaminants discharged in dry weather from all existing outfalls to the Don River and its tributaries; and to identify and prioritize, on the basis of observation, outfalls discharging contaminants in concentrations in excess of modified municipal sewer-use bylaw limits. The field program included both the collection of historic data from the provincial and municipal governments and two consecutive screening runs, with intensive sampling of selected outfalls up to 4 times. Outfalls were then classified by parameters to assist in setting priorities for action. EV MU ON SC

A Doppler bin blanking CFAR processor for airborne radars

by G. Vrckovnik and D. Faubert. Ottawa : Defence Research Establishment Ottawa, 1991. xi, 38 p. : ill. Bibliogr. (Report ; no. 1073) MICROLOG 91-05471 1 fiche

This report develops a method for adaptively blanking-out the radar resolution cells which contain high clutter interference. An adaptive algorithm was developed to exclude the range-Doppler cells which contain clutter. This algorithm, when used in conjunction with a constant false alarm rate (CFAR) processor, greatly enhances the system's sensitivity to targets which reside in the clutter-free region of the range-Doppler run. It is also shown that the CFAR multiplier is relatively invariant to changes in the geometric conditions of the radar, when the adaptive Doppler bin blanking scheme is used.

Doppler evaluation of decompression tables

by R.Y. Nishi. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1988. 12 p. Bibliogr. (DCIEM technical report ; no. 88-TR-48) MICROLOG 91-00033 1 fiche

The Doppler ultrasonic bubble detector, which enables the detection of moving gas bubbles in the circulatory system, is a valuable tool for the evaluation of decompression tables and profiles. In order to provide a means for comparing results between different researchers and users of Doppler equipment, standardized procedures for monitoring dive subjects and identifying and classifying bubbles are required. The existing procedures and classification systems are similar enough that such comparisons can be made. This paper describes a recommended standardized monitoring procedure.

Dose response for selected environmental air pollutants : a study on runners : final report

by F. Silverman...et al. Toronto : Environment Ontario, Research and Technology Branch, Environmental Research, 1990. vii, 69 p. Bibliogr. ISBN 0-7729-7774-7 MICROLOG 91-03710 1 fiche

This study examined the effects of air pollution on runners during outdoor training runs in downtown Toronto from 1985-88. Subjects were selected from the Longboat Roadrunners Club, a local competitive group which carries out weekly training runs of 10-16 km in downtown Toronto and along the Lakeshore transportation corridor during rush hour. Pulmonary function and an oxygen rebreathing estimate of blood carboxyhaemoglobin level were obtained before and after 75 training runs involving 70 athletes. Subjective reports of symptoms and a personal estimate of exposure to air pollution over the run were noted. Local pollutant concentrations including carbon monoxide, nitrogen dioxide, sulphur dioxide and respirable suspended particulate matter, along with dry bulb temperature and relative humidity, were measured using portable multipollutant samplers.

Doses from portable gauges

by S.H. Linauskas. Ottawa : Atomic Energy Control Board, 1988. ix, 64 p. : ill. Bibliogr. (Research report ; INFO-0286) MICROLOG 91-03309 1 fiche

In Canada, there are now over 450 licensed organizations using portable moisture-density gauges, although current regulations do not require routine wearing of radiation dosimeters, nor are operators required to be atomic radiation workers as defined in the Atomic Energy Control Act. This report gives the results of field studies conducted in various regions of Canada to measure actual radiation exposures of operators using commercial moisture-density gauges under different situations. Newly developed dosimeter technology (bubble detectors) and conventional dosimetry techniques (thermoluminescent dosimeters, integrating electronic dosimeters, and CR-39 neutron track-etch detectors) were used to identify the doses to 23 moisture-density gauge operators and maintenance staff. Most of the passive dosimetry was supported by conducting radiation field mapping and time accounting whenever a moisture-density gauge operator handled or was near a gauge.

Double jeopardy, pleas and verdicts

Ottawa : Law Reform Commission of Canada, 1991. xvi, 109, xv, 115 p. Bibliogr. (Working paper ; 63) *Bilingual (L'Autorité de la chose...)*. At head of title: *Criminal law*. ISBN 0-662-57964-X MICROLOG 91-04453 3 fiche

The pleas of guilty and not guilty are not the only pleas now available under the law. An accused may instead invoke double jeopardy by saying, in essence, 'I have already been acquitted (or convicted) of this charge'. The purpose of this paper is to examine the protection against double jeopardy and pleas and verdicts found in the present law. It considers whether reform is necessary to ensure consistency with the general principles of recommendations that render the law more understandable, rational, and comprehensive.

Downslope movement of the herbicide hexazinone in the SBS zone

by P.G. Beaudry. Victoria : Forest Resource Development Agreement, 1990. vi, 23 p. : ill., maps. Bibliogr. (FRDA report ; 154) ISSN 0835-0752 ISBN 0-7726-1267-6 MICROLOG 91-03654 1 fiche

A trial was initiated to investigate the extent and processes of downslope movement of hexazinone, a soil-active, soil-mobile herbicide used in forestry. Three rates and two time periods of application were tested on two soil types near Smithers, BC. The hexazinone was applied on the top 100 m, and its downslope movement assessed on the lower 40 m by surface and subsurface soil water collected in specially designed troughs located at 7, 15, and 25 m below the last point of application. Hexazinone-sensitive plants, such as rose and aspen, were also used to indicate the extent of downslope movement.

Draft guidelines for an environmental impact assessment : Northumberland County Regional Solid Waste Disposal Facility

Fredericton : Environment New Brunswick ; S.I. : Northumberland Solid Waste Provisional Committee, 1991. 10, 11 p. *Bilingual (Projet de directives concernant...)*. MICROLOG 91-06880 1 fiche

The NB Department of the Environment has implemented a waste management program for

the province which will result in the replacement of the existing network of dumps by regional waste systems which incorporate state-of-the-art collection networks, recycling operations, and disposal facilities. The Northumberland Solid Waste Provisional Committee was established in early 1989 to develop and implement a long term strategy for handling the solid waste generated in Northumberland County. This document provides draft guidelines for issues to be addressed for the three sites selected for study. The guidelines include a description of the environmental impact process; a method of approaching and conducting an environmental impact assessment; how the study should be conducted and the content of the resulting report; and the potential impacts to be addressed, including specific socioeconomic and biophysical impacts.

Driftnet fishing : a legal perspective -- Rev.

by S. Maciunas and C. Morris. Ottawa : Library of Parliament, Research Branch, 1990. 17 p. Bibliogr. (Current issue review ; 90-2E) *French ed. (La Pêche au filet...)* on the same fiche. Revised 10 Sept. 1990.

ISBN 0-660-13906-5
MICROLOG 91-06068 1 fiche

In December 1989, the United Nations adopted a resolution on driftnet fishing on the high seas which reflected a consensus that there must be measures to control the practice and to reduce its harmful effects. This report focuses on practices in the North Pacific, considering their legal aspects and the regulatory and legislative solutions. The report describes the introduction of driftnet fishing, the 200-mile territorial limit, and the high seas. The relation of the problem to Canada's West Coast salmon fishery and squid fishery, the bilateral and multilateral agreements negotiated, and Canadian initiatives are described and analyzed.

Droit international et la Cour mondiale

Ottawa : Institut canadien pour la paix et la sécurité internationales, 1990. 2, 2 p. Bibliogr. (Fiche d'information ; 13) *L'éd. anglaise (International law...)* sur la même fiche. ISBN 0-662-96270-2

MICROLOG 91-00447 1 fiche

Le droit international constitue l'un des moyens que l'on utilise pour faire régner la paix et la stabilité dans le monde. Il s'agit d'un ensemble de principes et de règles qui ont pour but de régir les relations entre les Etats. Le droit international vise à résoudre les différends par la mise en oeuvre de principes juridiques, par opposition à un recours à la force. La Cour internationale de justice, ou la Cour mondiale, comme on l'appelle communément, constitue un élément important de ce droit. Ce document se penche sur cette question.

Dryland saline seep control -- Rev.

Ottawa : Agriculture Canada, 1991. 12 p. : ill. MICROLOG 91-05886 1 fiche

Dryland saline seepage, caused when water enters the soil profile, moves beyond the root zone, and forms a saline recharge area, is a major soil degradation problem. This publication describes the nature of saline seepage and formation, the sources of salts and excess water, vegetative and mechanical controls, and the purpose and function of the Dryland Salinity Investigation Service.

Dual-ascent procedures for multimodality location-allocation problems with balancing requirements

by T.G. Crainic and L. Delorme. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 24 p. (Publication ; no. 759) MICROLOG 91-06715 1 fiche

The multimodality location-allocation problem with balancing requirements is related to one of the major logistics issues faced by distribution and transportation firms, the management of a fleet of vehicles over a medium to long-term planning horizon. This paper presents a dual-ascent approach for this formulation which may be used either to obtain a good heuristic solution, or to compute sharp bounds in a branch-and-bound scheme. Two variants of this approach are compared and their performances are analyzed on a large number of randomly generated problems and on a large scale application to the strategic/tactical planning of the land operations of an international maritime container shipping firm.

Earthquake damage in the San Francisco area and projection to Greater Vancouver

Institute for Research in Construction (Canada). Ottawa : Canada Mortgage and Housing Corporation, 1990. 42 p. : ill., maps. Bibliogr. MICROLOG 91-06010 1 fiche

The earthquake that hit the San Francisco area on October 17, 1989 produced damage to buildings, transportation facilities, and services, as well as over 60 dead. This earthquake can be used as a model for the seismic risk faced by the greater Vancouver area. This report describes the San Francisco earthquake and compares its results to the greater Vancouver area and the results of a similar event in that area. The report details the effects of ground conditions, the performance of buildings, the performance of services, including transportation systems, and notes the emergency preparedness in San Francisco, comparing all these factors to the situation in Vancouver.

East bayfront and port industrial area : pathways : towards an ecosystem approach : a report of phases I and II of an environmental audit of Toronto's east bayfront and port industrial area

by S. Barrett and J. Kidd. Toronto : Royal Commission on the Future of the Toronto Waterfront, 1991. 165 p. : ill., maps. Bibliogr. (Report : 11) ISBN 0-662-18577-3
MICROLOG 91-04487 2 fiche

This report on the environmental audit of the east bayfront and port industrial area of the City of Toronto is the first to use a comprehensive ecosystem approach to a specific geographical area. The audit was conducted in two phases, with phase I gathering existing information on many aspects of the area, focusing primarily on the physical environment; and phase II including recommendations for key research that should be continued in the future. The technical background papers written for both phases I and II form the basis for this report, which explores the ecosystem approach and the notion of ecosystem integrity. The report examines the physical structures of the study area ecosystem, such as the habitats for humans and other organisms and their historical development; how the ecosystem functions; and the way in which decisions are made about ecosystems, including issues of stewardship and accountability. It then presents some opportunities to overcome obstacles presented by environmental conditions and to improve ecosystem integrity in the area.

While virus reaching the soil can provide a stable source of active inoculum between insect host generations, it is thought that such infection is much reduced in forest systems because of distance to hosts, habitat and the constant accumulation of forest litter. This report presents the results of a 3-year study conducted in 9 uniform height plots in southwest Wales, north Yorkshire and Scotland from 1978-80 on the ecology of a nuclear polyhedrosis virus affecting the European pine sawfly. The number of egg masses present in each plot was assessed in April and the number of healthy larval colonies was determined by inspection. Soil samples were taken from the plots to assess the distribution of viruses. CA FO LS SC

Ecology of woodland caribou in Wells Gray Provincial Park

prepared for Ministry of Environment, Wildlife Branch [and] Ministry of Parks : by Dale R. Seip. Victoria : Ministry of Environment, Wildlife Branch, 1990. vi, 43 p. : ill., maps. Bibliogr. (Wildlife bulletin : no. B-68) ISSN 0829-9560 ISBN 0-7726-1166-1 MICROLOG 91-00130 1 fiche

Woodland caribou were abundant in southeastern B.C. in the early 1900s but populations declined or disappeared from much of their historic range by the mid-1970s. Wells Gray Provincial Park is a major population center for the remaining caribou in southeastern B.C. This research project collected information on the ecology of woodland caribou in the park and the adjacent area that would contribute to improved management and conservation of the animals. Necessary information included seasonal movements, habitat use, population parameters, and status of the caribou. Radio-collared caribou were monitored from 1986-89. Additional data on movements and habitat use of wolves and moose were collected to determine predator-prey interactions between caribou, wolves and moose. BC EV PR SC

Econometric issues in transportation demand forecasting models : the case of pivot point modeling procedure and the PODM model

by B.-A. Genest and R. Laferrière. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 8 p. (Publication ; no. 776)
MICROLOG 91-05263 1 fiche

This paper shows how computed residuals from regression are introduced into forecasting models and discusses the econometric implications. Examples of such models include the PODM model and the incremental or pivot logit model. Forecasts of air travel demand made by Transport Canada are partly based on the PODM model. The paper shows how this model can be rewritten in order to make explicit the role of the computed residuals into the forecasting model. The paper also shows that the pivot logit model owns the same restrictions as those of the PODM model since it uses the computed residuals of the regression to do the forecastings.

Economic dimensions of volunteer work in Canada

by D.P. Ross and R. Shillington. Ottawa : Dept. of the Secretary of State of Canada, 1990. 38, 40 p. : ill. Bilingual (Les Aspects économiques...). On cover: Social trends analysis. CSI 21120.216. ISBN 0-662-57897-X
MICROLOG 91-01117 1 fiche

The objective of this study is to demonstrate some of the economic contributions made by volunteer activity to Canadian society. When recognized at all, volunteer work is most often seen as isolated individual acts of charity; consequently, it remains largely outside the framework of policy decisions on the Canadian economy. This study shows that these individual efforts, taken as a whole, are not insignificant. It demonstrates this by converting the volume of volunteer activity into a dollar figure.

The Economic impact of the entrepreneur immigrant program

by A. Nash. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1987. ii, 94 p. Bibliogr. (Discussion paper ; 87.B.1) CSI 99545.210.
MICROLOG 91-01538 2 fiche

This paper examines the nature and evolution of the program, and describes the volume of immigration that the program has encouraged including its temporal and geographical characteristics. It also focuses on the economic attainments of the entrepreneur program and examines job creation, the amount of funds transferred to Canada, the types of industries established and their location across the country. Finally, it examines provincial views on the program before presenting a series of policy recommendations.

Economic integration of Maritime agriculture : a report

by Maritime ministers of agriculture ; to the Council of Maritime Premiers ; for the Maritime Forum. Halifax : Council of Maritime Premiers, 1991. 25 p. Bilingual (Intégration économique de l'agriculture...).
MICROLOG 91-06384 1 fiche

Agriculture in the Maritime Provinces is part of a larger, dynamic economic system. Effectively addressing the range of development opportunities for the industry requires the participation of all stakeholders. Opportunities exist for a higher degree of economic cooperation among provincial agriculture sectors to create more effectively and implement a development strategy within the Maritime region. This report focuses on the process for enhancing Maritime economic cooperation, and includes recommendations for the Ministers of Agriculture.

Economic multipliers for Alberta industries and commodities, based on 1984 input-output tables

Edmonton : Alberta Treasury, Alberta Bureau of Statistics, 1991. v, 48 p. CSI 34118.200.
MICROLOG 91-06378 1 fiche

This report contains economic multipliers for the Alberta economy. The multipliers are 1984-based and produced from the most recent 1984 provincial input-output tables. It describes the various types of economic multipliers and their uses. It works through examples of using multipliers to measure the economic impact of a newly established manufacturing plant and a case of increasing exports. An appendix contains data sources, the

methodology used in deriving the multipliers, a comparison of the 1984 and 1979 multipliers, and the industry aggregation parameters.

Economic overview of Prince Edward Island

Charlottetown : Dept. of Finance, Economics, Statistics and Fiscal Analysis Division, 1990.
96 p. : ill., maps. CSI 62146.200.
MICROLOG 91-02696 2 fiche

The review examines the growth of the population on P.E.I. during the century and recent demographic trends. It studies the labour force as well as the related issue of unemployment. It also describes the structure of the economy today and analyzes economic development from a sectoral perspective. In addition, it examines income growth, both by source and with respect to its changing distribution. It analyzes the importance of government to economic development of the Island, and the macroeconomic forces at play at present. Finally, it provides an interpretation of the Island's economic situation.

Economic profile of the commercial fisheries industry of New England

Canada. Consulate General (Boston, U.S.).
Ottawa : External Affairs and International Trade Canada, 1989. 23, 34 p. *Bilingual* (*Profil économique de l'industrie des pêches...*).
MICROLOG 91-02241 1 fiche

This report provides an economic profile of the New England commercial fisheries industry. It examines the total economic impact of the industry on the region and also considers the economic impacts of the finfish and shellfish segments of the industry. It provides an overview of the industry's recent performance and examines participation in the fishing, processing and distribution industry sectors in terms of number of vessels, processing plants, and employment. The report also provides information on Canadian seafood exports to New England.

An Economic strategy for managing aspen on private lands in northeast British Columbia

by M.R.C. Massie, B. Everett and R.D. Kabzems. Victoria : Forest Resource Development Agreement, 1990. 72 p. : maps. Bibliogr. (FRDA report ; 124) ISBN 0835-0752 ISBN 0-662-17976-5
MICROLOG 91-00349 1 fiche

Over the past several years, the utilization of aspen has increased dramatically in northwestern Alberta and more recently in northeast B.C. A large portion of the resource in B.C. is located on private land and much of this land is marginal for agriculture. This report discusses some of the basic information necessary to consider the management of aspen on private land as a crop that would provide diversification where agriculture is marginal. The report covers the inventory of aspen stands; growth and yield estimates; silvicultural strategies; costs of harvesting, transport and management; comparisons between agriculture and woodlot crops; and conditions necessary for aspen management on private land.

Economics of 15 options for industrial utilization of poplar

by W.J. Ondro. Edmonton : Canadian Forestry Service, Northern Forestry Centre, 1991. x, 33 p. : ill. Bibliogr. (Information report ; NOR-X-320) ISSN 0704-7673 ISBN 0-662-18680-X
MICROLOG 91-03948 1 fiche

This report addresses the opportunities for industrial utilization of poplar in Alberta. The information comes from a field study that involved the harvesting of 3 poplar stands (old, mature, and young) near Slave Lake, Alberta, during the winter of 1982, and their processing into veneer, dimension lumber and studs, waterboard or oriented strandboard, and mill residues for energy production. Economic feasibility studies, using 1986-87 manufacturing costs and product prices, evaluated the technological aspects and resulting costs of harvesting poplar in winter; determined the optimum economic recovery of poplar wood products and energy from old (100-year), mature (80-year), and young (50-year) stands; and evaluated and compared the economics of 15 options for the industrial utilization of poplar by plants with varying capabilities, including energy generation.

The Economics of chemical fallow

by W. Weisenel. Regina : Saskatchewan Agriculture and Food ; Saskatchewan Rural Development, 1990. 4 p. Bibliogr. (Farm facts) ISSN 0840-9447
MICROLOG 91-01931 1 fiche

In response to the increased concern about soil erosion by those concerned with the long-term viability of agriculture, soil scientists have searched diligently for alternative farm practices which are compatible with the arid conditions of prairie agriculture, but are less soil eroding. One alternative is the recently endorsed practice of chemical fallow. The purpose of this paper is to examine the economic decision to chem-fallow on a typical farm in the brown soil zone of Saskatchewan.
